2021/2022
ZERO-POINT-SYSTEMS

WE GENERATE EXCITEMENT.

Since the foundation of the company in 1890 until today the goal has remained the same: the highest quality in products and services. Nevertheless, the circumstances, tasks and challenges have changed, of course. By focussing on our core areas of expertise, we have long set new standards for innovative clamping technology - driven by our own development, the greatest possible flexibility and passion for individual solutions.

All this is only possible with committed and contented employees. Respectful interaction with others, personal development and measures for the wellbeing of each individual are therefore values that matter to us.

Company Management:
Wolfgang Balle, Johannes Maier (CEO), Jürgen Förster

OUR COMPANY HISTORY

- 1890 Company founded as a lock manufacturer by Andreas Maier.
- 1920 Product range extended to include spanners.
- 1928 Production line assembly of FELLBACH LOCKS.
- 1951 Introduces clamping elements and diversifies into workpiece and tool clamping technology.
- 1965 Toggle clamps extend the AMF product range, AMF catalogues are now printed in ten languages.
- 1975 Further specialisation into hydraulic clamping technology.
- 1982 Clamping and fixture systems round off AMF's clamping expertise.
- 1996 AMF team organisation in all sectors of the business, Quality management with certification to ISO 9001.
- 2001 AMF Service Guarantee for all products.
- 2004 Introduction of the ZPS zero-point clamping system.
- 2007 The magnetic clamping technology extends the AMF product range.
- 2009 Development and marketing of AMF Vacuum clamping technology.
- 2012 LOW-COST AUTOMATION gripping, clamping, marking and cleaning.
- 2014 AMF presents the most extensive product range of automation solution in zero-point clamping technology.
- 2017 Wireless sensing systems extend the expertise into Industry 4.0 and blends seamlessly into the AMF product range.

PLEDGES THAT COUNT IN EVERYDAY LIFE

For this reason, we have a few principles that we follow by conviction and which always apply..

INDIVIDUAL DEVELOPMENT

Even if the product you need does not even exist yet, we will find the right solution with you: from special designs to new developments, everything is possible.

WARRANTY

If, despite our high quality standard, there is a complaint, this is dealt with quickly and unbureaucratically, even beyond the warranty period.

HIGHEST QUALITY STANDARDS

Careful manufacturing based on tradition since 1890, and naturally with a modern quality management system according to ISO 9001 for many years.

SHORT DELIVERY TIME

With over 5,000 articles in our warehouse, you can expect your order to be dispatched on the same day.

COMPETENT SERVICE FROM EXPERTS

Your local retail partner or the specialists in our team will find the right solution for every task.

MADE IN GERMANY

Our entire product range is developed and manufactured exclusively by our employees in Germany.

ECONOMICAL, PRECISE, QUICK - THE AMF ZERO-POINT SYSTEM

By using modern AMF zero-point systems, you optimize fixture and workpiece changeover in your production, correspondingly reduce set-up times on the machine and so save money!

The benefits of zero-point clamping technology are obvious:

- > Increase in machine run-time
- > Very fast workpiece or fixture changeover
- > High repeatability
- > A uniform interface for all machines
- > Positioning and clamping in a single step

> The pull-stud in our zero-point system is the interface between the machine table and the workpiece or fixture. It ensures exact positioning and secure clamping. The resulting work forces are transferred through the pull-stud to the clamping module.

> The precisely manufactured clamping modules of the AMF Zero-Point System ensure a secure and firm hold of the workpiece or fixture to be clamped. With the high pull-in, closing and holding forces, they are suitable for every application.

LARGE INTAKE CATCHMENT

No laborious searching for the holes anymore - self-centring via the diagonal side surfaces of the engagement screw.

SWING-FREE

Swing-free run-in and run-out through the optimal contour of the pull-stud.

FORM FIT

The balls are optimally encapsulated on 3 sides. As a result, the pull-stud always remains firmly clamped in the module.

YOUR ADVANTAGES - THOUGHT THROUGH IN DETAIL

Experience a zero point clamping system that, through its innovative and forward-looking features, presents its strengths in use in an advanced way.

Numerous advantages speak for themselves and make the AMF zero-point system into a technology that revolutionizes the zero-point clamping technology market.

SIMPLE CLEANING

Our zero-point clamping systems can be blown out very simply with a commercially available compressed air cleaning pistol and do not require complicated suctioning out.

BLOW OUT

Our system has a pneumatic blow-out installed at the factory. As a result, chips and dirt inside are effectively blown out.

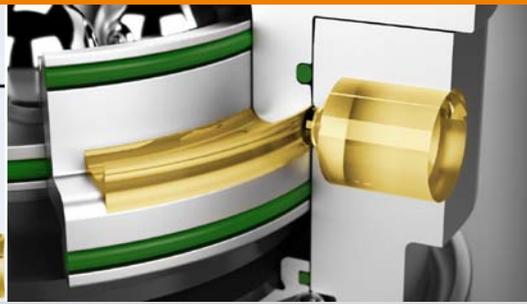

RUSTPROOF STAINLESS STEEL

High-alloy, hardened tool steel - and so no corrosion.

THREE-POINT PRINCIPLE

Power transmission by means of the three-point principle! This optimised force distribution prevents shearing load on the balls.

MEDIA FEED

Due to the lateral media feed, low pallet thicknesses are possible and fewer feed holes are necessary.

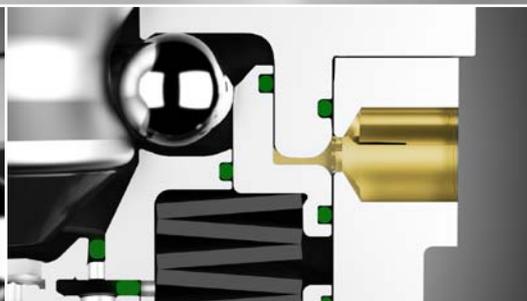

NO BALL CAGE

The balls lie freely in the ball canal. This freedom of movement enables the balls to continuously re-position themselves.

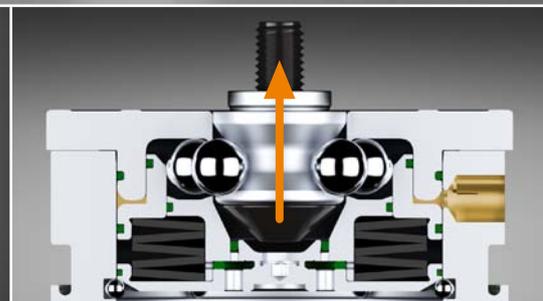

LARGE BALL DIAMETER

Ball surface is 784% greater than with traditional ball systems.

SAFETY SYSTEM

Process reliability - Clamping module always opens. A piston blockade is thus impossible.

GOOD HOLDING, PULL-IN AND LOCKING FORCES

Holding force of up to 105 kN*. Pull-in and locking force of up to 40 kN.

* Please observe the installation instructions.

FAQS ABOUT ZERO-POINT CLAMPS AND THE AMF ZERO-POINT SYSTEM

WHAT IS PULL-IN FORCE / HOLDING FORCE?

- > The pull-in force describes the force with which the stud is pulled in and clamped with positive interlocking in the clamping module. The holding force, in contrast, specifies the maximum permissible pull force of the engagement screw.

WHAT IS REPEATABILITY?

- > The repeatability specifies the tolerance range within which the recorded reference points on the workpiece lie after removal and reclamping of the same workpiece. The repeatability, also called repetition accuracy, is below 0.005mm.

WHAT ADVANTAGES RESULT FROM THE USE OF ZERO-POINT, TIMING AND UNDERSIZE PULL-STUDS?

- > These different types of pull-studs offset the spacing tolerances of pull-studs and clamping modules. The fixed reference point is achieved through the zero-point pull-stud; the slit pull-stud serves to compensate for the still-free axis. The under size pull-stud does not have a centring function, but only a clamping and holding function.

CAN I INSERT THE PULL-STUD DIRECTLY INTO THE WORKPIECE FOR MACHINE PROCESSING?

- > The high costs for chucking fixtures and workpiece clamping can be effectively saved here if the pull-studs are mounted in the workpiece, which is clamped directly using the clamping modules. As a result, a complete 5-sided processing of the workpiece is possible in one chucking. With the different stud sizes (attaching thread M6 to M16), workpieces of different sizes can be clamped.

HOW DOES THE SYSTEM COMPENSATE FOR HEAT, SUCH AS FROM METAL CUTTING?

- > Through the different pull-stud designs, the system can compensate for temperature differences between the workpiece and the clamping module easily and controllably. For a graphic depiction of the stud array, see page 130 of the catalogue. If you have other technical questions, please contact us at any time.

WHAT SHOULD BE THE SPACING TOLERANCE OF THE PULL-STUDS AND THE CLAMPING MODULES IF SELF-PRODUCED?

- > The permissible spacing tolerance of pull-studs and clamping modules is +/- 0.01 mm.

WHERE CAN I GET AN INSTALLATION DIAGRAM OR INSTALLATION MANUAL?

- > We are happy to send them immediately when customers request them by e-mail.

IS THE CLAMPING MODULE SUITABLE FOR ERODING?

- > The module is optimally suited for all normal processes, such as eroding, grinding, cutting and turning. Through the complete sealing, the clamping module can be used in liquids and under rough ambient conditions.

IS THE CLAMPING MODULE SUITABLE FOR USE ON INJECTION MOULDING MACHINES?

- > Especially when injection moulds are changed frequently, the costs for a zero-point solution are amortized within the shortest of times for such machines. Unlike with mechanical clamps, clamping takes place quickly and easily just by pressing a button.

HOW HIGH IS THE MAX. OPERATING TEMPERATURE OF THE CLAMPING MODULES?

- > The maximum processing temperature is 80°C in the standard design. Clamping modules for use at higher temperatures can be requested at any time.

WHAT IS BLOW-OUT AND HOW DOES IT WORK?

- > Blow-out using compressed air is guided through the floor of the clamping module and blows out contamination, such as chips, coolant or the like from the central opening and from the sphere space of the module.

WHEN DO I USE THE HYDRAULIC PRESSURE INTENSIFIER AND WHEN THE PNEUMATIC PRESSURE INTENSIFIER?

- > Hydraulic pressure intensifier: This transforms the pneumatic into hydraulic pressure in a ratio of 1:8 to open hydraulic modules. Pneumatic pressure intensifier: This is used to intensify the pneumatic pressure in the ratio of 1:2 for pneumatic clamping modules and compensates for pressure fluctuations in the supply line.

HOW DOES THE PATENTED SAFETY SYSTEM WORK IN THE HYDRAULIC CLAMPING MODULE AND WHEN IS IT USED?

- > If the piston seal begins to leak, the spring space quickly fills with oil. The result is: The piston blocks and the module can no longer be opened. Destruction of the clamped fixture of the of clamping module would then be unavoidable. Here, the patented safety system ensures that the oil in the spring space can escape and the piston can be operated.

ARE YOU PRODUCING YET OR STILL SETTING UP?

THE CALCULATION IS VERY SIMPLE!

It has been shown that you can reduce your set-up times by over 90% through the use of the AMF Zero-Point System. High machine standstill times are avoided, set-up times minimized and cash saved...

Take the time to calculate your savings potential with the AMF Zero-Point System very simply.

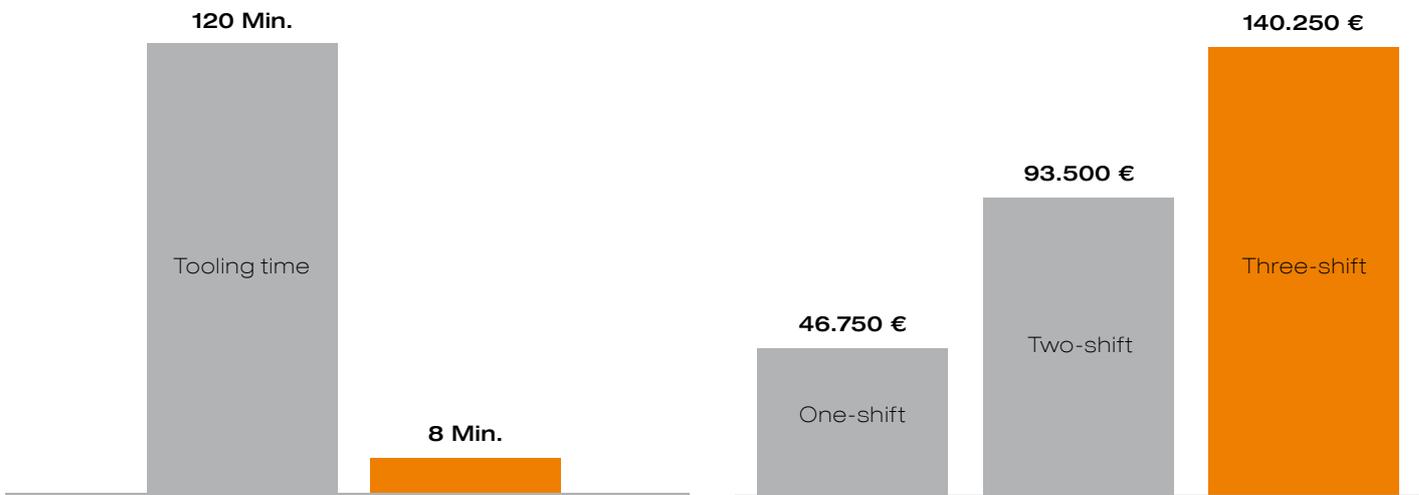

SAMPLE CALCULATION OF A CUSTOMER BEFORE AND AFTER USE OF THE ZERO-POINT SYSTEM

Procedure	Without zero-point clamping system	With the AMF Zero Point System
Machine costs	€100/h	€100/h
Number of set-ups per shift (8h)	4 x	4 x
Set-up time per procedure	30 mins.	2 mins.
Set-up time per shift (8h)	120 mins. (2 h)	8 mins. (0,13 h)
Set-up costs per shift (8h)	€ 200	€ 13
Set-up costs per shift each year (250 working days)	€ 50.000	€ 3.250
Annual savings per shift (8h)	€46.750	

DRASTICALLY REDUCED SET-UP TIMES GUARANTEE YOU WILL EXPERIENCE A RAPID RATIONALISATION EFFECT

If previously 120 mins had to be invested in four tooling procedures in a shift, the use of the AMF Zero Point System will reduce this to only 8 mins. Rapid switching of equipment and workpieces as well as tooling in parallel with operating time outside of the machine results in the rationalisation effect described.

The savings in our customer example of €140.250 per year, for three-shift production utilisation, guarantees rapid amortisation of the invested amounts of approx. €3,750 for a 4-capacity clamping station including accessories.

Tooling times drastically reduced from 120 mins to 8 mins - through the use of the AMF Zero Point System.

Whether one, two or three-shift operation - the savings from the AMF Zero Point System speak for themselves!

INSTALLATION CLAMPING MODULES

The AMF installation clamping modules are used with low space requirement and low overall height. For installation in pallets, machine tables, clamping brackets and cubes. Usable when cutting, grinding, eroding and on plastic-processing machines as well as for fixture construction with mounting fixtures and handling systems. The AMF clamping modules can be installed in all positions. Whether vertical or overhead - mounting works completely without assembly tools.

Installation clamping modules come in ten different sizes:

- > **Clamping modules K01 - Ø 22 mm -**
Insertion/locking force up to 0.1 kN - retention force 1 kN*
- > **Clamping modules K02 - Ø 22 mm -**
Insertion/locking force up to 0.23 kN - retention force 6 kN*
- > **Clamping modules K5 - Ø 45 mm -**
Insertion/locking force up to 5 kN - retention force 13 kN*
- > **Clamping modules K5.3 - Ø 78 mm -**
Insertion/locking force up to 1.3 kN - retention force 13 kN*
- > **Clamping modules K10 - Ø 78 mm -**
Insertion/locking force up to 10 kN - retention force 25 kN*
- > **Clamping modules K10.2 - Ø 112 mm -**
Insertion/locking force up to 10 kN - retention force 25 kN*
- > **Clamping modules K10.3 - Ø 112 mm -**
Insertion/locking force up to 10 kN - retention force 25 kN*
- > **Clamping modules K20 - Ø 112 mm -**
Insertion/locking force up to 20 kN - retention force 55 kN*
- > **Clamping modules K20.3 - Ø 138 mm -**
Insertion/locking force up to 17 kN - retention force 55 kN*
- > **Clamping modules K40 - Ø 148 mm -**
Insertion/locking force up to 40 kN - retention force 105 kN*

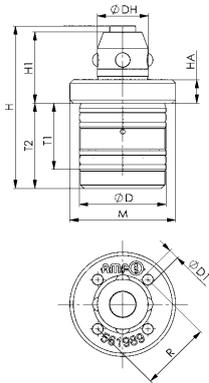

* Please observe the installation instructions.

Subject to technical alterations.

No. 6215P-01

Clamping module, screw-in version

Pneumatic opening.
Opening operating pressure: min. 5 bar - max. 12 bar.
Housing and piston hardened.
Repetition accuracy < 0.1 mm.

Order no.	Size	Pull-in/locking force up to	Holding force*	Weight
		[N]	[N]	[g]
561989	K01	100	1000	40

Application:

Pneumatic zero-point clamping system for set-up-time-optimised clamping during cutting and non-cutting machining in all areas, also in the food, pharmaceutical and chemical industry. Ideally suited for applications in the transfer automation range, since no interference contour is present underneath.

Note:

The zero-point clamping system is opened (1) pneumatically and locked mechanically by spring force. Subsequent uncoupling of the pressure line is possible at any time (zero-point clamping system is clamped at normal pressure). The base plate serves as the contact surface, into which the zero-point clamping system is screwed. * Please observe the installation instructions.

No. 6370EARH

Installation clamping module, screw-in version

Hydraulic opening.
Pneumatic blow-out.
Opening operating pressure: min. 50 bar - max. 60 bar.
Cover and piston hardened.
Repeatability < 0.005 mm.

Order no.	Size	Pull-in/locking force up to	Holding force*	Blow out	Weight
		[kN]	[kN]		[g]
305953	K 5	5	13	●	150

Application:

Zero-point clamping system for set-up-time-optimised clamping during cutting and non-cutting machining. With small space requirement and low installation height.

Note:

The installation clamping module has high holding, pull-in and locking forces. This is opened hydraulically (1) and mechanically locked through spring force. Subsequent uncoupling of the pressure lines is possible at all times (module is tensioned pressure-free). The contact surface serves as the upper housing surface.
The clamping module with blow-out has two connections: 1x hydr. opening (1), 1x pneum. Blow-out and support control (3). (The pneumatic blow-out and support control can optionally be connected.)
The suitable installation tool is available under the AMF order no. 41046.
* Please observe the installation instructions.

On request:

Pneumatic opening.
Pneumatic blow-out.
Opening operating pressure: min. 8 bar - max. 12 bar.
Retensioning operating pressure (turbo): min. 5 bar - max. 6 bar.
Cover and piston hardened.
Repeatability < 0.005 mm.

Order no.	Size	Pull-in/locking force up to	Holding force*	Blow out	Weight
		[kN]	[kN]		[g]
305979	K 5	1,5	13	-	150
563900	K 5	1,5	13	●	150

Application:

Zero-point clamping system for set-up-time-optimised clamping during cutting and non-cutting machining. With small space requirement and low installation height.

Note:

The installation clamping module has high holding, pull-in and locking forces. This is opened pneumatically (1) and locked mechanically through spring force. To achieve the specified pull-in and locking forces, it must be briefly retensioned pneumatically (turbo) (2). Subsequent uncoupling of the pressure lines is possible at any time (module is clamped pressure-free). The contact surface is the upper surface of the housing. It is recommended to use the pneumatic pressure booster no. 6370ZVL.
The clamping module without blow-out has two connections: 1x pneum. Opening (1), 1x pneum. Retensioning (turbo) (2). The clamping module with blow-out has three connections: 1x pneum. Opening (1), 1x pneum. Retensioning (turbo) (2), 1x pneum. Blow-out and support control (3). (The pneumatic blow-out and support control can optionally be connected.)
The suitable installation tool is under the AMF order no. 41046.
* Please observe the installation instructions.

427971	K20	20	55	●	1,40
429845	K40	40	105	●	3,40

Application:

Zero-point clamping system for set-up-time-optimised clamping during cutting and non-cutting machining.

Note:

The installation clamping module has high holding, pull-in and locking forces. This is opened hydraulically (1) and mechanically locked through spring force. Subsequent uncoupling of the pressure lines is possible at all times (module is tensioned pressure-free). The clamping module with blow-out and support control has two connections: 1x hydr. opening (1) / 1x pneum. blow-out and support control (3). (The pneumatic blow-out and support control can optionally be connected.)

Installation clamping module in flange version for simplified installation, see 6151HA.

* Please observe the installation instructions.

SIMPLIFIED INSTALLATION IN THE BODY - THE INSTALLATION CLAMPING MODULE AS FLANGE VERSION

The flange version of the installation clamping module has a centring ring on the underside. This allows simplified and precisely positioned installation of the module in the body. Through the low depth of the required mounting hole for the centring ring, existing fixtures and be easily and inexpensively refitted with the AMF Zero-Point System. The clamping module can be operated from the outside via a tube connection or from the bottom via an O-ring connection.

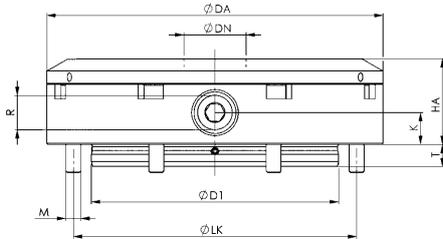

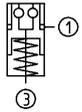

Subject to technical alterations.

303107	K40	40	105	-	8	5,2
306258	K40	40	105	●	8	5,2

Design:

As standard, there is a manual (hand power) or hydraulic run-out and run-in movements of the suspension piston.

- Cylinder has one connection: 1x hydr. opening (1),
- Cylinder with hydraulic advance motion has three connections: 1x hydr. opening (1), Run out 1x hydr. suspension piston opening (5), run in 1x hydr. suspension piston opening (4).

Application:

Zero-point clamping system for set-up-time-optimised clamping during cutting and non-cutting machining. For installation in clamping profiles, cubes and towers. The horizontal toggle clamp cylinder is used to change fixtures quickly and easily by means of the suspension piston with hand force, hydraulic or handling device.

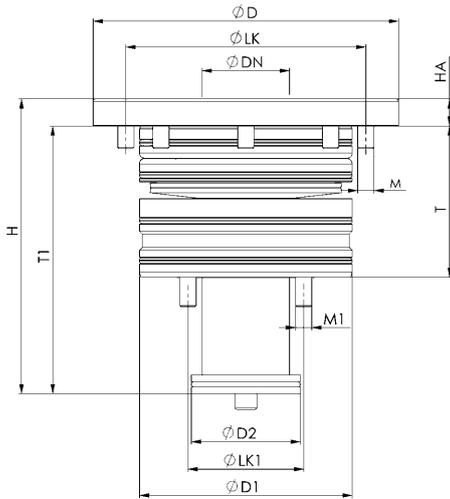

Note:

The horizontal rapid-clamping cylinder has high holding, pull-in and locking forces. This is opened hydraulically (1) and mechanically locked through spring force. Subsequent uncoupling of the pressure lines is possible at all times (module is tensioned pressure-free). The maximum weight per suspension piston must not exceed 5 kN at K20 and 8 kN at K40.

* Please observe the installation instructions.

Mounting key for horizontal rapid-clamping cylinder

Suitable for 6370HARH.

Order no.	Size	Weight [g]
424556	K20	520
426866	K40	940

Application:

The mounting key is needed for installation of the threaded sleeve of the horizontal rapid-clamping cylinder.

HORIZONTAL RAPID-CLAMPING CYLINDER

This is how to make vertical palletization quick and uncomplicated:

- > No searching for the holes
- > No hydraulic or pneumatic pre-tensioning
- > No damage from zero-point hole and pull-stud
- > No risk of injury
- > Reduced set-up times and thus cost savings

Flexibly usable in clamping towers, clamping brackets, automated handling devices or in general machine building.

> Whether by hand, with crane, handling device or robot: Horizontal rapid-clamping cylinders offer maximum protection and comfort.

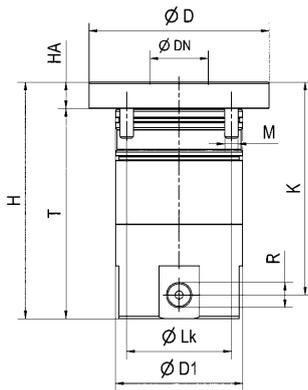

> After the pallet has been mounted, it can easily be pushed in and out. This process can be automated, if desired.

No. 6370KARH

Compact cylinder

Hydraulic opening.
Opening operating pressure: min. 50 bar - max. 60 bar.

SURFACE-MOUNTED CLAMPING MODULES

The AMF surface-mounted clamping modules are installed on pallets, machine tables, clamping brackets and cubes. Usable when cutting, grinding, eroding and on plastic-processing machines as well as for fixture construction with mounting fixtures and handling systems.

The AMF clamping modules can be installed in all positions. Whether vertical or overhead - mounting works completely without assembly tools.

Surface-mounted clamping modules are available in four different sizes:

- > **Clamping modules K5** - dia. 62 mm -
pull-in/locking force up to 5 kN - holding force 13 kN*
- > **Clamping modules K10** - dia. 78 mm -
pull-in/locking force up to 10 kN - holding force 25 kN*
- > **Clamping modules K20** - dia. 112 mm -
pull-in/locking force up to 20 kN - holding force 55 kN*
- > **Clamping modules K40** - dia. 148 mm -
pull-in/locking force up to 40 kN - holding force 105 kN*

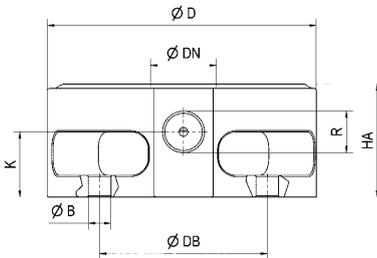

* Please observe the installation instructions.

426841	K40	2	202	146,0	16,00	172	13,0	1100

Application:

Clamping flanges are used to fasten surface-mounted clamping modules on the machine table.

On request:

- Special clamping flanges for various T-slot tables
- Clamping flange and housing manufactured as a single piece

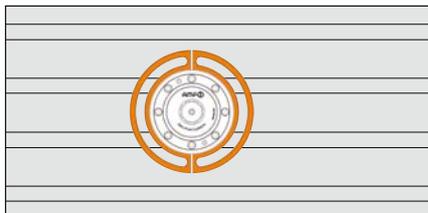

CAD

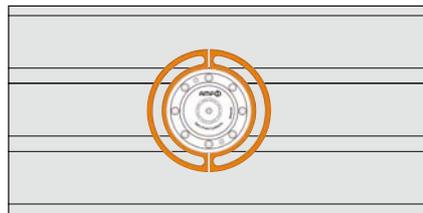

Examples of machine-table mounting:

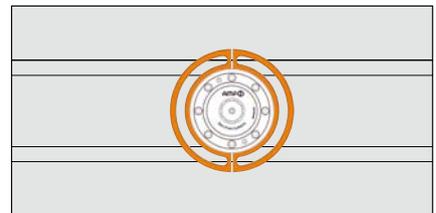

K10 - Groove distance 50 mm

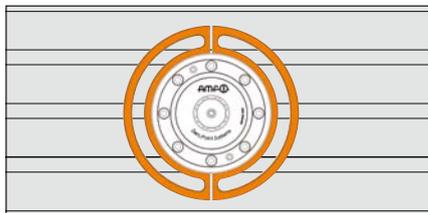

Groove distance 63 mm

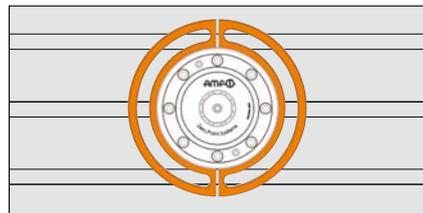

Groove distance 80 mm

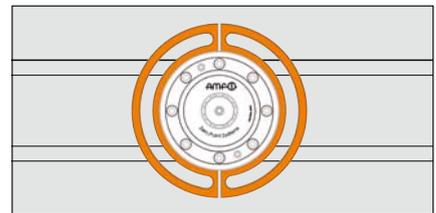

K20 - Groove distance 50 mm

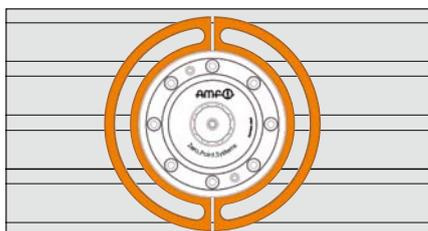

Groove distance 63 mm

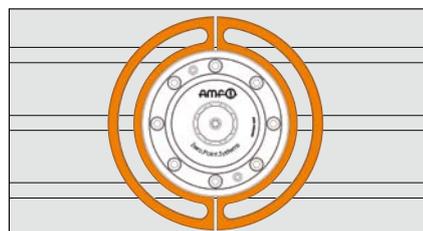

Groove distance 80 mm

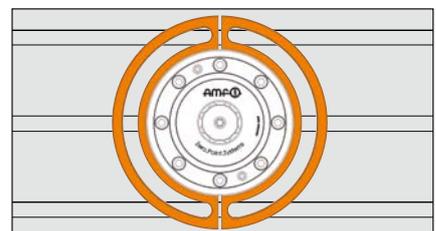

K40 - Groove distance 50 mm

Groove distance 63 mm

Groove distance 80 mm

ZERO-POINT SYSTEMS FROM AMF - THE UNIFORM INTERFACE IN ADDITIVE MANUFACTURING

- + Designed for the special requirements of additive manufacturing
- + A uniform interface in 3D printing and post-processing
- + Drastic reduction of your set-up times
- + Integrated blow-out of the clamping modules

PLEASE ASK US!

Subject to technical alterations.

AUTOMATION SOLUTIONS FROM AMF

The enormous capability and flexibility of use of modern processing machines is undisputed. To be able to use these capabilities in reality requires more than just fast machines. An automation solution consists today of a number of multiply linked, versatile products and technologies.

Through the possibility of a fully automatic and process-sure machine configuration, our automation solutions meet the requirements for seamless integration into the automation system. Numerous sensing options, optional media ducts and blow-out and blow-off of the modules speak for themselves!

Persuade yourself of the automation potential of the AMF zero-point clamping modules!

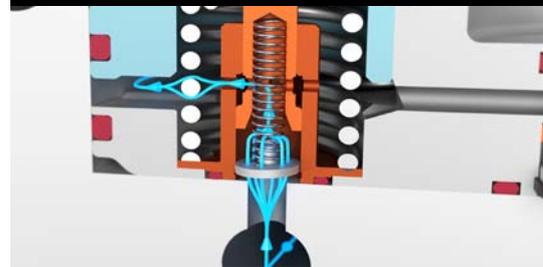

1. OPENING CONTROL

IS THE MODULE OPEN?

Through the direct monitoring of the piston position (opened) by means of pneumatic back pressure, the position can be sensed by means of a differential pressure switch.

5. LOCKING CONTROL

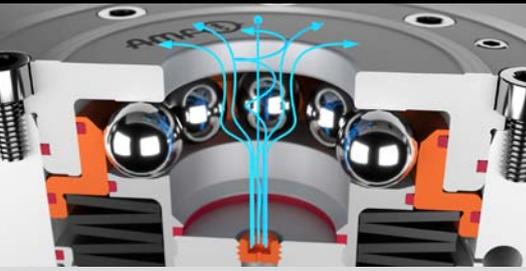

IS THE MODULE LOCKED?

With an open module, the integrated stop valve creates a pneumatic static pressure, which is sensed via a differential pressure switch.

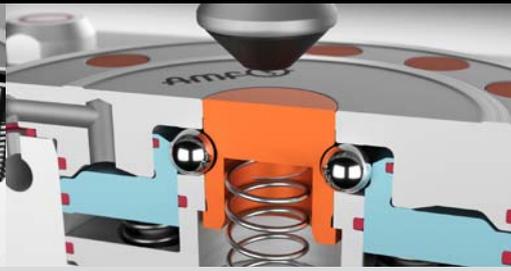

2. INTERNAL BLOW-OUT

DIRT AND CHIPS IN THE CLAMPING MODULE?

Blowing out with compressed air cleans the inside from all dirt and chips and can be used simultaneously for workpiece support control by means of a differential pressure sensor.

3. CENTRAL LOCK

DIRT AND CHIPS UNWELCOME IN THE MODULE?

The lagging central lock prevents penetration of dirt and chips when the pull-stud is being run out. The central lock replaces the previously required protection pull-stud.

4. STUD SENSING

IS THE PULL-STUD PRESENT ON THE FIXTURE?

The retracting stud actuates a stop valve, which eliminates the pneumatic or hydraulic static pressure. This condition is sensed via a differential pressure switch.

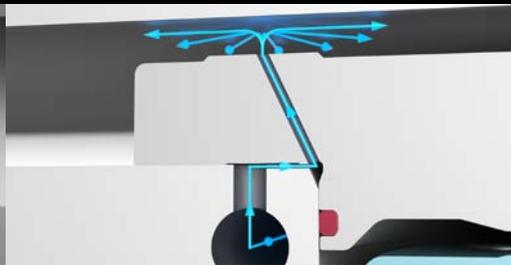

6. MEDIA DUCTS

ARE MEDIA DUCTS TO A FIXTURE NECESSARY?

Oil, compressed air, water, etc. can be run through our couplings without leaks.

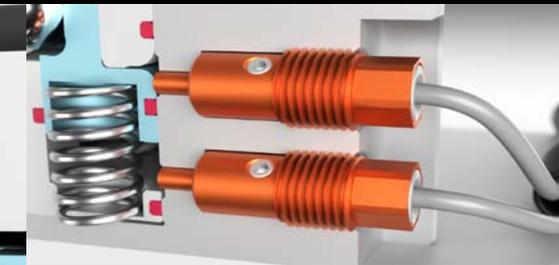

7. BLOW-OFF/SUPPORT CONTROL

CHIPS AND DIRT? IS A WORKPIECE LYING WITHOUT GAP OR NOT?

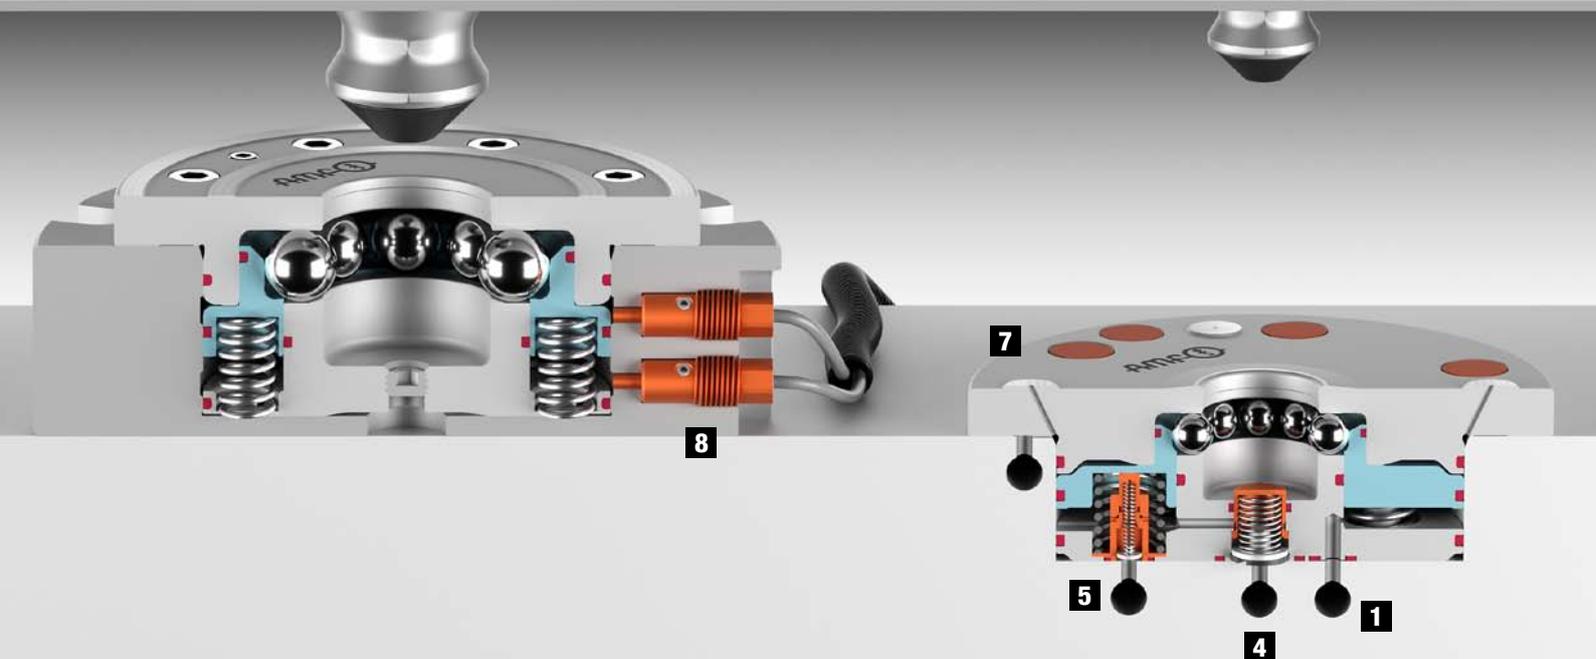

The blow-out function with compressed air cleans the support surfaces and can be used simultaneously for workpiece support control by means of a differential pressure sensor.

8. ELECTRICAL SENSING

IS THE MODULE OPEN OR CLOSED?

The integrated inductive sensor can sense the piston position (open/closed) of the clamping module.

OUR AUTOMATION SOLUTIONS - THE RIGHT CLAMPING MODULE FOR EVERY APPLICATION

No. 6103LA-5

Installation clamping module for automation solutions, screw-in version

Pneumatic opening.

Pneumatic blow-out.

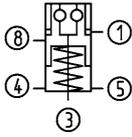

Opening operating pressure: min. 8 bar - max. 12 bar

Retensioning operating pressure (turbo): min. 5 - max. 6 bar

Cover and piston hardened.

Repetition accuracy < 0,005 mm.

With locking control (pneum.), opening control (pneum.) and support control (pneum.).

NEW!

Order no.	Size	Pull-in/locking force up to	Holding force*	Blow out	Weight
		[kN]	[kN]		
561992	K5	1,5	13	●	175

Design:

Centric blow-out, support control, opening and locking control.

Application:

Zero-point clamping system for automation solutions for set-up-time-optimised clamping during cutting and non-cutting machining.

Note:

Locking control: Dynamic pressure with locked clamping module, flow-through with opened clamping module.

Opening control: Dynamic pressure with opened clamping module, flow-through with locked clamping module.

The installation clamping module is opened pneumatically and locked mechanically by spring force. To achieve the specified pull-in and locking forces, it must be briefly retensioned pneumatically (turbo) (5).

Subsequent uncoupling of the pressure line is possible at any time (module is clamped at normal pressure).

The contact surface is the upper surface of the housing. It is recommended to use a pneumatic pressure booster no. 6370ZVL.

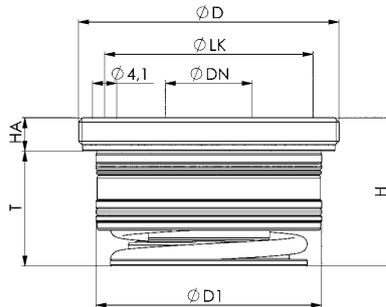

The clamping module has five connections:

- 1 = pneum. opening
- 3 = pneum. blow-out
- 4 = pneum. Opening control inlet
- 5 = pneum. Retensioning
- 8 = pneum. locking control, inlet

* Please observe the installation instructions.

Design:

Pneumatic sensor unit with a control module, preassembled sensor module with integrated LCD display for displaying the operating status and two connecting cables each 5 meters in length and one open end.

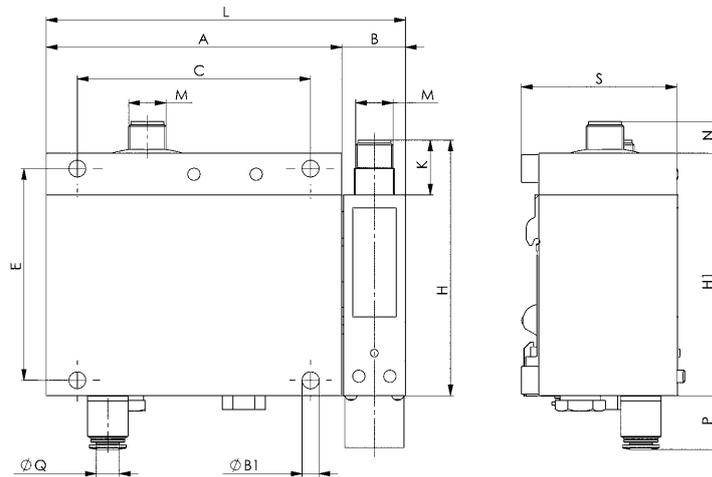

Technical data per sensor module:
 Distance measuring range: 0.02 - 0.2 mm
 Pneumatic connection: Q6 Plug connection 6 mm
 Electrical output: 2 switch outputs PNP
 Electrical connection: M12 plug, A-coded

Application:

Pneumatic sensor unit for querying and condition monitoring of the AMF zero-point clamping system for the automation. The switchpoints of the sensor modules are applied directly in the teach-in process and can then be finely adjusted and adapted manually to the individual requirements.

Note:

A maximum of four sensor modules can be mounted and connected per control module.

CAD

Subject to technical alterations.

No. 6370ZSA-03

Flow meter

Hydraulic.

Order no.	A	B	C	G	H	H1	K1	M	Nominal bore [NW]	Weight [g]	Q [l/min]
553154	55	55	41	M6	128	90	15,5	M12 x 1	8	700	0,02-2

Design:

Flow meter for hydraulic volume flow of 0.02 - 2.0 l/min incl. 5-metre connecting cable.

Technical data:

Nominal diameter: DN008

Connection: Internal thread G1/4

Compressive strength: PN 200

Measurement range: 0.02 - 2.0 l/min

Medium temperature: - 25 .. + 80 °C

Ambient temperature: - 20 .. + 70 °C

Programming: via adjusting ring POM

Electrical connection: Round plug M12 x 1.5-polig

Power supply: 18 .. 30 V DC

Protection class: IP 67

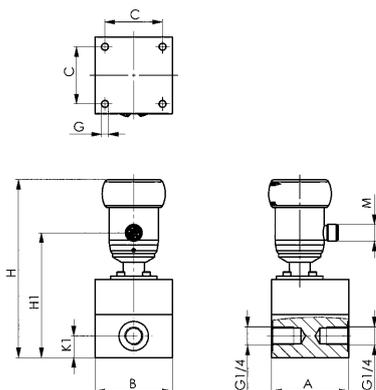

Hysteresis: adjustable

Display: LCD Display + LED

Application:

Through the very exact measurement resolution of this unit, it is possible to check and monitor whether the zero-point clamping system is in an opened or closed state.

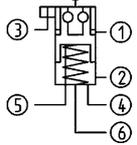

The gearwheel flow meter measures the hydraulic flow in the connection lines of the AMF zero-point clamping system for automation and emits an output signal when the preset threshold value is reached.

No. 6102H

„Turbine“ high-end clamping module for full automation

Hydraulic opening.
 Opening operating pressure: 25-50 bar.
 Retensioning operating pressure: 20 bar.
 Cover and piston hardened.
 Repeatability < 0.005 mm.

Order no.	Size	Pull-in/locking force up to	Holding force*	Weight
		[kN]	[kN]	[Kg]
420919	K23	23	23	4,8

Application:

For fully automatic clamping solutions for use as machine table support in processing centres with automatic pallet changing system or robot loading and for installation in pallets, machine tables, clamping brackets and cubes. Many possible versatile uses in automation.

Note:

Hardened support surfaces as island design with integrated support control. Additional blowing off of the support surfaces by centrally running-out turbine spindles and blowing out of the sphere space. Additional hydraulic 6 mm lift-out of the pallet to be changed for easier pallet removal.

Sensing options:

- Support control (pneumatic)
- Locking control (hydraulic)

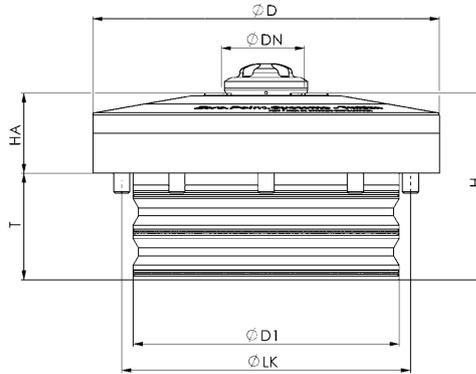

Turbine has six connections:

1x hydr. opening (1) / 1x hydr. retensioning (2) / 1x pneum. support control (3) / 1x blow-off, blow-out and pneum. turbine blow-off (4) / 1x hydr. locking control (5) / 1x run out short stroke piston (6).

„TURBINE“ HIGH-END CLAMPING MODULE FOR FULL AUTOMATION

This high-end clamping module is used for optimised tool clamping times in fully automatic processing centres with pallet changing systems or robot loading.

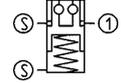

- Turbine blow-off of the hardened support and housing surface
- Pneumatic support control
- Hydraulic unlocking control
- Hydraulic lifting of the pallet (6 mm) after opening of the clamping module
- Material: stainless steel
- Hardened support surface on the pull-stud with defined, measurable height

No. 6109L-02

Installation clamping module with sensor query for opening and interlock

Pneumatic opening.
 Opening operating pressure: min. 6 bar - max. 14 bar.
 Cover and piston hardened.
 Case: Aluminium.
 Repetition accuracy < 0.02 mm.

Order no.	Size	Pull-in/locking force up to	Holding force*	Weight
		[N]	[N]	[g]
559089	K02	235	6000	51

Application:

Zero-point clamping system for automation solutions for set-up-time-optimised clamping during cutting and non-cutting machining.

Note:

The installation clamping module has high holding, pull-in and locking forces. This is opened pneumatically (1) and locked mechanically through spring force. Subsequent uncoupling of the pressure lines is possible at any time (module is clamped pressure-free).

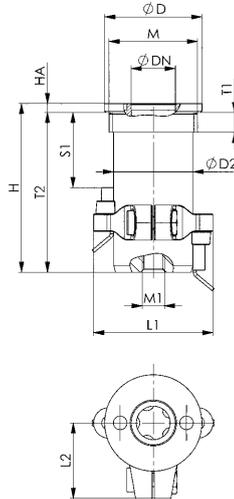

The clamping module has one connection:

1 = pneum. opening

The installation clamping module with sensor query contains the fastening kit order no. 559403. It has two reed sensors with connection cables (Ø 0.75 mm, cable length 100 mm) for status check opened / locked and a fastening clamp.

For simple installation of the installation clamping module, we recommend the AMF pin wrench, order no. 50914.

* Please observe the installation instructions.

The fastening kit contains two reed sensors with connection cables (Ø 0.75 mm, cable length 100 mm) for status check opened / locked and a fastening clamp. This kit can be fastened to the clamping module K02 with sensor query.

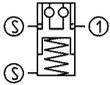

CAD

Subject to technical alterations.

No. 6104L

Clamping module with sensor query for opening and interlock

Pneumatic opening.
 Opening operating pressure: min. 5 bar - max. 12 bar.
 Cover and piston hardened.
 Flange housing: aluminium.
 Repetition accuracy < 0.005 mm.

Order no.	Size	Pull-in/locking force up to		Weight
		[kN]	Holding force* [kN]	
558051	K5.3	1,5	13	1,2
552967	K10.3	10	25	2,6
552968	K20.3	17	55	5,0

Application:

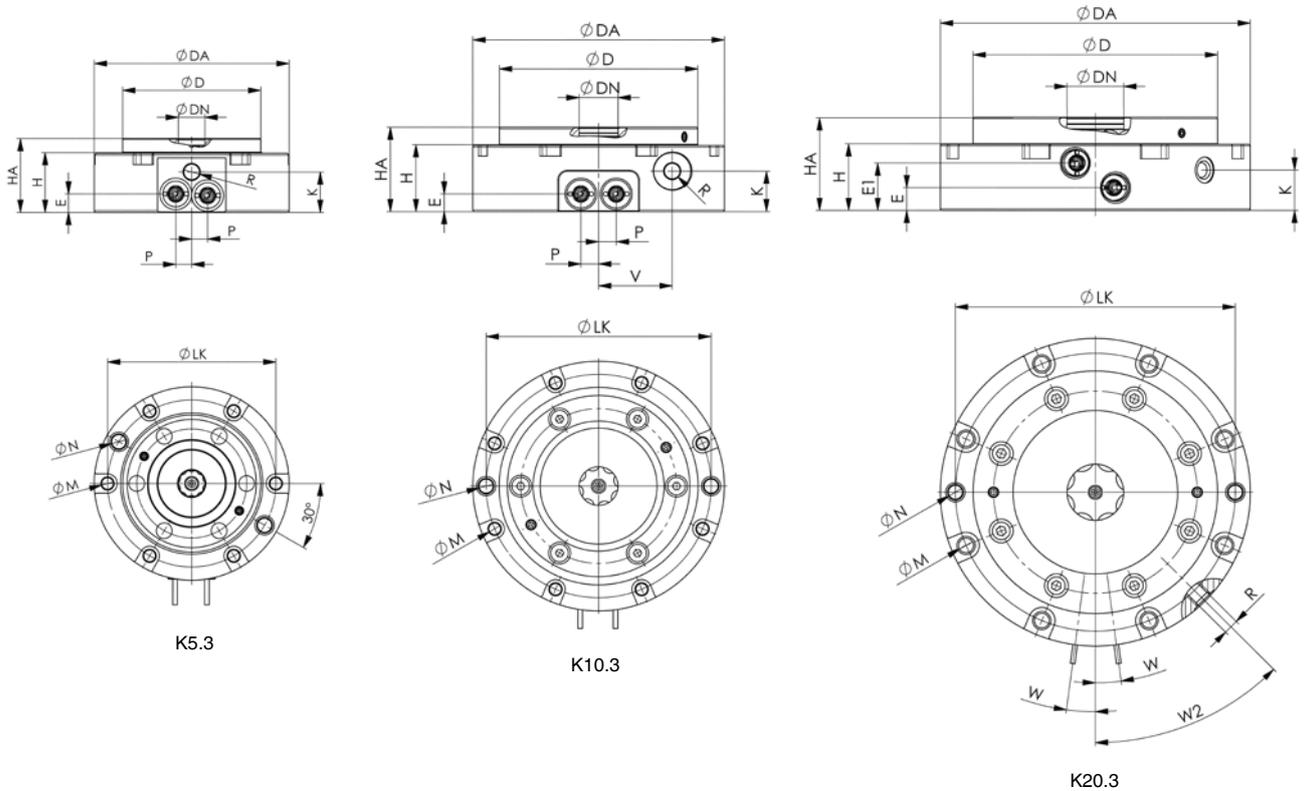

Zero-point clamping system for automation solutions for set-up-time-optimised clamping during cutting and non-cutting machining.

Note:

The clamping module with sensor query has two inductive sensors (connection type: plug S8, cable length 150 mm) for the status check (opened / locked). This is opened pneumatically (1) and locked mechanically through spring force. Subsequent uncoupling of the pressure line is possible at any time (module is clamped at normal pressure).

The clamping module has one connection:
 1 = pneum. opening

* Please observe the installation instructions.

No. 6101L

Clamping module with sensor query for opening and interlock

Pneumatic opening.
 Opening operating pressure: min. 8 bar - max. 12 bar.
 Re-clamping operating pressure (turbo): min. 5 bar - max. 6 bar.
 Cover and piston hardened.
 Flange housing: Stainless steel
 Repetition accuracy < 0.005 mm.

Order no.	Size	Pull-in/locking force up to	Holding force*	Weight
		[kN]	[kN]	[Kg]
552963	K10	8	25	2,4
552964	K20	17	55	6,9
552965	K40	30	105	11,0

Application:

Zero-point clamping system for automation solutions for set-up-time-optimised clamping during cutting and non-cutting machining.

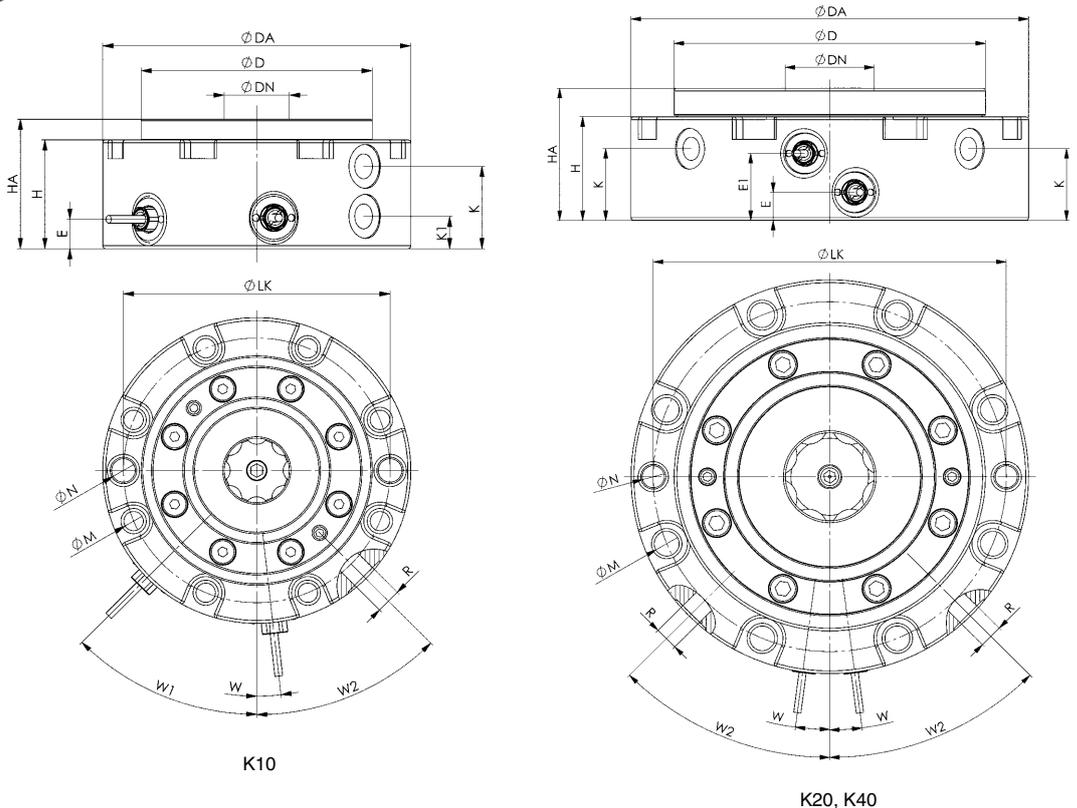

Note:

The installation clamping module with sensor query contains 2 inductive sensors (connection type: S8 plug, cable length: 150 mm) for status check (opened / locked). This is pneumatically opened (1) and mechanically locked through spring force. To achieve the specified pull-in and locking forces, it must be briefly retensioned pneumatically (turbo) (2). Subsequent uncoupling of the pressure lines is possible at any time (module is clamped pressure-free). Use of the pneumatic pressure booster no. 6370ZVL is recommended.

The clamping module has two connections:

- 1 = pneum. opening
- 2 = pneum. retensioning (turbo)

* Please observe the installation instructions.

No. 6214M-01

Clamping module, mechanical, screw-in version

Mechanical opening.
Housing and piston hardened.
Repetition accuracy < 0.1 mm.

CAD

Order no.	Size	Pull-in/locking force up to	Holding force*	Weight
		[N]	[N]	[g]
559090	K01	100	1000	26

Application:

Mechanical zero point clamping system for set-up-time-optimised clamping during non-cutting machining.

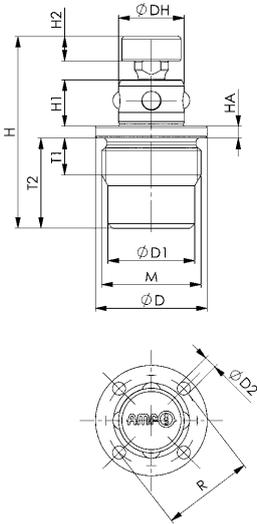

Note:

The mechanical zero-point clamping system is opened by pressing the actuator knob with hand force. Interlock is achieved mechanically via spring force. A tool is not required for this. The base plate serves as the contact surface, into which the clamping module is screwed. An extended actuating pin with a height of 20 mm is available under the order no. 561391. A suitable mounting tool is available under the order no. 559439. Order numbers of the clamping sleeves: 559092 and 559093.

* Please observe the installation instructions.

Clamping module, mechanical

Mechanical opening and closing.
Tempered steel, plasma-nitrided and burnished.
Repetition accuracy < 0.01 mm.

Order no.	Size	Pull-in/locking force up to	Holding force*	Tightening torque	Weight
		[kN]	[kN]	[Nm]	[g]
559678	K10	6	25	30	1064
562354	K20	10	55	30	3330

Application:

Mechanical zero point clamping system for time-optimised clamping during cutting and non-cutting machining. Especially suitable for the modular design of clamping solutions via zero point clamping system.

Note:

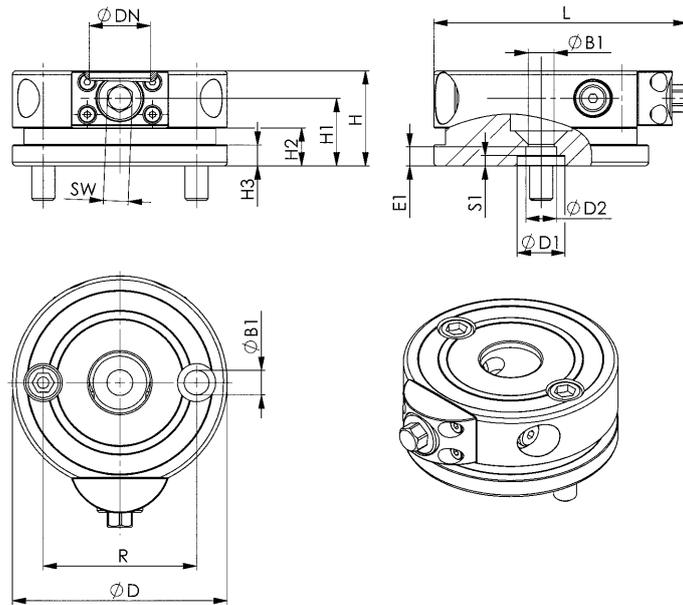

The mechanical assembly clamping module has high holding, pull-in and locking forces. The clamping module can be positioned on the machine table and fastened with standard clamping elements at the circumferential clamping rim. The positioning bore for stop sleeves and a through-hole for fastening onto grid plates with countersunk head screws are present underneath (observe the max. permitted screw force). The mounting bore for the K20 pull-stud is also in the module.

Pull-stud: The K10 and K20 versions of the pull-studs are used with this mechanical clamping module. The zero point, sword or undersize pull-stud can be used, depending on the application.

The fastening bolts are supplied as standard.

This clamping module can be used at ambient temperatures of up to max. 200°C.

* Please observe the installation instructions.

No. 6208IM

Clamping module, mechanical, with indexing

Mechanical opening and closing.
Tempered steel, plasma-nitrided and burnished.
Repetition accuracy < 0.01 mm.

Order no.	Size	Pull-in/locking force up to	Holding force*	Tightening torque	Weight
		[kN]	[kN]	[Nm]	[g]
559680	K10	6	25	30	1031
562355	K20	10	55	30	3295

Application:

Mechanical zero point clamping system with indexing grooves offset by 90° for time-optimised clamping during cutting and non-cutting machining.
Especially suitable for the modular design of clamping solutions via zero point clamping system.

Note:

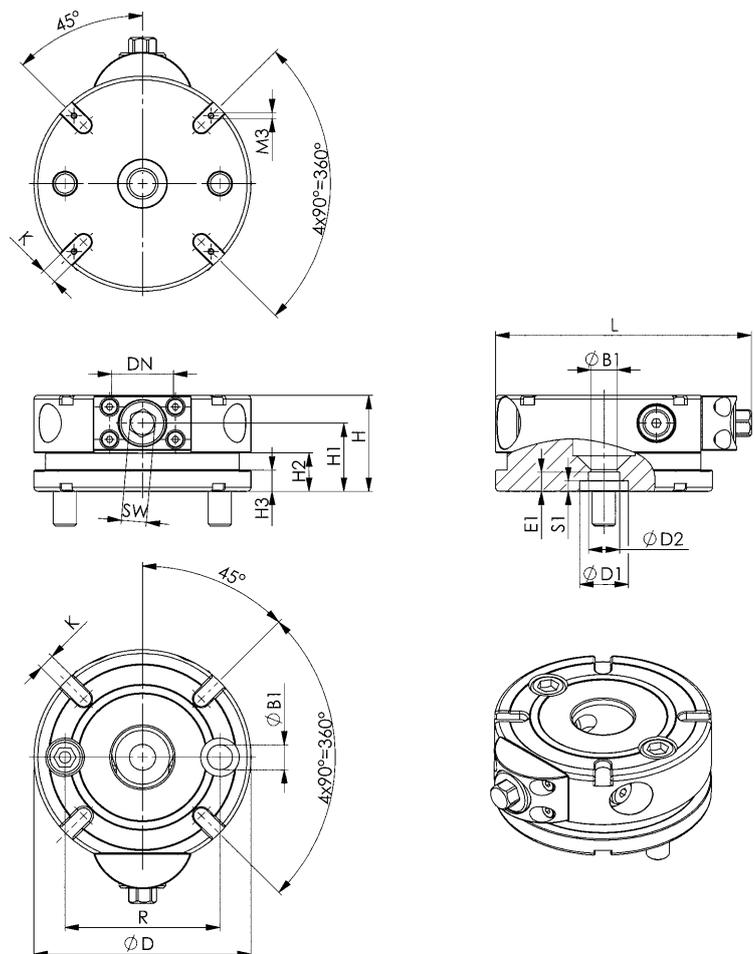

The mechanical assembly clamping module with indexing notches offset by 90° has high holding, pull-in and locking forces.
The clamping module can be positioned on the machine table and fastened with standard clamping elements at the circumferential clamping rim.

The positioning bore for stop sleeves and a through-hole for fastening onto grid plates with countersunk head screws are present underneath (observe the max. permitted screw force). The mounting bore for the K20 pull-stud is also in the module.

Pull-stud: The K10 and K20 versions of the pull-studs are used with this mechanical clamping module. The zero point, sword or undersize pull-stud can be used, depending on the application.

A cylinder pin, as well as fastening bolts for use with the support elements (6210S) or for use on a fixture, are supplied as standard.

This clamping module can be used at ambient temperatures of up to max. 200°C.
* Please observe the installation instructions.

No. 6208MD

Double clamping module, mechanical

Mechanical opening and closing.
Tempered steel, plasma-nitrided and burnished.
Repetition accuracy < 0.01 mm.

Order no.	Size	Pull-in/locking force up to	Holding force*	Tightening torque	Weight
		[kN]	[kN]	[Nm]	[Kg]
559681	K10	6	25	30	1,6
562356	K20	10	55	30	5,1

Application:

Mechanical „double clamping module“ for setting time-optimised clamping during cutting and non-cutting machining. Especially suitable for the modular design of clamping solutions via zero point clamping system.

Note:

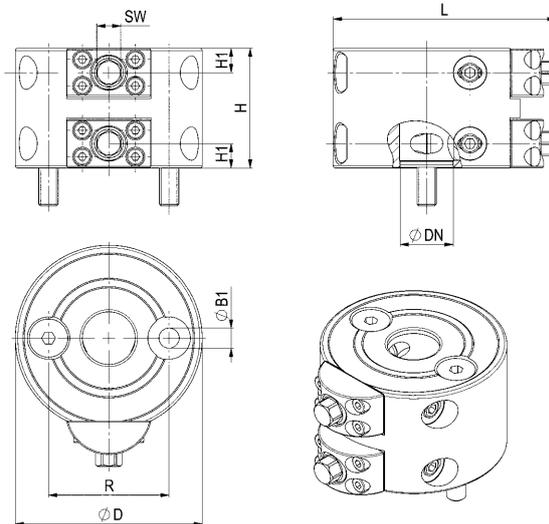

This clamping system combines two separately operable mechanical zero-point clamping systems. In conjunction with the pull-stud for T-slots, this clamping module is simply and quickly fastened to the machine table via clamping slots. Additional height adapters, workpieces or fixtures can be fastened to the top with pull-studs.

Pull-stud: The K10 and K20 versions of the pull-studs are used with this mechanical clamping module. The zero point, sword or undersize pull-stud can be used, depending on the application.

The fastening bolts are supplied as standard.

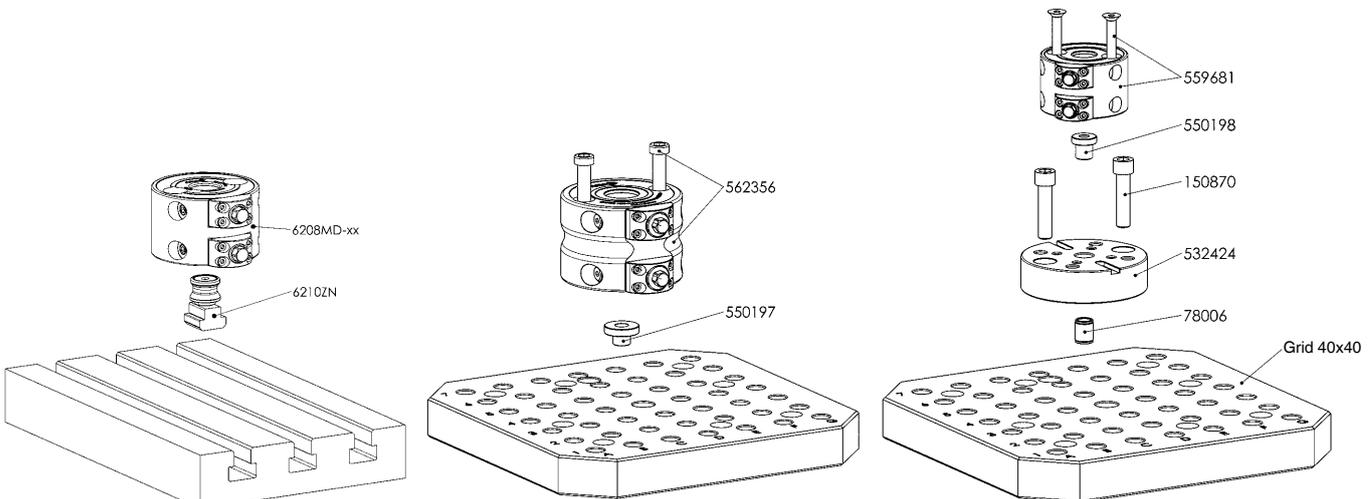

This clamping module can be used at ambient temperatures of up to max. 200°C.

* Please observe the installation instructions.

Dimensions:

No. 6210ZN

Pull-stud for T-slots

Order no.	Size	A	dia. DN	G	H	L	Weight [g]
550438	K10	10	22	M8	16	30	48
550439	K10	12	22	M8	16	35	51
550440	K10	14	22	M8	16	35	54
550441	K20	14	32	M12	23	45	143
550442	K20	16	32	M12	23	45	147
550443	K20	18	32	M12	23	50	157

Application:

The pull-stud for T-slots enables the AMF zero-point clamping system to be positioned and clamped directly to the machine table by means of clamping slots.

These pull-studs can be used for pneumatic, hydraulic and mechanical clamping modules, and also for mechanical double clamping modules.

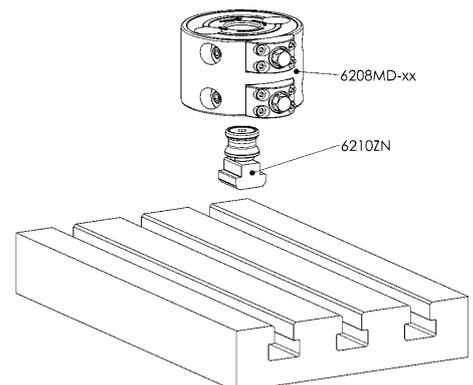

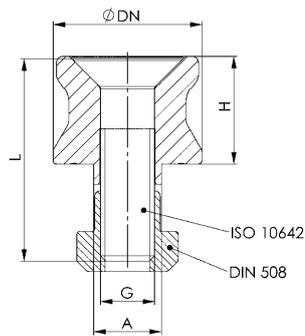

Advantage:

Simple, quick and flexible clamping of workpieces on the machine table with varying clearances of the pull-stud bores.

Note:

Supplied as standard is, as shown:

- zero point pull-studs with slot (dimension A)
- T-nut
- countersunk head screw (strength class 10.9)

Subject to technical alterations.

No. 6212M

Clamping module, mechanical

Open and close mechanically.
Tool steel, hardened.
Repetition accuracy < 0.01 mm.

Order no.	Size	Pull-in/locking force up to	Holding force*	Weight
		[kN]	[kN]	[g]
553405	K10	10	17	360
559094	K20	20	43	1330

Application:

Mechanical zero point clamping system for setting time-optimised clamping during cutting or non-cutting machining. Particularly suitable for the modular design of clamping solutions via zero point clamping system.

Note:

The mechanical zero-point clamping system has high holding, pull-in and locking forces.

The K10 clamping module is fastened centrally with an M8 flat-head screw, the K20 clamping module with an M12 cylinder screw.

The K20 clamping module can only be used with the K20 pull-studs in the M12 version.

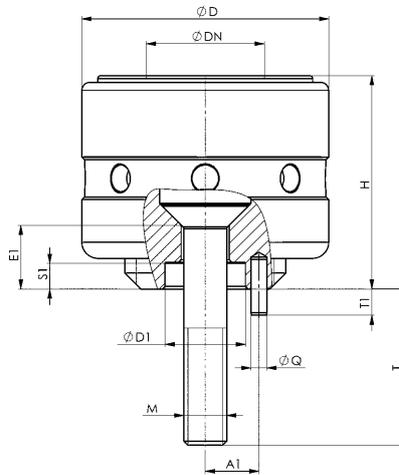

To open and close the clamping modules, we recommend the following AMF hook spanner:

- size K10= order no. 54940

- size K20= order no. 54973

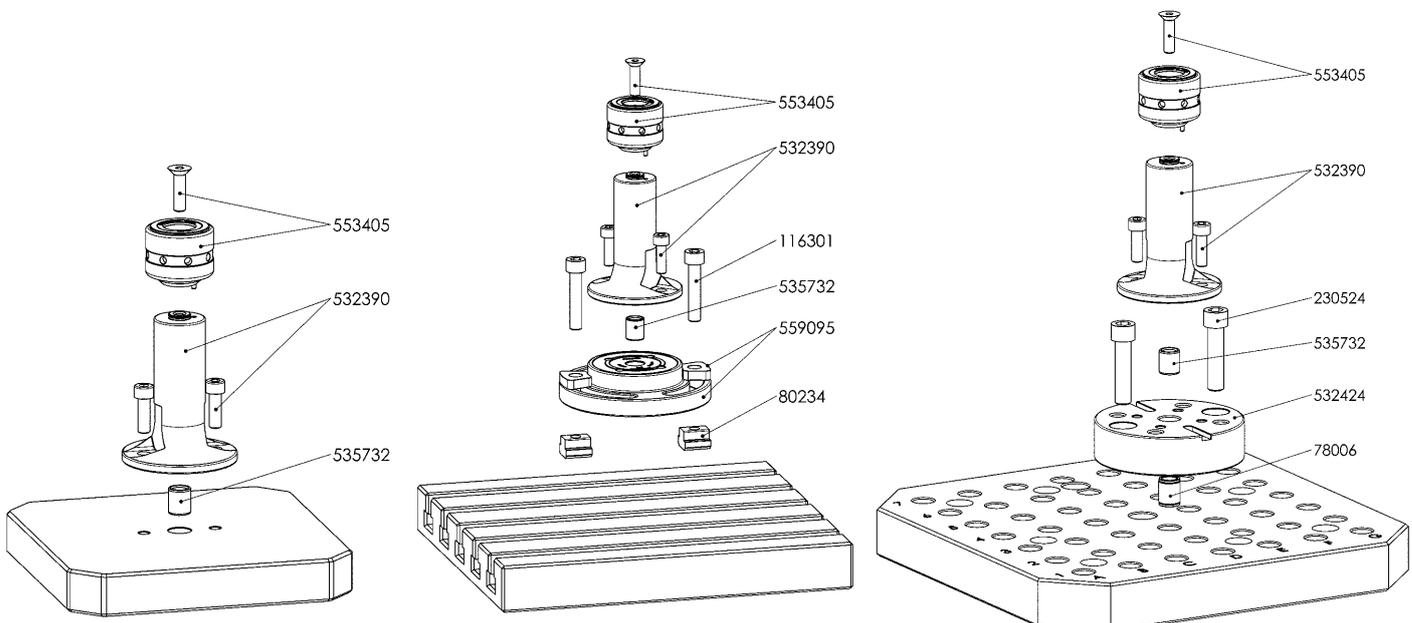

A cylinder pin is supplied as standard. In addition, fastening bolts for use with the support elements (order no. 532390, 532374) and for use on a fixture are included.

* Please observe the installation instructions.

SIMPLY CLEVER COMBINATIONS - MODULAR HEIGHT ADAPTER FOR YOUR FLEXIBLE PRODUCTION

With the new modular height adapters from AMF, your production becomes even more flexible and economical. Cleverly combined, you now have an efficient opportunity to adapt your production process more simply, flexibly and quickly to constantly changing requirements.

ASSEMBLY ELEMENT

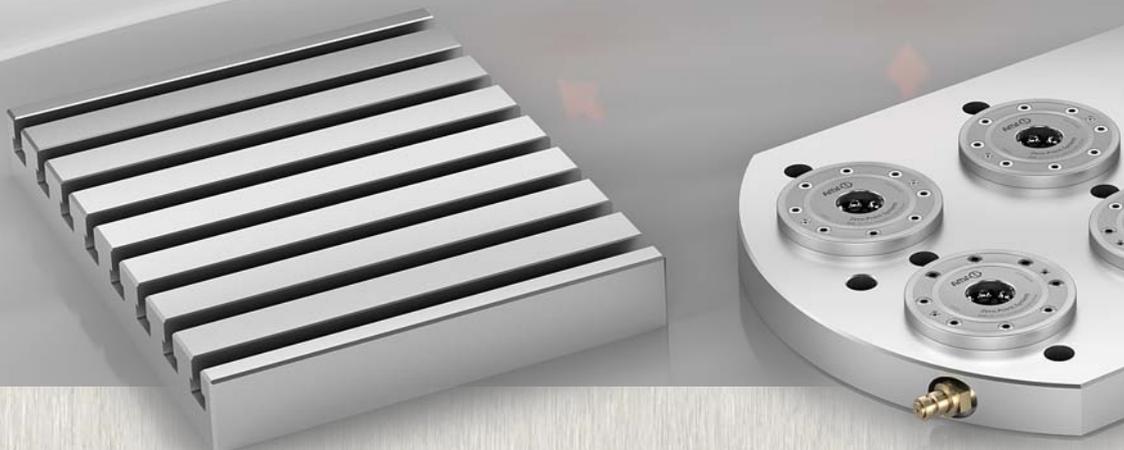

INTERMEDIATE ELEMENTS

FOOT ELEMENTS

BASE ELEMENTS

The modular height adapters consist of three levels. The foot elements form the interface to the existing machine table. Building on this and with the use of intermediate elements, every clamping height can be achieved and, by combining different sizes, adapted flexibly to the contour of the workpiece.

Assembly elements with integrated zero point clamping modules of the AMF Zero Point system complete the adapters. Through this, the workpiece is clamped in a process-reliable way.

THE ADVANTAGES:

- > Simple direct clamping of the workpiece
- > Convenient 5-sided processing
- > Flexibly adaptable to every workpiece size and thickness
- > Freely selectable standard dimension

No. 6210H-10-05

Adapter clamping module K5, hydr. to K10

Housing: tempered steel, gas-nitrided and oxidised.
Clamping module: cover and piston hardened.

Order no.	Size	Pull-in/locking force up to	Holding force*	Weight
		[kN]	[kN]	[g]
534776	K05	5	13	2328

Application:

The adapter element is used to reduce the intermediate element size K10 to the hydraulic clamping module K5. Workpieces or fixtures can be clamped with repetition accuracy directly onto the hydraulic clamping module K5 using pull-studs.

This clamping system can be used to move workpieces to the required machining height in the machine for 5-sided machining, or for the safe and quick clamping of workpieces with ledges and different clamping heights on the machine table.

Advantage:

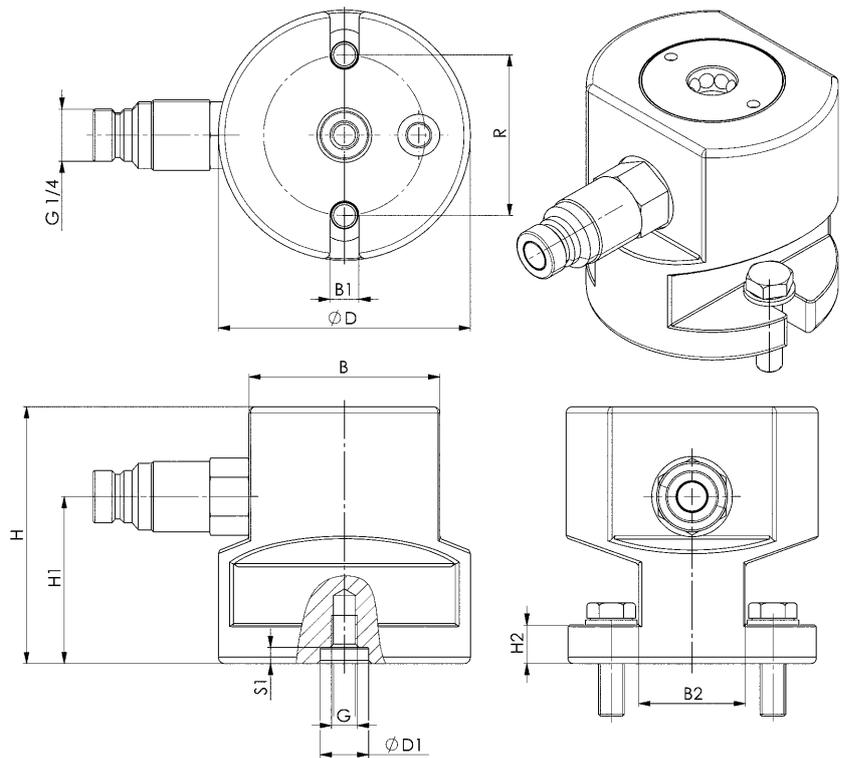

Simple, quick and flexible clamping of complex workpiece contours on the machine table. Especially suitable for levelling workpieces or clamping fixtures at the necessary machine heights in the machine tool and for the reliable clamping of same.

Note:

Order no. for the centering sleeve \varnothing 16 mm: 78006

The hydr. quick-release coupling, connector version, and the fastening screws are supplied as standard.

No. 6210IH-10-05

Adapter clamping module K5, hydr. to K10, with indexing

Housing: tempered steel, gas-nitrided and oxidised.
Clamping module: cover and piston hardened.

Order no.	Size	Pull-in/locking force up to	Holding force*	Weight
		[kN]	[kN]	[g]
534719	K05	5	13	2318

Application:

The adapter element is used to reduce the intermediate element size K10 to the hydraulic clamping module K5. Workpieces or fixtures can be clamped with repetition accuracy directly onto the hydraulic clamping module K5 using pull-studs.

This clamping system can be used to move workpieces to the required machining height in the machine for 5-sided machining, or for the safe and quick clamping of workpieces with ledges and different clamping heights on the machine table.

Thanks to the indexing option, workpieces under large machining forces can be secured to prevent radial distortion.

Advantage:

Simple, quick and flexible clamping of complex workpiece contours on the machine table. Especially suitable for levelling workpieces or clamping fixtures at the necessary machine heights in the machine tool and for the reliable clamping of same.

Collet attachment for clamping module K20, hydr.

Material: high-strength aluminium.

Order no.	dia. D	dia. D1	ØD2 0/+0.01	Clamping stroke Ø [mm]	H	H1	Weight [g]
550286	112	20	25	0,5	50	30	1133

Design:

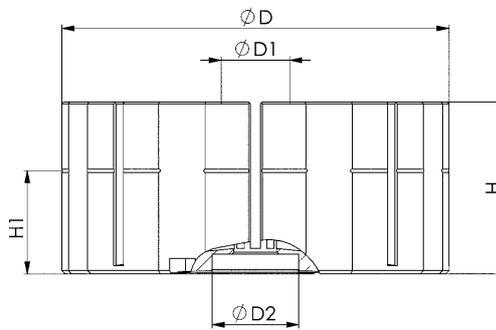

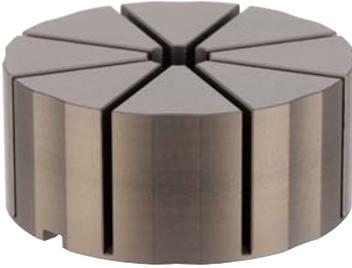

The 112 mm diameter collet attachment is suitable for the hydraulic AMF zero-point clamping system K20 with indexing, order no. 428425. The collet is made from anodised, high-strength aluminium.

Application:

The collet attachment is placed on the AMF Zero Point clamping system K20 in the hydraulic version and guides the radial clamping force to the workpiece after the clamping module is closed.

The workpiece contour is milled into the collet attachment with a minimum clamping depth of 2 mm. The collet attachment can be milled off to a height of H1, allowing new workpiece contours to be introduced.

The maximum workpiece diameter is 100 mm.

CAD

No. 6370ZSB

Mounting kit for collet attachment

for collet No. 6370ZSZ-112

Order no.	Size	Weight [g]
550287	K20	190

Design:

The mounting set includes:

- 1 pull-stud K20, design: strut
- 1 engagement screw K20
- 1 lock nut M12
- 2 indexing slot nuts, width 8 mm

Application:

The mounting set is mounted with the collet attachment 112 mm, order no. 550286.

After installation, the collet attachment can be securely and hydraulically clamped onto the AMF clamping modules, size K20.

CAD

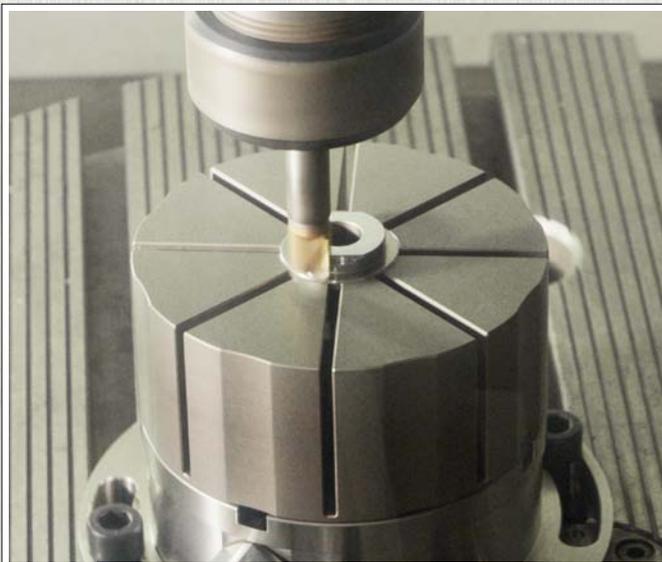

Subject to technical alterations.

550287

Assembly element K20, hydraulic, with indexing
534412

Subject to technical alterations.

No. 6210L

Assembly element K10, K10.3 and K20, pneumatic

Housing: tempered steel, gas-nitrided and oxidised.
Clamping module: cover and piston hardened.

Order no.	Size	Pull-in/locking force up to	Holding force*	Weight
		[kN]	[kN]	[g]
534925	K10	8	25	2720
534537	K10.3	10	25	7708
534842	K20	17	55	7185

Application:

The assembly element is used to clamp with repetition accuracy workpieces or fixtures directly onto the pneumatic clamping modules K10, K10.3 and K20 via pull-studs.
This clamping system can be used to move workpieces to the required machining height in the machine for 5-sided machining, or for the safe and quick clamping of workpieces with ledges and different clamping heights on the machine table.

Advantage:

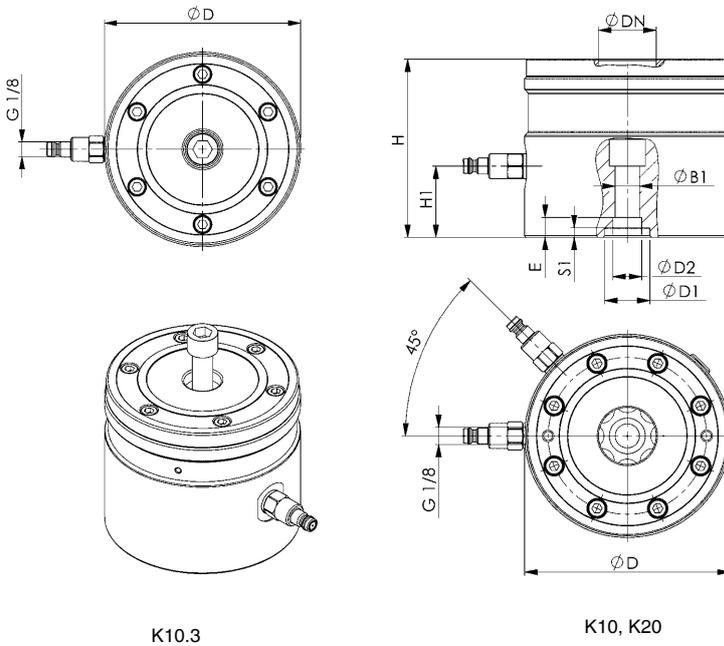

Simple, quick and flexible clamping of complex workpiece contours on the machine table. Especially suitable for levelling workpieces or clamping fixtures at the necessary machine heights in the machine tool and for the reliable clamping of same.

Note:

Order no. for the centering sleeve \varnothing 16 mm: 78006

The pneum. quick-release coupling, connector version, and the fastening screw are supplied as standard.

* Please observe the installation instructions.

534495	K10.3	10	25	7668
534453	K20	17	55	7162

Application:

The assembly element is used to clamp workpieces or fixtures with repetition accuracy directly onto the pneumatic clamping modules K10.3 and K20 using pull-studs.

This clamping system can be used to move workpieces to the required machining height in the machine for 5-sided machining, or for the safe and quick clamping of workpieces with ledges and different clamping heights on the machine table.

Thanks to the quadruple 90° indexing option, workpieces under large machining forces can be secured to prevent radial distortion.

Advantage:

Simple, quick and flexible clamping of complex workpiece contours on the machine table. Especially suitable for levelling workpieces or clamping fixtures at the necessary machine heights in the machine tool and for the reliable clamping of same.

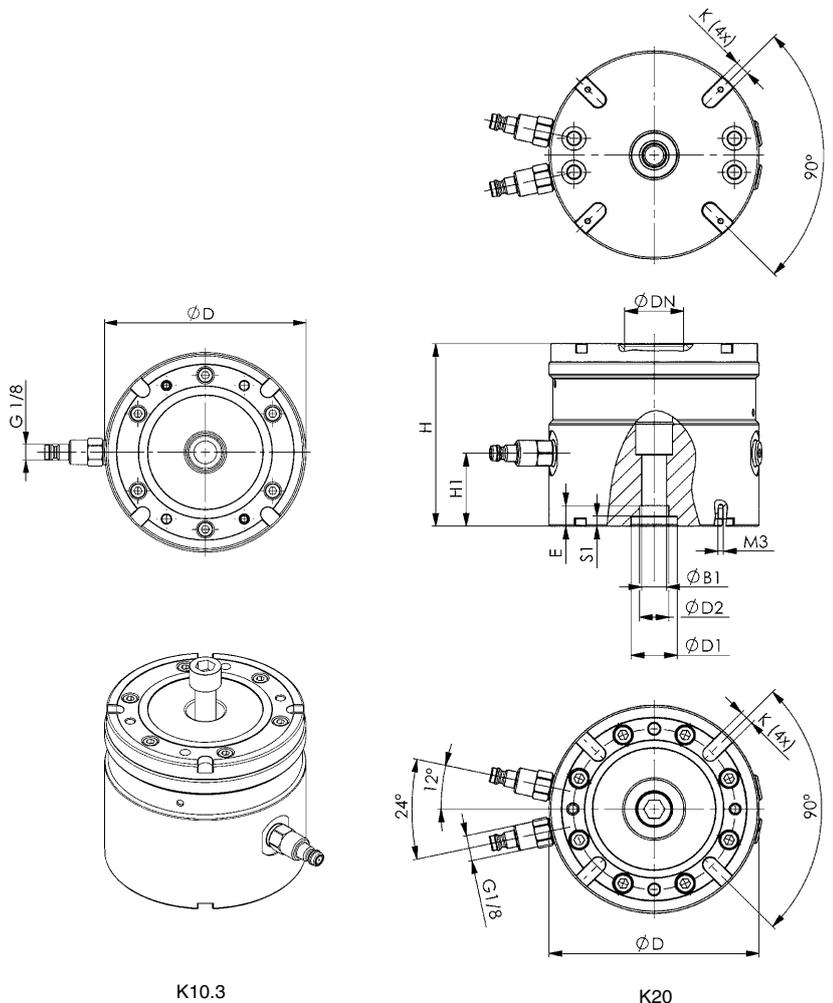

Note:

Order no. for the centering sleeve \varnothing 16 mm: 78006

Support element, adjustable ± 5 mm

Housing: tempered steel, gas-nitrided and oxidised.

Order no.	Size	H ± 0.01	Weight [g]
532416	K10	95-105	974
532432	K20	95-105	2020

Application:

The adjustable support element allows workpieces or fixtures to be received into the bore for the pull-stud, K10 or K20 depending on the version, and clamped to the main or intermediate elements. Thanks to the adjustment and counter option, the support element can be steplessly adapted to the workpiece contour by ± 5 mm.

This clamping system can be used to move workpieces to the required machining height in the machine for 5-sided machining, or for the safe and quick clamping of workpieces with ledges and different clamping heights on the machine table.

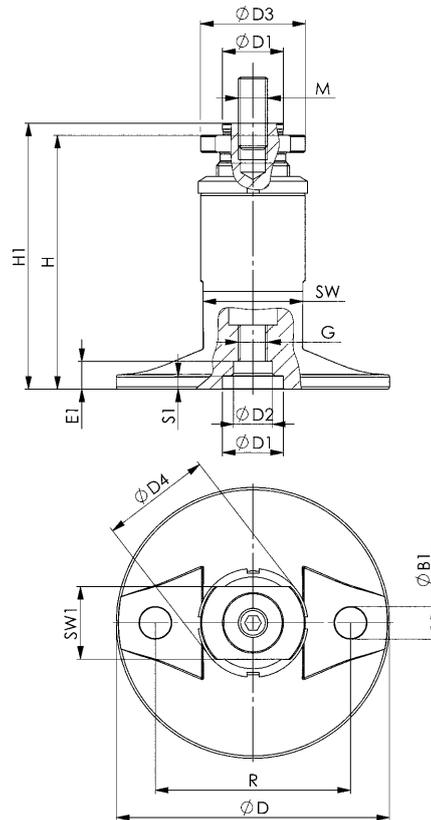

Advantage:

Simple, quick and flexible clamping of complex workpiece contours on the machine table. Especially suitable for levelling workpieces or clamping fixtures at the necessary machine heights in the machine tool and for the reliable clamping of same.

No. 6209MXY

Counterbalance element XY-plane

Mechanical opening and clamping.
Tempered steel, plasma-nitrided.

Order no.	Size	Shear force [kN]	XY counterbalance [mm]	Tightening torque Md max. [Nm]	Weight [Kg]
558905	K10	3	4	30	1300
558906	K20	7	4	40	3400

Application:

The counterbalance element can compensate for a position tolerance of up to 4 mm in the plane. It is used to compensate for distance tolerances of the pull-studs. The upper part can be pushed to the base in the opened condition and is clamped without twisting by actuating the clamping screw.

Advantage:

Simple, quick and flexible clamping on the machine table of complex workpiece contours with large pull-stud distance tolerances.

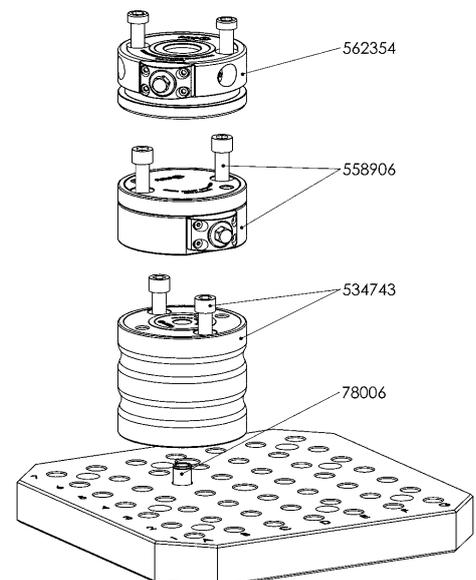

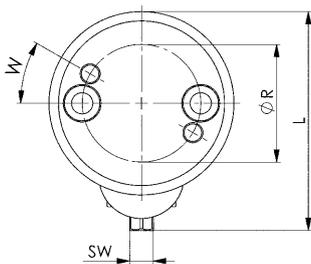

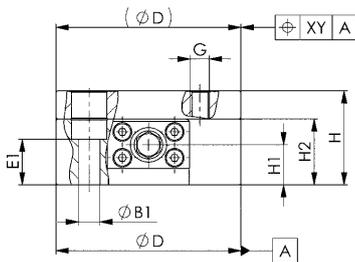

Note:

The fastening bolts are supplied as standard.

		[kN]	[Nm]	[Kg]
554058	K10	12	30	3,5
558903	K20	20	30	6,9

Application:

The height counterbalance element is used to clamp a workpiece distortion-free, beginning with the fourth support point. The element attaches itself by spring force and is then fastened by turning the clamping screw. The height counterbalance element is normally extended.

This element can also be used as a support element to prevent bending and vibration of the workpieces.

Advantage:

Simple, quick and flexible clamping of complex workpiece contours on the machine table. Particularly suitable for levelling workpieces or clamping fixtures at the necessary machine heights in the machine tool for clamping these securely.

Note:

The fastening bolts are supplied as standard.

534727	K20	80	5661
534743	K20	100	7012

Application:

The intermediate elements are used as height adapters for workpieces and clamping fixtures, and are mounted to the main elements. Workpieces are clamped by means of assembly elements. This clamping system can be used to move workpieces to the required machining height in the machine for 5-sided machining, or for the safe and quick clamping of workpieces with ledges and different clamping heights on the machine table.

Advantage:

Simple, quick and flexible clamping of complex workpiece contours on the machine table. Especially suitable for levelling workpieces or clamping fixtures at the necessary machine heights in the machine tool and for the reliable clamping of same.

Note:

For the adaptation to zero point clamping modules, with the exception of the installation heights H20 and 30, the mounting bore for the pull-stud, corresponding to size K10 and K20, is already made in the intermediate element.

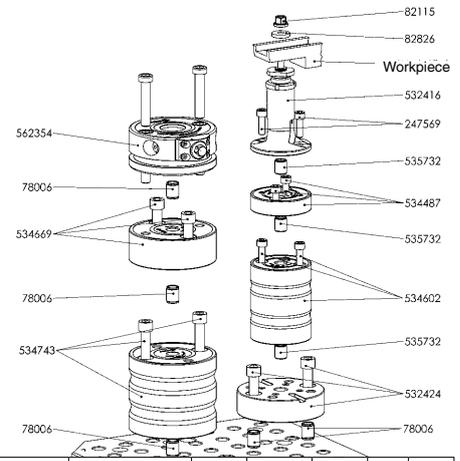

If two or more spacer elements are used, they can be axially aligned and then bolted using centring sleeves. The fastening bolts are supplied as standard.

When fastening to AMF grid plates, pay attention to bolt lengths!

Spring washer for base element, round

Tempered steel, hardened and burnished.

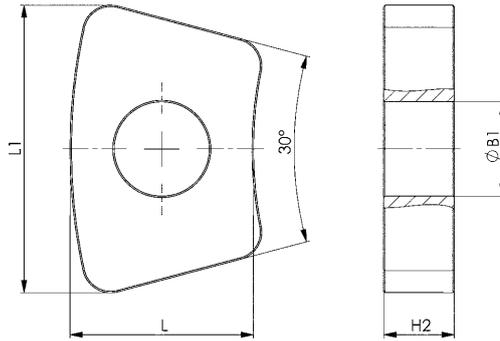

Order no.	Size	dia. B1	H2	L	L1	Weight [g]
559140	K10	11,0	8	22,5	30,5	31
535757	K20	13,5	10	26,0	41,0	62

Application:

The spring washer is used to securely fasten the base element for T-slot plates with cylinder-head screws onto the machine table.

Note:

Order no. 559140 suitable for base element, round order no. 559095,
order no. 535757 suitable for base element, round order no. 559096.

No. 6210A-20-10

Adapter reduction from K20 to K10

Tempered steel, plasma-nitrided and burnished.

Order no.	Size	H ±0.01	Weight [g]
534750	K20 - K10	50	2923

Application:

The adapter element is used to reduce the intermediate element size K20 and K10.3 to size K10. Intermediate elements or assembly elements can be adapted.

This clamping system can be used to move workpieces to the required machining height in the machine for 5-sided machining, or for the safe and quick clamping of workpieces with ledges and different clamping heights on the machine table.

Advantage:

Simple, quick and flexible clamping of complex workpiece contours on the machine table. Especially suitable for levelling workpieces or clamping fixtures at the necessary machine heights in the machine tool and for the reliable clamping of same.

Note:

Order numbers for the centering sleeves:

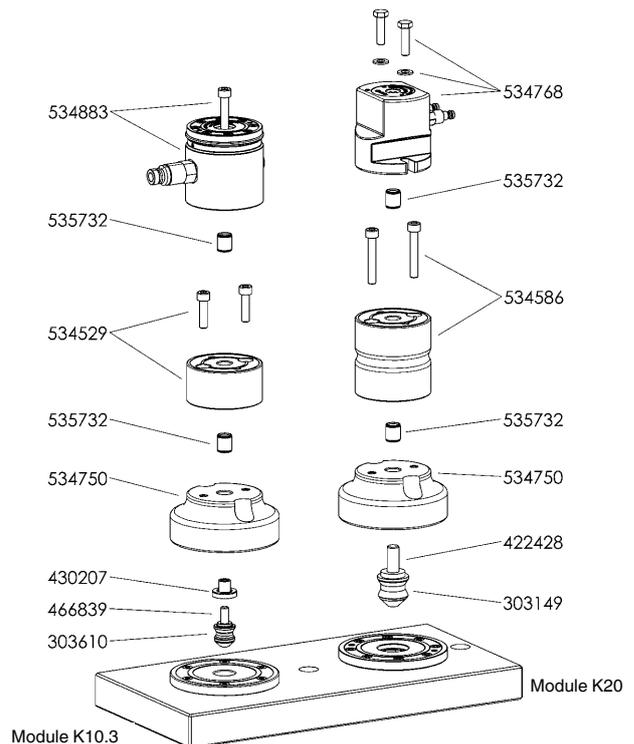

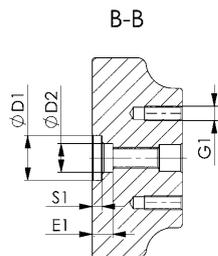

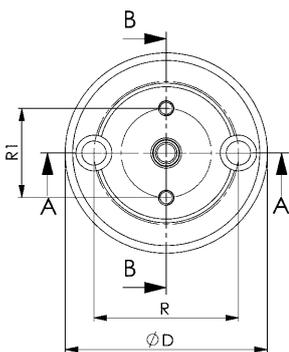

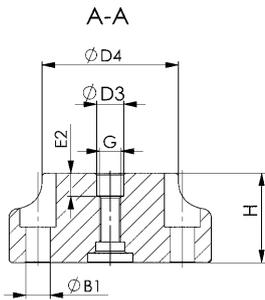

- Ø15: Order no. 535732
- Ø16: Order no. 78006
- Ø22: Order no. 78238

The fastening screws are supplied as standard.

Dimensions:

Order no.	Size	dia. B1	dia. D	dia. D1 0/+0,01	dia. D2 F7	dia. D3	dia. D4	Screw DIN84 or ISO4762	E1	E2	G	G1	R	R1	S1

No. 6210IA-20-10

Adapter reduction from K20 to K10, with indexing

Tempered steel, plasma-nitrided and burnished.

Order no.	Size	H ± 0.01	Weight [g]
532499	K20 - K10	50	2892

Application:

The adapter element with indexing is used to reduce the intermediate element size K20 and K10.3 to size K10. Intermediate elements or assembly elements can be adapted.

This clamping system can be used to move workpieces to the required machining height in the machine for 5-sided machining, or for the safe and quick clamping of workpieces with ledges and different clamping heights on the machine table.

Thanks to the 4-point 90° indexing option, workpieces under strong machining forces can be secured to prevent radial distortion.

Advantage:

Simple, quick and flexible clamping of complex workpiece contours on the machine table. Especially suitable for levelling workpieces or clamping fixtures at the necessary machine heights in the machine tool and for the reliable clamping of same.

Note:

Order numbers for the centering sleeves:

- Ø15: Order no. 535732

- Ø16: Order no. 78006

- Ø22: Order no. 78238

Slot nuts: Order no. 430264.

The fastening screws are supplied as standard.

Dimensions:

Order no.	Size	dia. B1	dia. D	dia. D1 0/+0,01	dia. D2 F7	dia. D3	dia. D4	Screw DIN84 or ISO4762	E1	E2	G	G1	K F6	R	R1	S1

No. 6209MZA

Adapter for height compensation

Tempered steel, plasma-nitrided.

Order no.	Size	H ±0.01	Weight [g]
558052	K10	20	753
558053	K20	30	2306

Application:

Adapter for installation of the height counterbalance element to an intermediate or base element.

Advantage:

Simple, quick and flexible clamping of complex workpiece contours on the machine table. Particularly suitable for levelling workpieces or clamping fixtures at the necessary machine heights in the machine tool for clamping these securely.

Note:

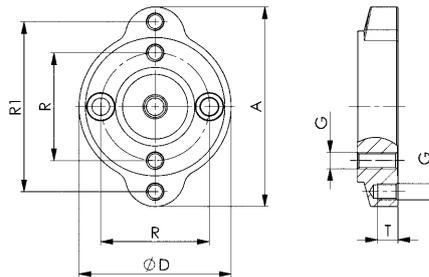

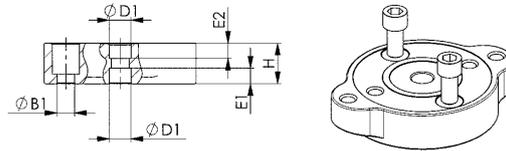

The adapter can be aligned axially on the intermediate or base element using the centring sleeve and then bolted on.

The fastening bolts are supplied as standard.

Order numbers of the centring sleeves:

- size K10: order no. 535732 and 430223

- size K20: order no. 78006

Dimensions:

Order no.	Size	A	dia. B1	dia. D	ØD1 F7	Screw DIN84 or ISO4762	E1	E2	G	R	R1	T

No. 6212MA-20-10

Adapter for clamping module, mechanical

Tempered steel, plasma-nitrided and burnished.

NEW!

Order no.	Size	H ±0.01	Weight [Kg]
561993	K20 - K10	40	1,3

Application:

Adapter for installation of the mechanical clamping module 6212M size K20 (559094) to an intermediate or base element size K10.

Advantage:

Simple, quick and flexible clamping of complex workpiece contours on the machine table. Particularly suitable for levelling workpieces or clamping fixtures at the necessary machining heights in the machine tool and clamping these securely.

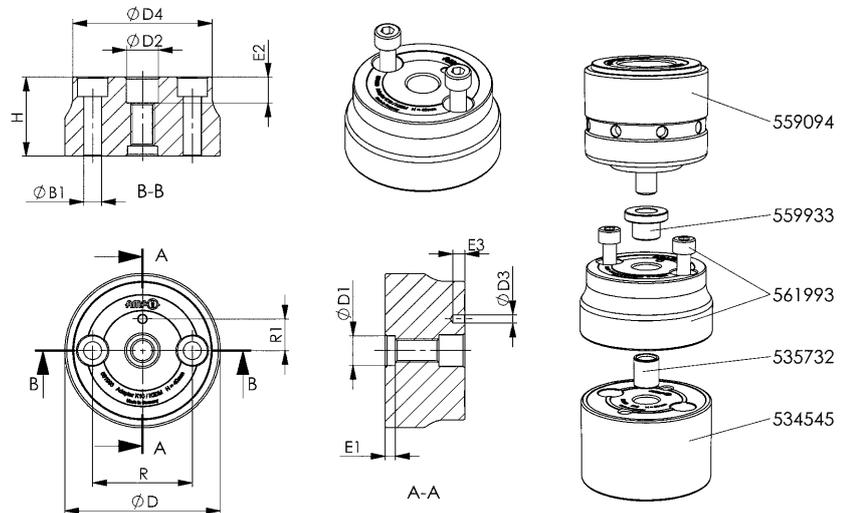

Note:

The adapter can be aligned axially on the intermediate or base element using the centring sleeve and then bolted on.

The fastening bolts are supplied as standard.

Order numbers of the centring sleeves:

- size K10: order no. 535732

Dimensions:

559933	25	16	12,5	16	11	21
550197	32	16	12,5	18	11	36

Application:

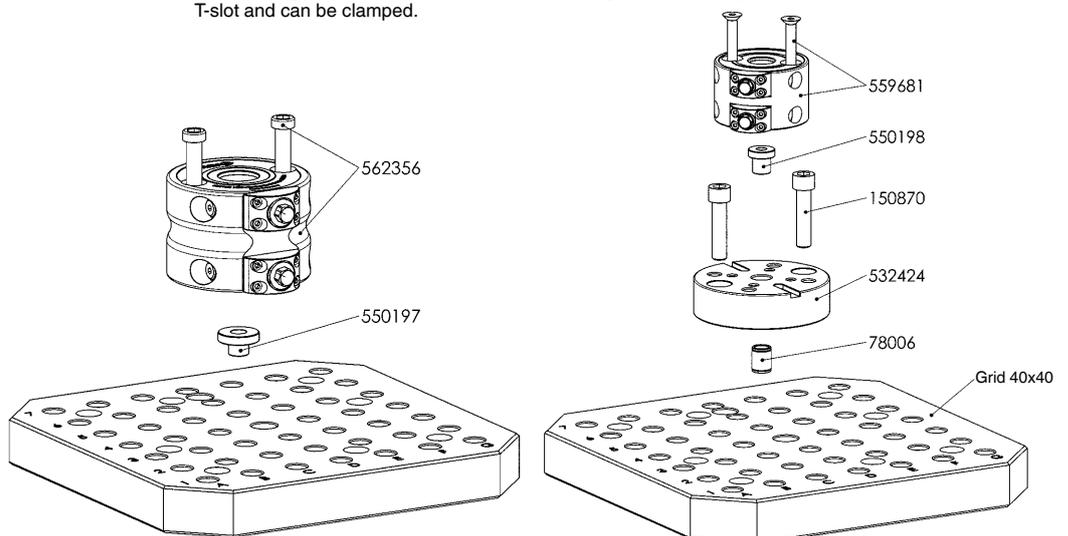

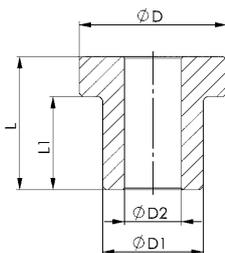

To position the double clamping modules on a clamping plate with clearance holes or a foot element from the „Modular height adapter“ AMF clamping system.

Advantage:

Highly-precise positioning of the double clamping module.

Note:

The centring pin is used when the double clamping module is not yet positioned with a pull-stud for T-slot and can be clamped.

VARIABLE CENTRE DISTANCE - THE SIMPLEST SOLUTION FOR FLEXIBLE MANUFACTURING

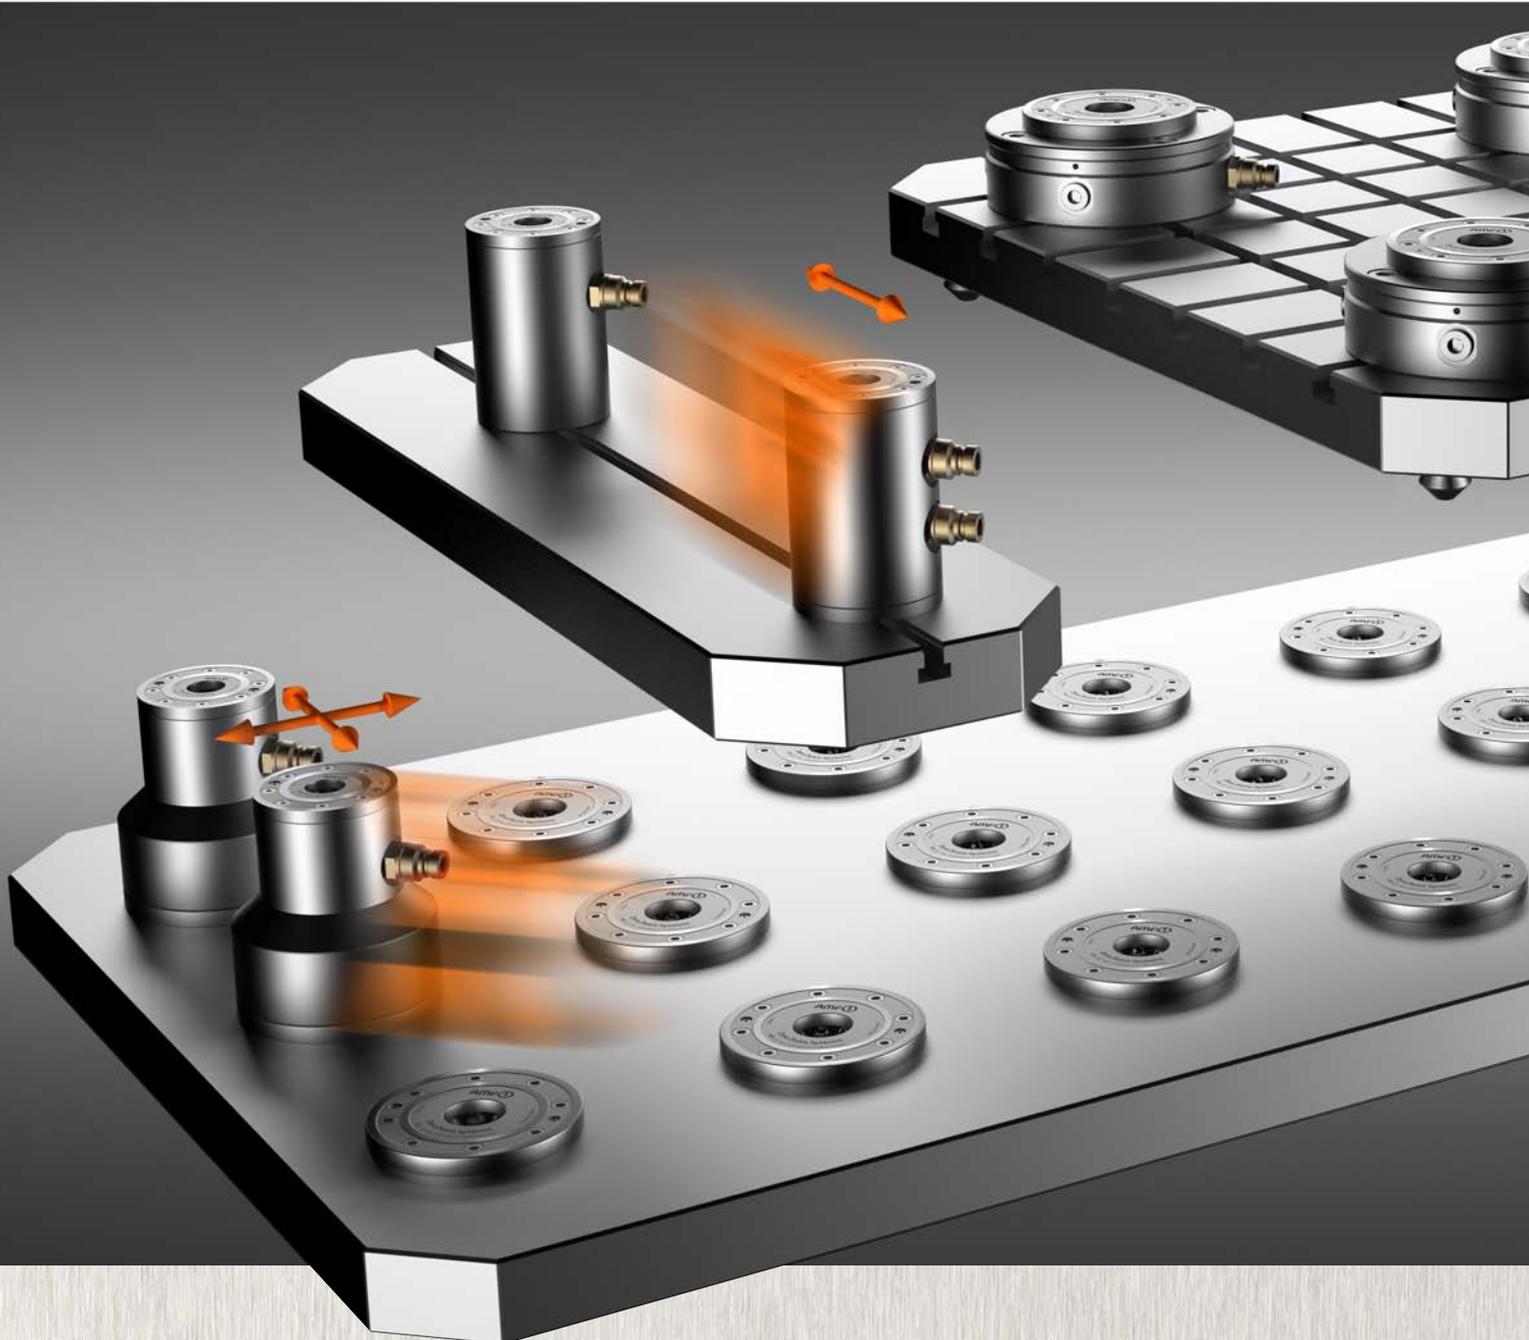

Looking for a simple, flexible and modular clamping solution that satisfies your requirements for a modern, cost-efficient and cost-optimised manufacturing process?

This is guaranteed by the immensely varied AMF zero point clamping system „Zero-Point“.

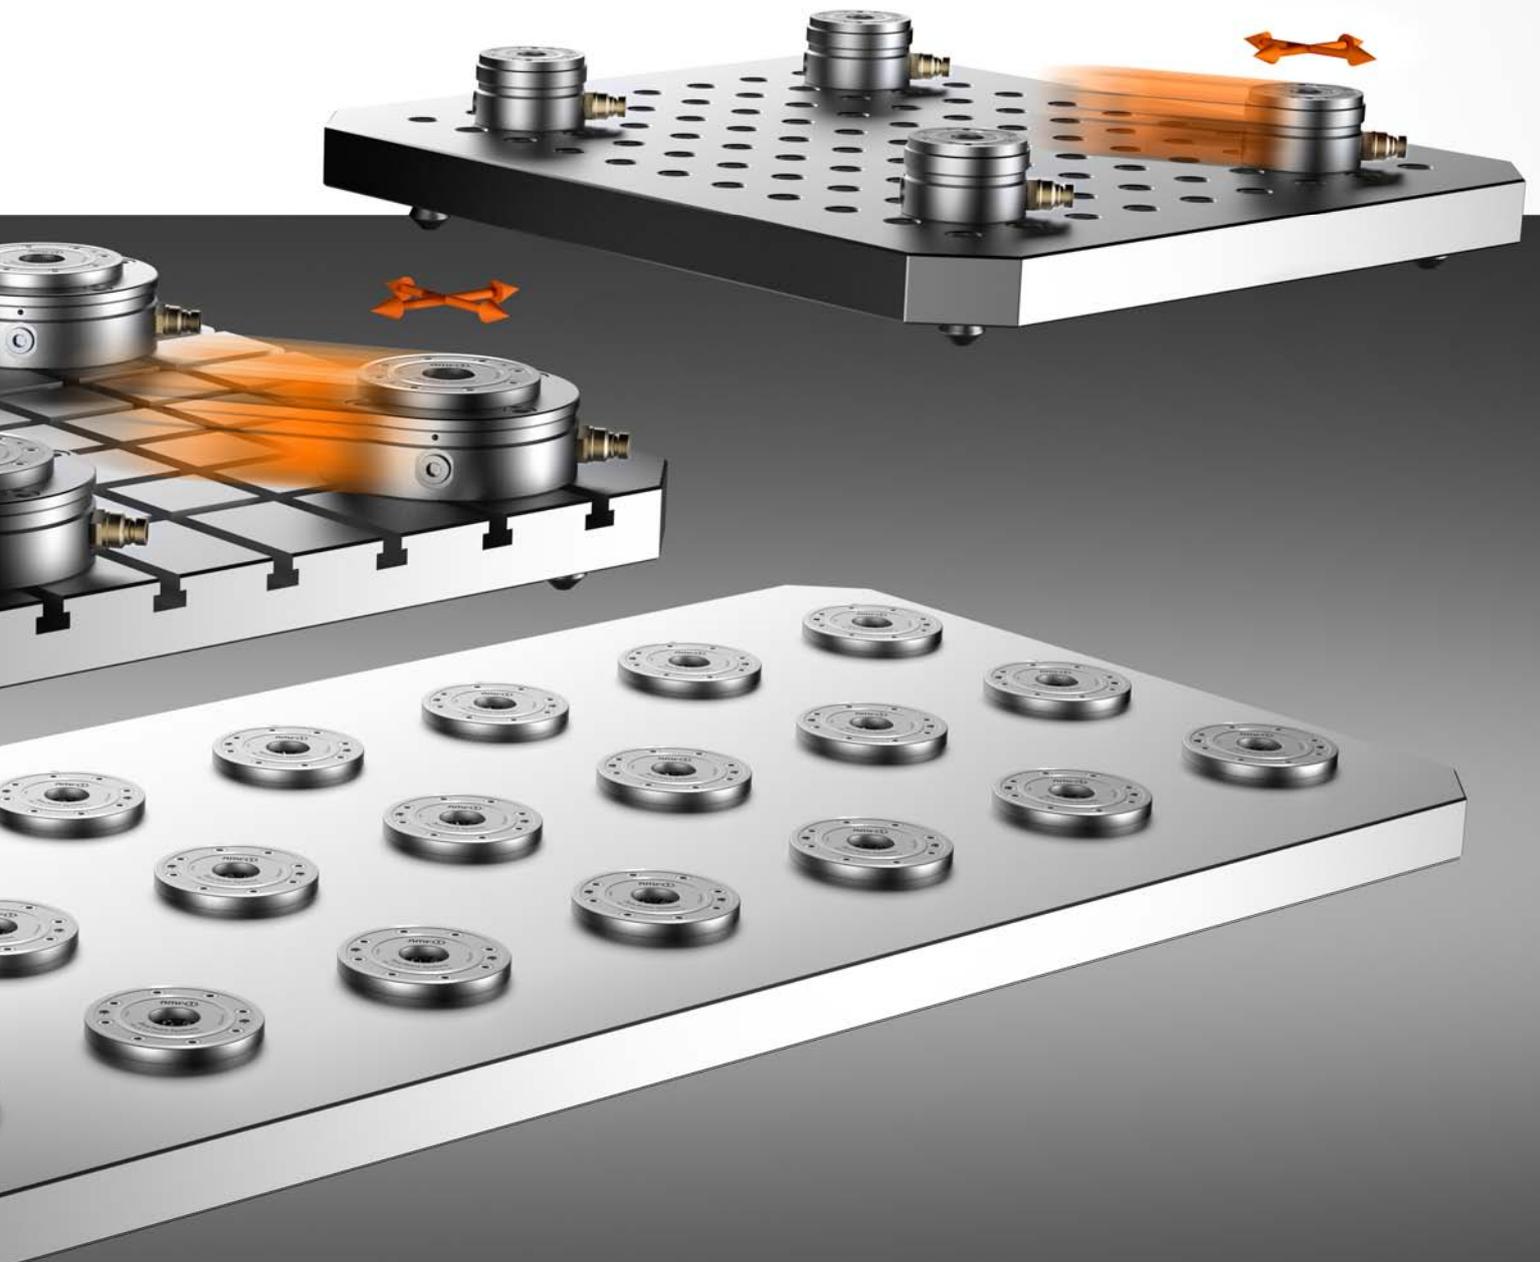

The manufacture of prototypes, small batch series and testing and measuring fixtures used to be a challenging field of application. Flexibility was to some degree limited by a fixed depth gauge.

The variable depth gauge recently developed by AMF has eliminated these boundaries. A simple displacement of the clamping modules enables the depth gauges to be quickly adapted to your specific needs.

This additional flexibility drastically cuts your tooling costs and machine downtimes, not only for medium and large batch series, but also for prototypes and small batch series, as well as test devices.

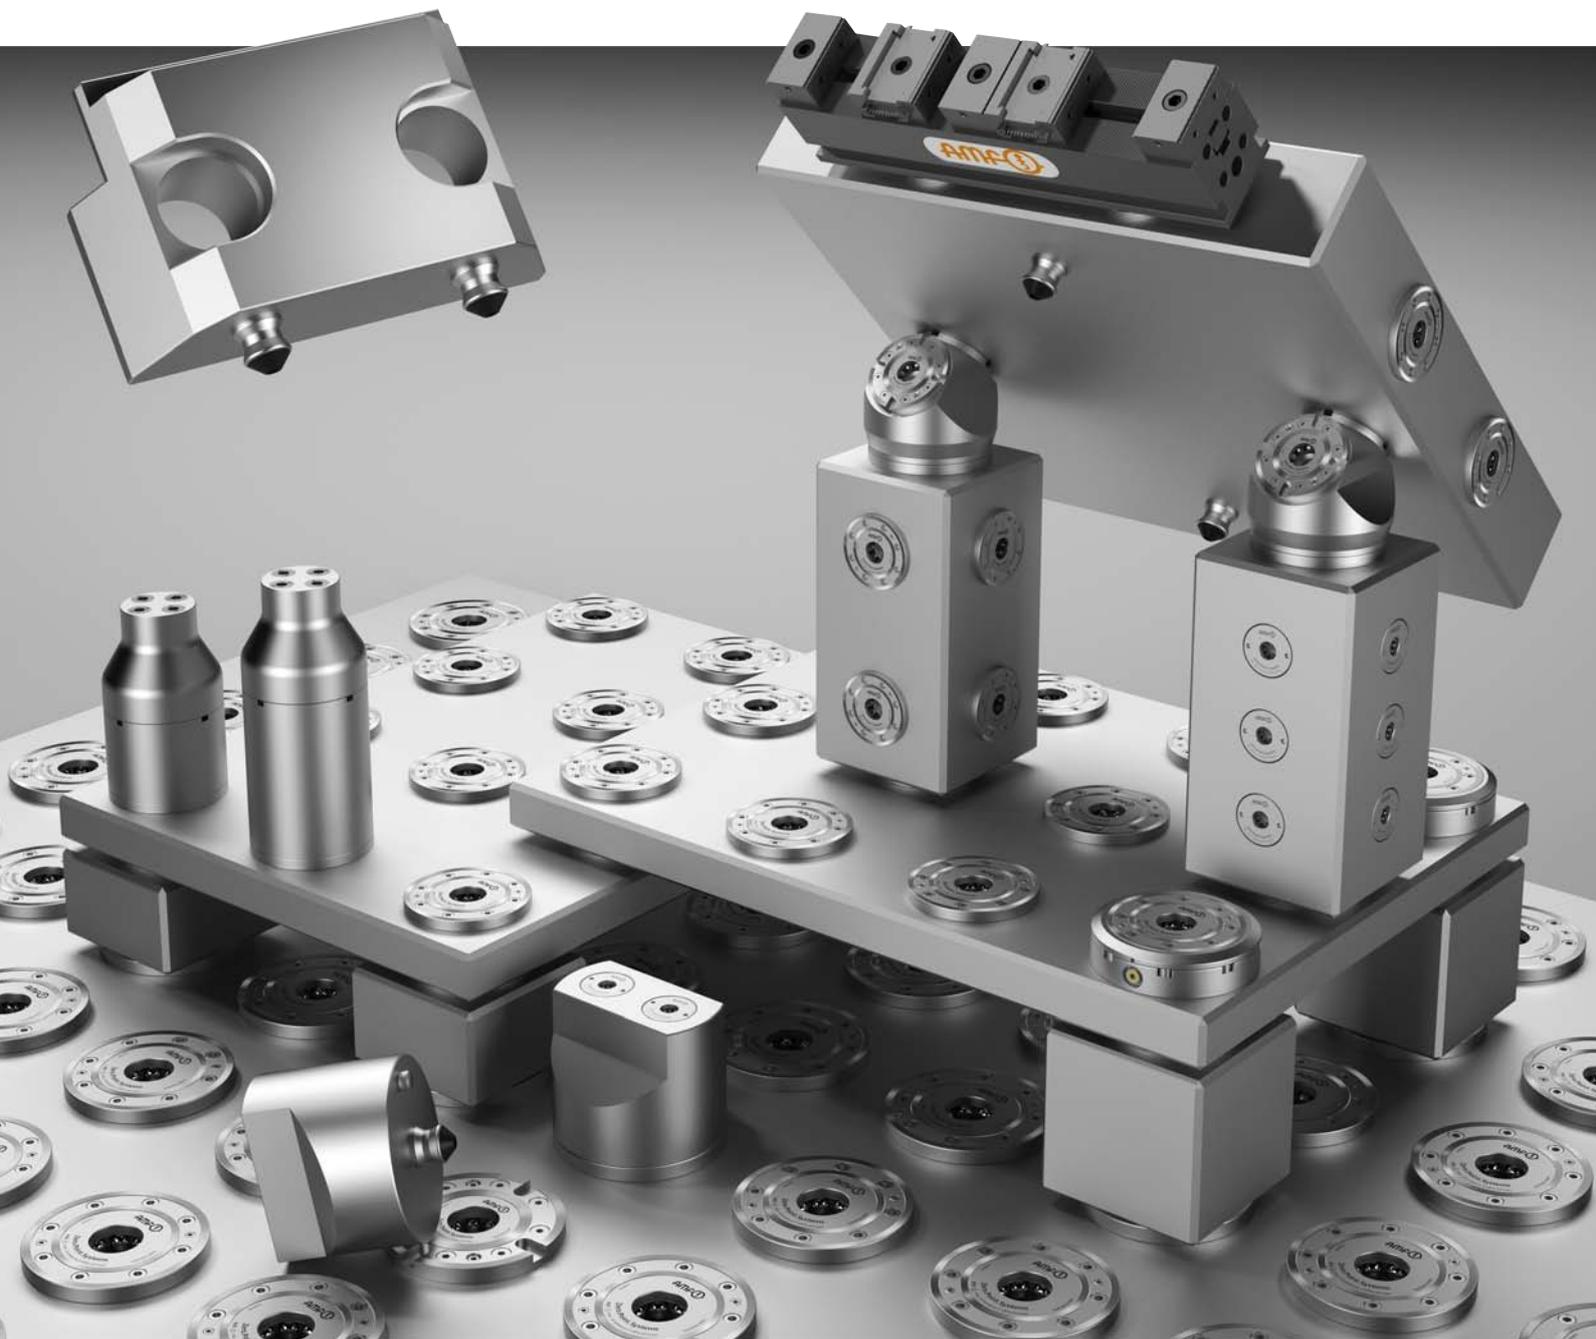

- > Clamping brackets for direct workpiece clamping in simple 5-sided machining
- > Variable depth gauge by easily displacing the clamping modules on a grooved or grid plate
- > Easy to adapt various module sizes to suit the application at hand.
- > Five standard thread sizes for the pull-studs in the workpiece to choose from - M5, M6, M8, M12, M16
- > Use of threaded adapter sleeves enables the pull-studs to be mounted in any size of locating bores in the workpiece.
- > Direct workpiece clamping can be realised by the simplest of means
- > Prototypes, small batch series, test and measuring devices, installation devices can be clamped using the AMF-Zero-Point-System in a manner that fulfills your future needs.

FLEXIBLE SYSTEM - THE ZERO-POINT-SYSTEM ADAPTS PERFECTLY TO YOUR REQUIREMENTS

- > Differing AMF clamping modules from $\varnothing 22$ to $\varnothing 148$ mm can be used in combination.
- > Smallest depth gauges from 23 mm are realised simply, flexibly and quickly.
- > Thanks to the innumerable possible combinations between differently sized clamping modules and pull studs, direct workpiece clamping is straightforward and specific.

No. 6203S4L-001

4-point clamping station

Main body: Aluminium, anodised.
Repeat accuracy < 0.02 mm.

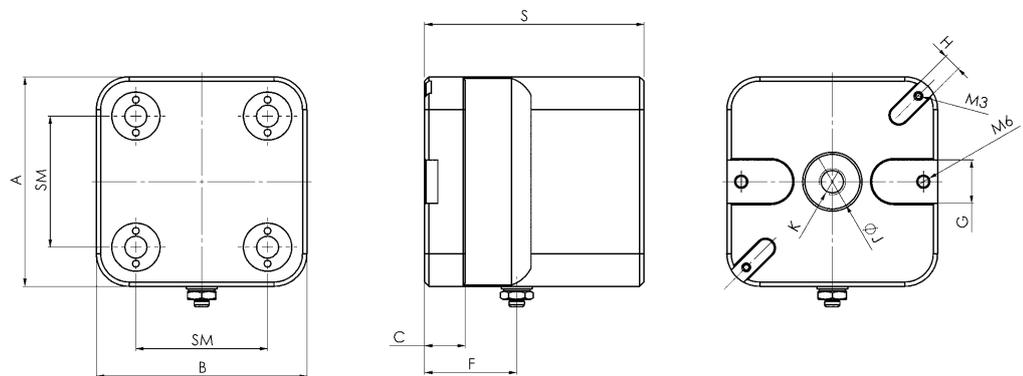

Order no.	Size	Pull-in/locking force up to	Holding force*	Weight
		[N]	[N]	[g]
533034	K02	4 x 235	4 x 6000	2400

Design:

Pneumatic 4-point clamping station with air gun valve for quick opening and closing via air gun. The clamping station has two clamping slots on the side for fastening to the machine table. In addition, positioning slots for aligning on the machine table are made on the underside. The holder for a pull-stud is also provided in the K20 version.

Note:

* Please observe the installation instructions.

Dimensions:

Order no.	Size	A	B	C	F	G	H	dia. J	K	S	SM
533034	K02	96	96	15	42	20	8	25	M12	100	60

No. 6203PS4-001

Interchangeable pallet

High-strength aluminium, anodised.

Order no.	Size	A	B	S	SM	Weight [g]
533059	K02	98	98	20	60	530

Design:

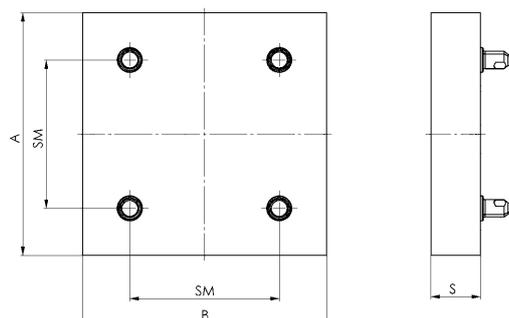

Interchangeable pallet for 4-point clamping station K02 with 4 pull-studs.

Note:

On request, we can incorporate mounting holes according to your specifications in the change pallet.

On request:

Other dimensions, pitch spacings and number of equipped pull-studs.

REPRESENTS GOOD VALUE FROM THE GROUND UP

- THE K10.2 CLAMPING MODULE

Zero-point clamping does not have to be expensive. With the K10.2 clamping module we offer you the best technology at a favourable price.

The advantages speak for themselves:

- > Outstanding price-performance ratio
- > Drastically reduced tooling time
- > Immediate improvement of productivity
- > Repeat accuracy < 5µm
- > Stainless steel
- > Form fit
- > Fitting depth of only 22 mm!

**6 COMPONENTS FOR PERFECT CLAMPING -
5 BAR COMPRESSED AIR FOR OPENING WITH
THE AIR HYDRAULIC PUMP**

- 1** Absolutely insensitive to lateral and pull forces that arise. Precision ground support surfaces made of hardened stainless steel for plane-parallel clamping ≤ 0.005 mm.
- 2** Hardened piston - the combination of form fit and self-locking results in reliable and constant clamping.
- 3** Precision balls for optimal power transmission as well as vibration-inhibiting and wear-resistant use.
- 4** Ball support made of stainless steel seals the clamping module against dirt and liquids.
- 5** Robust plate springs for maximum pull-in, closing and holding forces.
- 6** Module floor with integrated air jet function.
- A** The low installation depth of the clamping modules of 22 mm permits a height of the base plate of only 28 mm (without blow out, only 24 mm).

No. 6204S2HA-001

2-point clamping station

Hydraulic unlocking.
Pneumatic blow-out.
Opening operating pressure: min. 50 bar - max. 60 bar.
Clamping modules' contact surface: Steel, stainless and hardened.
Base plate: Steel, unhardened.
Repetition accuracy < 0.005 mm.

Order no.	Size	Pull-in/locking force up to [kN]	Holding force* [kN]	Blow out	Weight [Kg]
427484	K10.2	2 x 10	2 x 25	●	14

Design:

Hydraulic clamping station for optimised clamping times on machine tables with distance between slots of 63, 100 and 125 mm. Clamping is with M12 socket head screws. At least two fitting holes are attached for alignment.

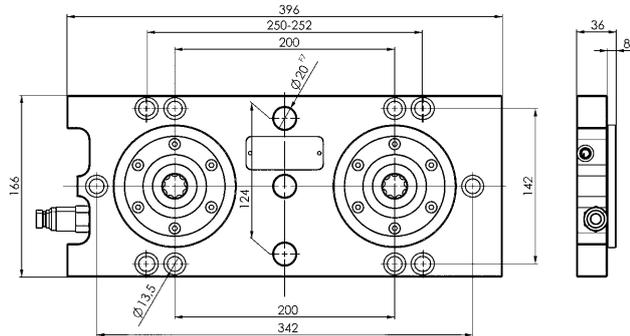

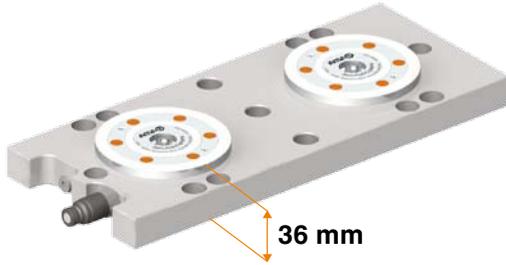

The insertion dimension of the clamping modules is 200 mm. The quick coupling plug is pre-mounted, and the integrated blow-out function can be individually connected.

Advantage:

Low overall height of only 36 mm.

Note:

* Please observe the installation instructions.

427849	K10.2	2 x 10	2 x 25	●	240	81

Design:

Hydraulic clamping bracket for set-up-time-optimised clamping on K10.2 clamping stations. Pull-studs installed underneath.
 The quick-coupling plug is pre-mounted, and the integrated blow-out function can be individually connected.

Note:

* Please observe the installation instructions.

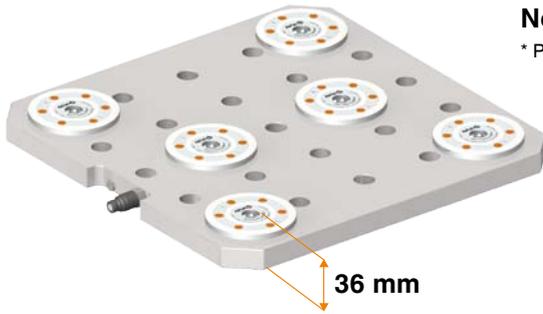

Subject to technical alterations.

No. 6204S6HA-008

6-point clamping station

Hydraulic unlocking.
Pneumatic blow-out.
Clamping modules' contact surface: Steel, stainless and hardened.
Base plate: Steel, unhardened.
Repetition accuracy < 0.005 mm.

Order no.	Size	Pull-in/locking force up to [kN]	Holding force* [kN]	Blow out	Weight [Kg]
427625	K10.2	6x10	6x25	●	55

Design:

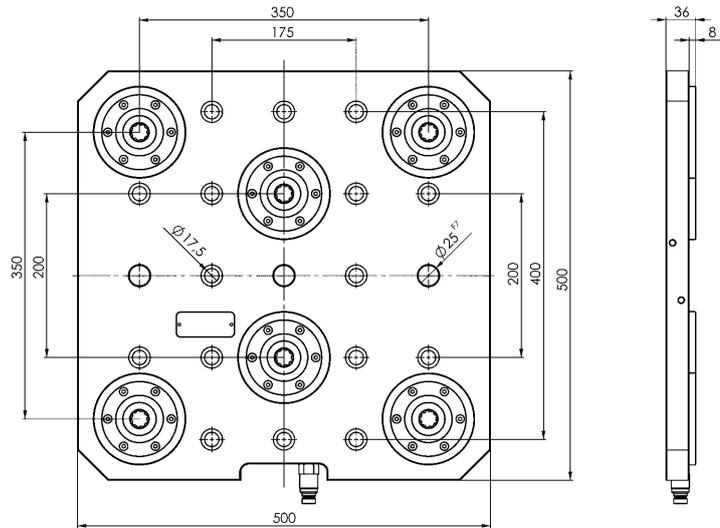

Hydraulic clamping station for optimised clamping times on machine tables with distance between slots of 100 mm. Clamping is with M16 socket head screws. At least two fitting holes are attached for alignment.
The quick coupling plug is pre-mounted, and the integrated blow-out function can be individually connected.

Advantage:

Low overall height of only 36 mm.

Note:

* Please observe the installation instructions.

No. 6204WU12HA-001

12-point clamping cube

Hydraulic unlocking.
Pneumatic blow-out.
Clamping modules' contact surface: Steel, stainless and hardened.
Base plate: Steel, unhardened.
Repetition accuracy < 0.005 mm.

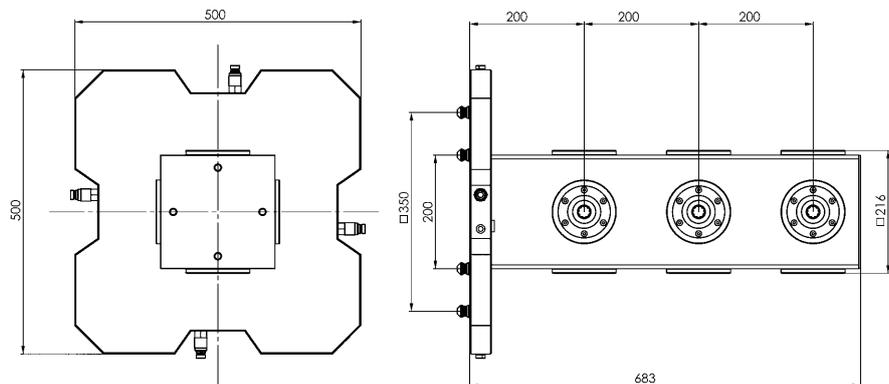

Order no.	Size	Pull-in/locking force up to [kN]	Holding force* [kN]	Blow out	Weight [Kg]
427641	K10.2	12x10	12x25	●	210

Design:

Hydraulic clamping cube for set-up-time-optimised clamping on clamping station 6204S6HA-008. Fastening is with pull-studs installed underneath.
The pitch spacing of the clamping modules is 200 mm. The quick-coupling plug is pre-mounted, and the integrated blow-out function can be individually connected.

Note:

* Please observe the installation instructions.

No. 6206S2L

2-point clamping station

Pneumatic unlocking.
 Opening operating pressure:
 K10.3 min. 5 bar.
 K20.3 min. 4.5 bar.
 Steel, unhardened.
 Repeat accuracy < 0.005 mm.

Order no.	Size	Pull-in/locking force up to	Holding force*	Weight
		[kN]	[kN]	[Kg]
550249	K10.3	2 x 10	2 x 25	13
550254	K20.3	2 x 17	2 x 55	24

Design:

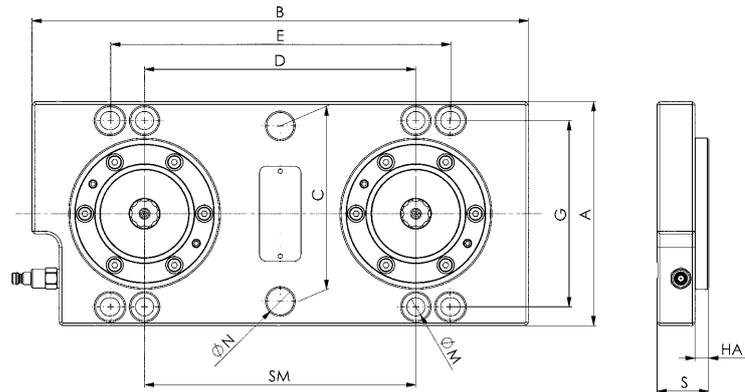

Pneumatic clamping station for setting time-optimised clamping on machine tables with groove spacing of 63, 100 and 125 mm. Fastening is via M12 socket head screws. At least two fitting bores are attached for alignment.
 The insertion dimension of the clamping modules is 200 mm.
 The pneumatic quick-coupler is premounted.

Advantage:

- Low overall height

Note:

* Please observe the installation instructions.

Dimensions:

Order no.	Size	A	B	C	D	E	G	HA	dia. N	dia. M	S	SM

No. 6211S4-20LA-03

4-point clamping station

K20: hydraulic unlocking.
 K20.3: pneumatic unlocking.
 Pneumatic blow-out.
 repetition accuracy < 0.005 mm.

Size	Pneumatic	Hydraulic	Speed max. [1/min]
K20	-	●	2200
K20.3	●	-	2200

Application:

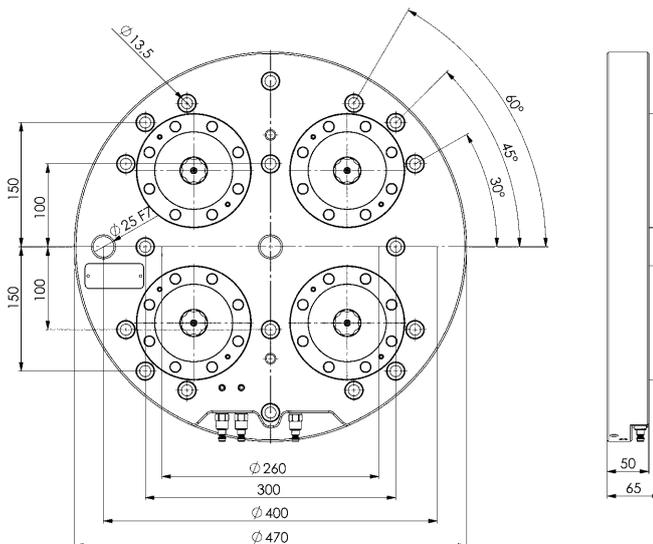

Pneumatic or hydraulic clamping station for setting time-optimised clamping for milling-turning machining.

Note:

Fastening to the machine table is via socket head screws.

On request:

Further dimensions, different pitch circles and number of modules.

CAD

No. 6211P-20S4-03

Fixture plate

Steel, unhardened, suitable for 4-point clamping station

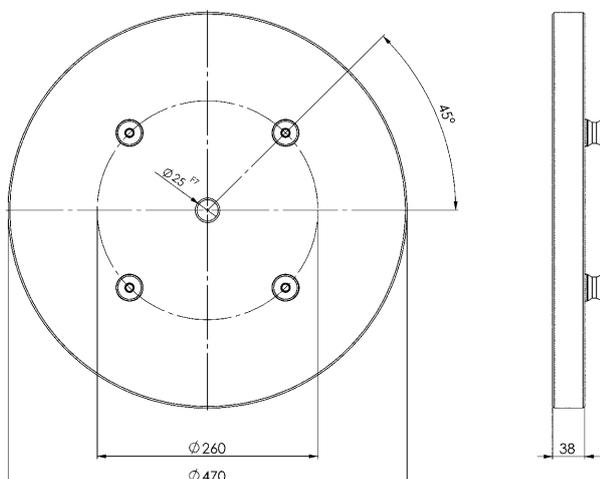

Size	Pneumatic	Hydraulic
K20	-	●
K20.3	●	-

Note:

The interchangeable pallet is designed for milling-turning machining and is suitable for clamping stations with 4 clamping modules K20 and K20.3, which are arranged on the 260 mm pitch circle.

On request:

Additional dimensions, different pitch circles and number of pull-studs.

CAD

Subject to technical alterations.

OUR ZERO-POINT SYSTEM FOR YOUR MILLING-TURNING MACHINING - QUICK, PRECISE, DURABLE, SIMPLY CONVINCING!

The benefits to you at a glance:

- > Connection for opening the clamping station via the media duct in the machine table or a side connection for manual actuation.
- > Opening pressure for unlocking the clamping modules just 4.5 bar.
- > Only one pneumatic connection required to open the clamping modules.
- > Locking via the self-locking and positive fit mechanism of the clamping modules.
- > Cylindrical clamping nipple mount - hence high precision and durability.

No. 6370S2-001

2-point clamping station

Hydraulic unlocking.
 Opening operating pressure: min. 50 bar - max. 60 bar.
 Clamping modules' contact surface: Steel, stainless and hardened.
 Base plate: Steel, unhardened.
 Repetition accuracy < 0.005 mm.

Subject to technical alterations.

No. 6370P6

Fixture plate

Aluminium, suitable for sextuple clamping station.

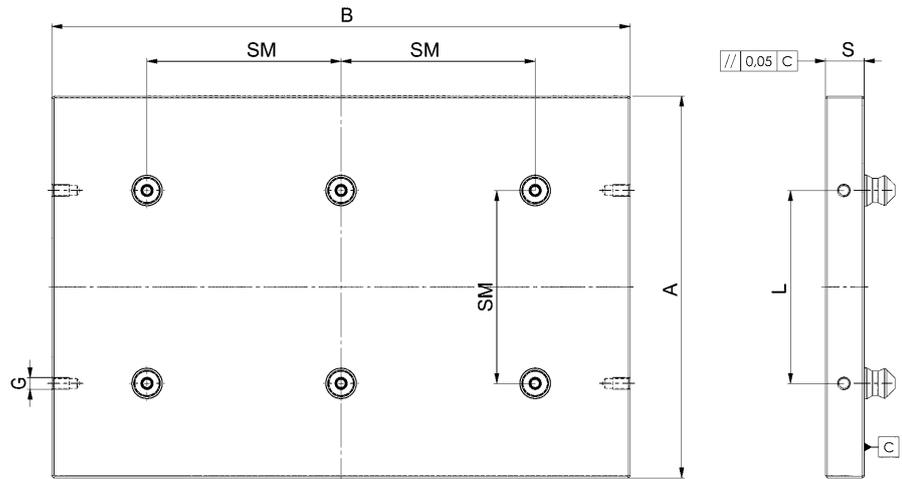

Order no.	Size	A	B	G	L	S	SM	Weight [Kg]
426775	K10	240	386	M10	120	30	100	7,5
426791	K20	396	596	M12	200	40	200	25,0
426817	K40	546	866	M12	320	45	320	56,0

Note:

On request, we can incorporate mounting holes according to your specifications in the change pallet.

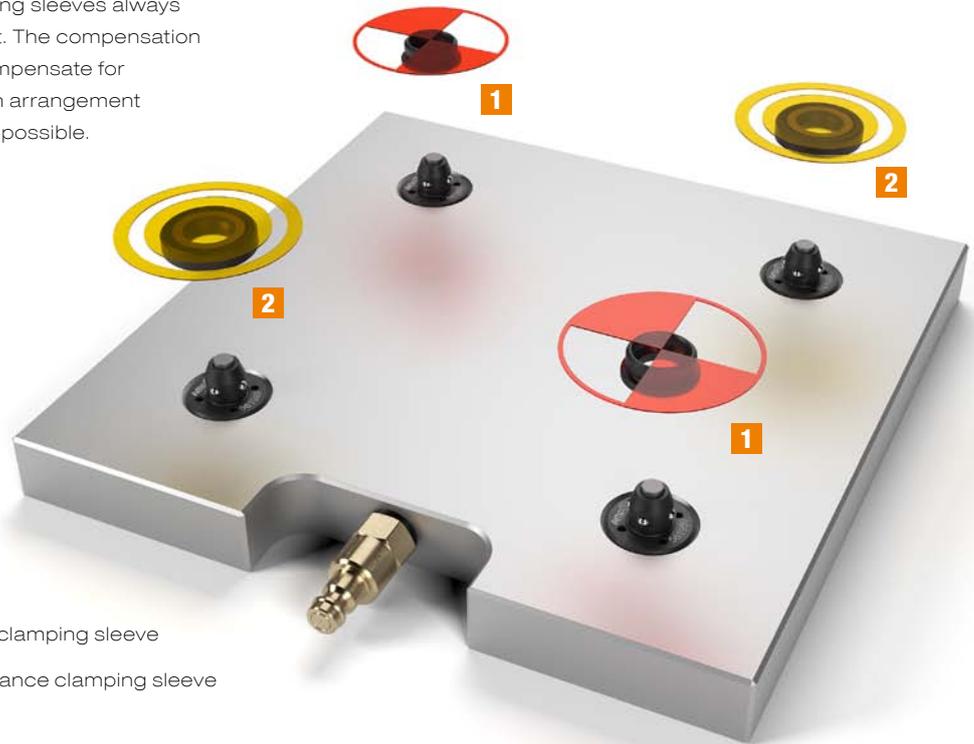

On request:

Other dimensions, pitch spacings and number of equipped pull-studs.

CLASSIC CLAMPING SLEEVE ARRANGEMENT

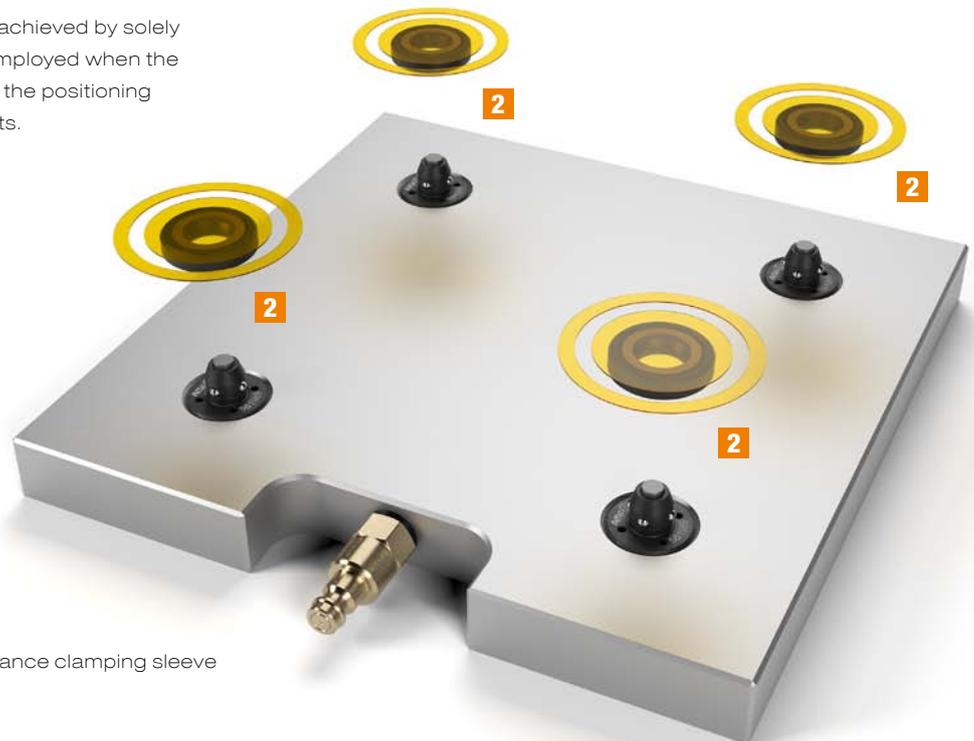

This arrangement with two zero-point clamping sleeves always optimally positions the interchangeable pallet. The compensation pull-studs can be moved radially and can compensate for larger distance tolerances in all directions. An arrangement solely with zero-point adapter sleeves is also possible.

- 1** Zero-point clamping sleeve
- 2** Counterbalance clamping sleeve

OPTIONAL CLAMPING SLEEVE ARRANGEMENT

The greatest possible compensation can be achieved by solely arranging compensation pull-studs. This is employed when the repetition accuracy only plays a minor role or the positioning is carried out by additional alignment elements.

- 2** Counterbalance clamping sleeve

No. 6214ZN-01-01

Zero-point clamping sleeve

Hardened.

Order no.	dia. D	dia. D2	ØDH	H	HA	M	R	Weight [g]
559092	18	2,1	10,7	7	1,95	M16 x 1	14,75	6

Application:

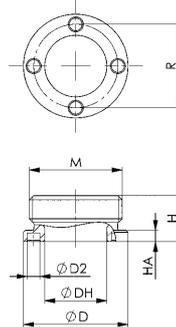

Zero point clamping sleeve suitable for pneumatic clamping module 6215P-01 and mechanical clamping module 6214M-01. The clamping sleeve has an external thread and can, for example, be screwed directly into fixtures or workpieces.

Note:

The suitable installation tool is available under the order no. 559439.

On request:

- Installation diagrams

No. 6214ZN-01-02

Counterbalance clamping sleeve

Hardened.

Order no.	XY counterbalance [mm]	dia. D2	ØDH	H	M	R	S	Weight [g]
559093	1,0	2,1	10,8	5,45	M24 x 1	14,75	0,75	13

Application:

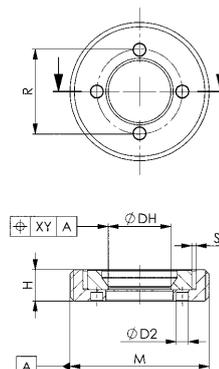

The compensation pull-stud is supported by bearings so that it is radially mobile and is used when large distance tolerances between the clamping sleeves have to be compensated. The compensation pull-stud fits the pneumatic clamping module 6215P-01 and the mechanical clamping module 6214M-01, has an external thread and can, for example, be screwed directly into fixtures or workpieces.

Note:

The clamping sleeve has only a holding function and does not absorb any lateral load. The suitable installation tool is available under the order no. 559439.

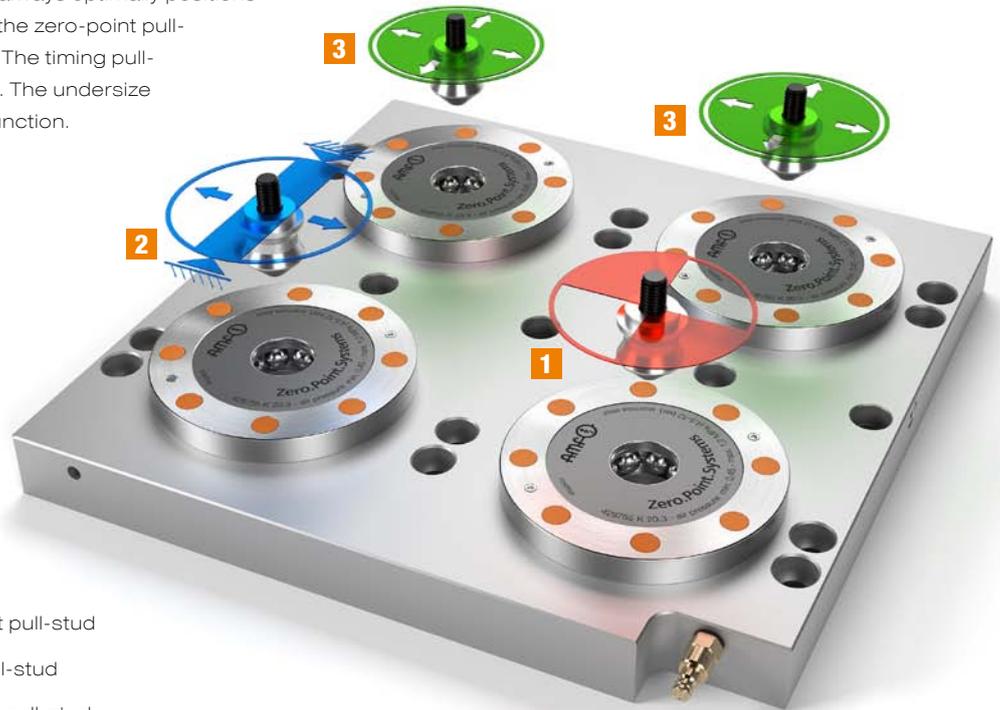

On request:

- Installation diagrams

CLASSIC PULL-STUD ARRANGEMENT

This arrangement of the clamping modules always optimally positions the pallet to be changed. At the same time, the zero-point pull-stud always represents the reference point. The timing pull-stud serves to compensate for the free axis. The undersize pull-stud has only a clamping and holding function.

- 1** Zero-point pull-stud
- 2** Timing pull-stud
- 3** Undersize pull-stud

OPTIONAL PULL-STUD ARRANGEMENT

The exclusive use of timing pull-studs compensates for stronger temperature influences. The reference point always remains in the centre of the pallet. Of course, temperature influences from machine processing can generally be ignored since the heat generated is conducted away by the chips and coolant.

- 2** Timing pull-stud

No. 6203ZN-02

Pull-stud K02

Hardened, for pneumatic clamping module no. 6203L.

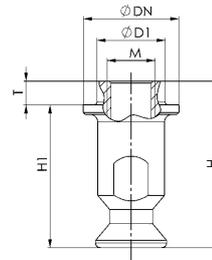

Order no.	Size	dia. DN	dia. D1	H	H1	M	T	Weight [g]

304535	K10	21,8	-	-	-	-	M 8	-	30

Design:

Order no. 562748: zero point pull-stud, order no. 562750: timing pull-stud, order no. 562751: undersize pull-stud, order no. 304535: protection pull-stud

Application:

For clamping in a fitting hole with a reduced diameter e.g. before heat treatment of a workpiece. After the boring out the hole, the respective standard pull-stud can be used.

Note:

The timing pull-stud has an additional alignment bore, which can optionally be used for simple installation.

On request:

Protection pull-stud made of plastic.

No. 6370ZN-10

K10 pull-stud with colour coding for M8 engagement screw

Hardened, for clamping modules size K10.

Order no.	Size	dia. DN	dia. D1	dia. D2	H	H1	T	Weight [g]
430280	K10	22,0	15	8	19	16	3	30
430306	K10	22,0	15	8	19	16	3	30

Design:

Extremely wear-resistant surface coating. Order no. 430280: zero point pull-stud „Gold“, order no. 430306: timing pull-stud „Black“.

Application:

For simple, visual differentiation of the various pull-studs.

Note:

The timing pull-stud has an additional alignment bore, which can optionally be used for simple installation.

No. 6370ZN-10

K10 pull-stud for M10 engagement screw

Hardened, for clamping modules size K10.

Order no.	Size	dia. DN	dia. D1	dia. D2	H	H1	M	T	Weight [g]
554936	K10	22,0	15	10	19	16	-	3	27

No. 6214M-01-04

Actuating pin

Not hardened, for mechanical clamping module 6214M-01.

NEW!

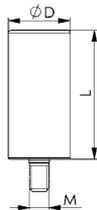

Order no.	dia. D	L	M	Weight [g]
561391	9,5	20	M3	13

Application:

The extended actuating pin is used for higher interchangeable pallets.

Note:

The actuating pin in the K01 clamping module 6214M-01 can be replaced by the extended actuating pin.

Subject to technical alterations.

No. 6370ZN-20-029

Puller

For pull-stud K20.

Order no.	Size	Thread	Weight [g]
526517	K20	M10	150

Design:

Aluminium puller is suitable for K20 pull-stud.

Application:

Pull-studs can be simply and quickly removed from the workpiece or fixture. For this purpose, the K20 puller is mounted on a pin extractor and the pull-studs are pulled out without damaging the mounting bore.

No. 6370ZZ

Positioning pull-stud

Hardened.

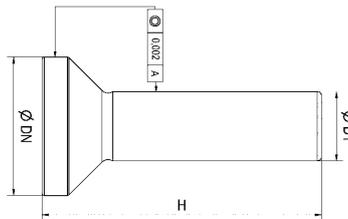

INOX
STAINLESS STEEL

Order no.	for clamping modules	dia. D1	dia. DN	H	Weight [g]
306241	K 5	8	15	48	60
306167	K10	12	22	48	85
306183	K20 / G1000	16	32	64	225
306209	K40	20	40	82	455

Application:

The positioning nipple makes all of the surface-mounted modules easier to align. It can be clamped directly in the machine spindle, thus achieving the desired gauges when the machine is traversed.

No. 6203ZNA-02

Alignment tool K02 for slit pull-stud

Suitable for order no. 427328.

NEW!

Order no.	Size	Weight [g]
562804	K02	100

Application:

The tool facilitates the alignment of the K02 sword pin.

No. 6214ZM-01

Insertion tool

Tempered steel.

Order no.	Size	Weight [g]
559439	12	22

Application:

Tool for installation of clamping module no. 6214M-01 and 6215P-01 as well as clamping sleeves no. 6214ZN-01-01 and no. 6214ZN-01-02.

No. 6370ZAS

Cover ring for clamping modules

Material: Aluminium

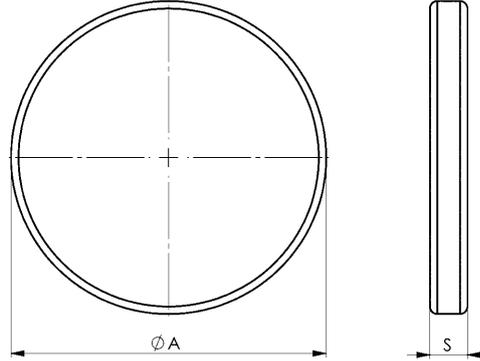

Order no.	Size	dia. A	S	Weight [g]
552810	K10	84	10	80
552811	K10.2, K10.3, K20	118	11	160
552812	K20.3	146	13	260
552813	K40	156	13	290

Design:

Cover and protective shield made of aluminium for ZPS clamping modules. These protect the contact surface of the clamping modules and are attached to the outside diameter by a pretensioned O-ring.

Application:

Cover and protective shields are used to protect the contact surface of the ZPS clamping modules from environmental influences.

No. 6370ZAR

Cover ring for clamping modules

Stainless steel, self-adhesive.

Order no.	Size	Weight [g]
550281	K10.2	4
550282	K10.3	4
550283	K10	4
550284	K20	5
550285	K40	6

Design:

Stainless steel, one-side self-adhesive with removable film. Selected sizes are suitable for installation and construction clamping modules.

Application:

Protective cover for clamping modules prevents build-up of dirt and chips.

Note:

Not suitable for clamping module with indexing, square clamping module and heavy-duty module. It must be noted that the adhesive used has only limited suitability for the use of coolant lubricants.

Subject to technical alterations.

No. 6206ZS

Cover caps for clamping module

Material: Polyethylene

Order no.	Packaging unit [St]	Weight [g]
553995	8	3

Application:

Cover and protective caps for the mounting screws of the K5.3 clamping modules.

No. 6204ZS

Cover caps for clamping module

Material: polyethylene

Order no.	Packaging unit [St]	Weight [g]
428664	10	4

Application:

Cover and protective caps for mounting screws of the K10.2, K10.3, K20.3 clamping modules.

No. 6204ZS-02

Cover caps for clamping pallets

Material: polyethylene

Order no.	Size	Packaging unit [St]	Weight [g]
430165	M12	12	15
430181	M16	12	15

Application:

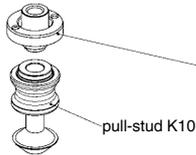

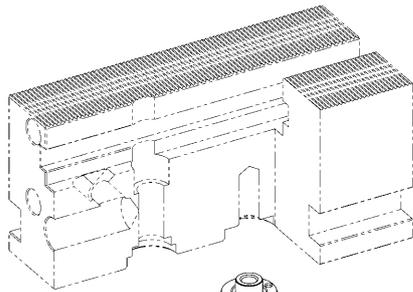

Cover and protective cap for cylinder and positioning boreholes in clamping stations.

No. 6376Z

Adapter set for pull-stud K10

Supply scope:
 - 1 Adapter sleeve
 - 1 Positioning bush

6376Z-07

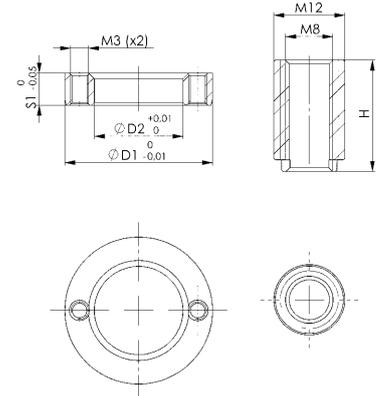

Order no.	dia. D1	dia. D2	S1	H	Weight [g]
430207	25	15	5,5	19	23

Design:

For blind hole thread and clamping rail, see article no. 6376G.
 The threaded sleeve is produced from alloyed heat-treated steel, the adapter ring from case-hardened steel.

Application:

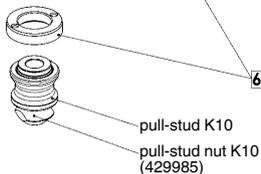

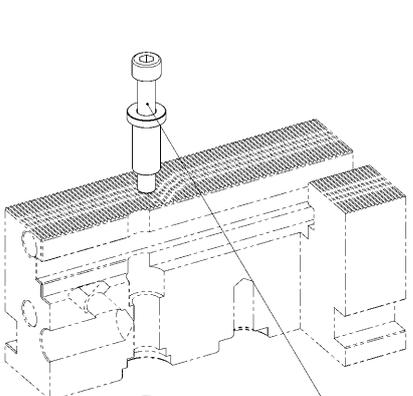

Adapter set for reducing the mounting bore from K20 to K10 pull-stud.

No. 6376Z

Adapter set for pull-stud K10

Supply scope:
 - 1 Cylinder head screw
 - 1 Adapter sleeve
 - 1 Positioning bush

6376Z-08

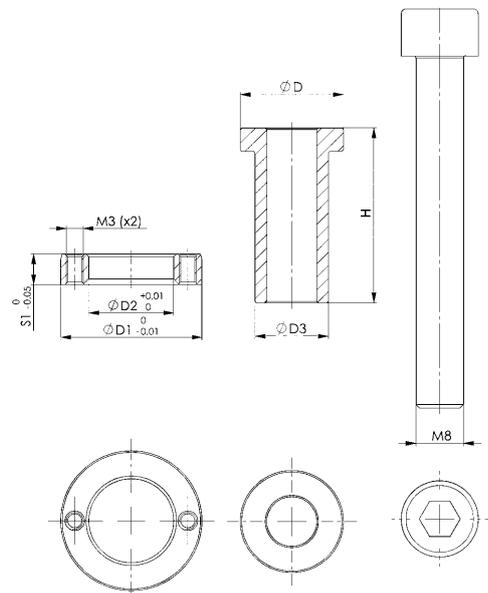

Order no.	dia. D	dia. D1	dia. D2	dia. D3	H	S1	Weight [g]
430223	17,5	25	15	12,5	30	5,5	62

Design:

For through-bores in the clamping rail, see Item No. 6376G.
 The threaded sleeve is produced from alloyed heat-treated steel, the adapter ring from case-hardened steel.
 The fastening bolt conforms to strength class 10.9.

Application:

Adapter set for reducing the mounting bore from K20 to K10 pull-stud.

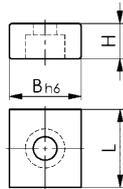

Subject to technical alterations.

No. 6370ZI

Indexing T-nut

For clamping modules with indexing.
Case-hardened, burnished and ground, incl. fastening bolt.

Order no.	Size	B	H	L	Weight [g]
430264	K10.2, K10.3, K20	8	8	10	6
550288	K20.3	10	8	20	15

Application:

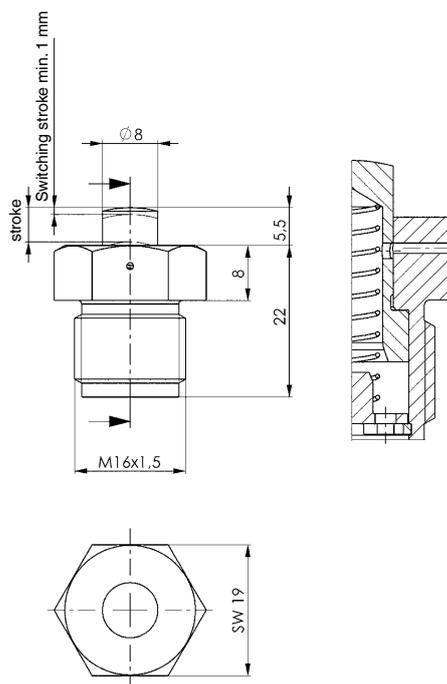

Indexing T-nut is used for the precise positioning of workpieces or fixtures on a clamping module with indexing function.

Note:

Order no. 430264 incl. M3 fastening bolt.
Order no. 550288 incl. M4 fastening bolt.

No. 6984-30

Support control, pneumatic

Order no.	Article no.	Stroke max. [mm]	Input pressure [bar]	Spring force min. [N]	Spring force max. [N]	Weight [g]
325217	6984-30	5	1 - 2	1,9	2,6	36

Design:

Housing from hardened and burnished steel. Pistons are tempered, nitrided and ground.
Compression spring from stainless steel.

Application:

The support control is used in fixtures where a signal indicating a correctly supported workpiece is required to enable machining. Lightweight workpieces should be clamped before being pressurised with compressed air.

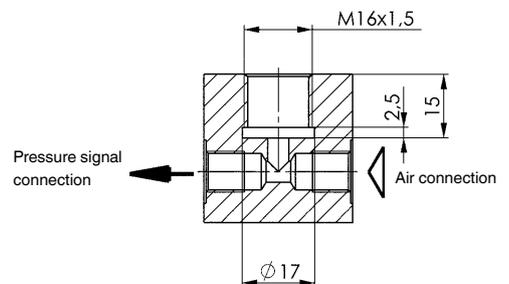

Features:

The support control works like a pneumatic back-pressure nozzle. The position is extended from its initial position by a pressure spring. Once applied, the air jet flows through the hollow piston and the radial discharge hole on the support control housing to outside. The discharge hole is sealed as soon as a workpiece is mounted and the piston is pushed downwards by min. 1 mm. The air flow backs up, the internal air pressure rises. The pressure value must be transferred to the control by an appropriate pressure signal converter. The system is relatively insensitive to fine chips.

Note:

The pressure signal converter is not included in the supply scope.
Effective piston surface with closed nozzle = 0.95 cm²
Piston force = piston surface x air pressure + spring force
Reduce the input pressure to 1 bar up to a maximum of 2 bar when the air duct is open, e.g. with a throttle check valve. When the air duct is closed, there is a dynamic pressure of approx. 3 bar.

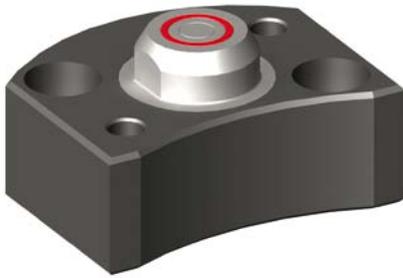

Installation drawing

No. 6370ZMMG

Coupling mechanism adapter

Suitable for installation clamping module nos. 6151HA / 6151L.

Order no.	Size	Nominal bore [NW]	A	A1	A2	B	HA	K	dia. N	dia. P	R	T	U	Weight [Kg]
424002	K20	5	56	33	18	65	35	13	6 H7	9	G1/8	12	45	0,9
424184	K40	5	56	33	18	65	45	13	6 H7	9	G1/8	12	45	1,0

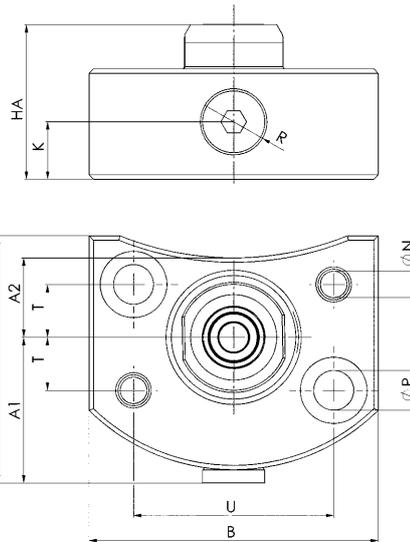

Application:

Couplings are used for loss-free transfer of liquid and gaseous media and are adjusted to the cover height of the installation clamping modules.

Note:

The coupling mechanism and nipple must be guided approx. 2-3 mm before contact with the axial sealing surfaces. The radial position tolerance (+/- 0.2mm) must not be exceeded. The couplings can only be coupled in a depressurised state.

The separating force due to hydraulic pressure between the coupling nipple and mechanism is given by the formula $F [N] = 15.4 \times p [\text{bar}]$ and must be taken into account.

CAD

No. 6370ZMM

Screw-in coupling mechanism

Max. operating pressure 400 bar.

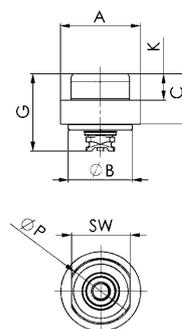

Order no.	Size	Nominal bore [NW]	A	dia. B	C	G	K	dia. P	SW	Weight [g]
424267	K10	5	M30x1,5	24	19	29,0	7	25	22	74
424200	K20	5	M30x1,5	24	19	29,0	10	25	22	65
424226	K40	5	M30x1,5	24	24	31,5	15	25	22	96

Application:

Couplings are used for loss-free transfer of liquid and gaseous media and are adjusted to the cover height of the installation clamping modules.

Note:

The coupling mechanism and nipple must be guided approx. 2-3 mm before contact with the axial sealing surfaces. The radial position tolerance (+/- 0.2 mm) must not be exceeded. The couplings can only be coupled in a depressurised state. The separating force due to hydraulic pressure between the coupling nipple and mechanism is given by the formula $F [N] = 15.4 \times p [\text{bar}]$ and must be taken into account.

CAD

Subject to technical alterations.

No. 6370ZMNG

Coupling nipple adapter

Suitable for coupling mechanism no. 6370ZMMG / ZMM.

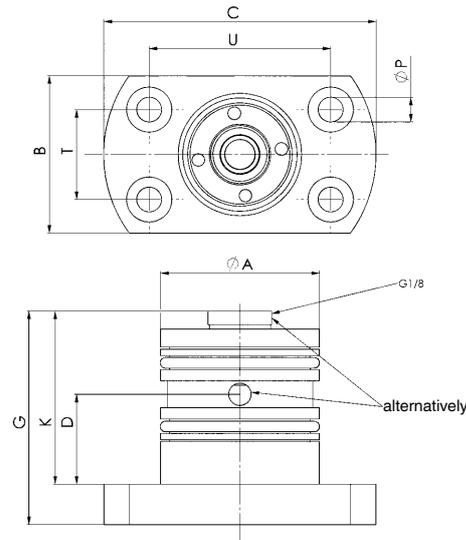

Order no.	Size	Nominal bore [NW]	dia. A	B	C	D	G	K	dia. P	T	U	Weight [g]
424242	K20/K40	5	35	35	60	20	47,5	38,5	5,5	20	40	320

Application:

The coupling nipple adapter is the counterpart to the coupling mechanism and is used in the interchangeable pallet in which the pull-studs are also located. Couplings are used for loss-free transfer of liquid and gaseous media and are adjusted to the height of the installation clamping modules.

Note:

The mounting housings of the two parts must be guided approx. 2-3 mm before contact with the axial sealing surfaces. This function is taken over by the coupling nipple adapter through the centring function. The medium can be passed on at the top over the pipe connection or over the O-ring connection. The radial position tolerance (+/- 0.2 mm) must not be exceeded. The couplings can only be coupled in a depressurised state. The separating force due to hydraulic pressure between the coupling nipple and mechanism is given by the formula $F [N] = 15.4 \times p [\text{bar}]$ and must be taken into account.

No. 6370ZMN

Screw-in coupling nipple

Max. operating pressure 400 bar.

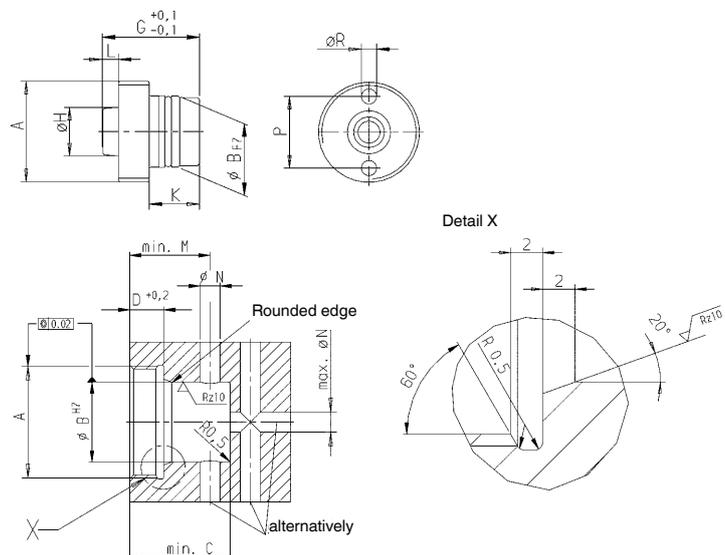

Order no.	Nominal bore [NW]	A	dia. B	G	dia. H	K	L	P	ØR	Weight [g]
430058	5	M24x1,5	20	27	13,5	14	4,5	18,5	4 x 2,8	56

Application:

Couplings are used for the leakage-free connection of hydraulic oil supplies.

Note:

The coupling mechanism and nipple must be guided approx. 2-3 mm before contact with the axial sealing surfaces. The radial position tolerance (+/- 0.2 mm) must not be exceeded. The couplings can only be coupled in a depressurised state. The separating force due to hydraulic pressure between the coupling nipple and mechanism is given by the formula $F [N] = 15.4 \times p [\text{bar}]$ and must be taken into account.

Subject to technical alterations.

No. 6370ZD-004

Air-Hydraulic Pump

Max. operating pressure 60 bar.

Order no.	Pneum. pressure min. [bar]	Pneum. pressure max. [bar]	Oil capacity usable [cm ³]	Flow rate max. [cm ³ /min]	Weight [Kg]
426569	4	6	1000	750	5,9

Design:

Compact, air-pressure-operated hydraulic intensification pump for single-acting circuits. The pump is fitted with an integrated safety valve that regulates the hydraulic output pressure. The safety valve is set in the factory to the max. operating pressure of 60 bar.

The extension element in the oil tank allows the pump to be adjusted horizontally and vertically.

Air connection thread: G1/4

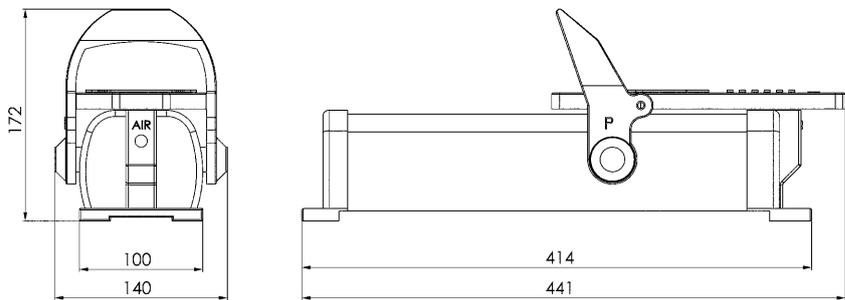

Oil connection thread: G1/4

Application:

The air-hydraulic pump is used for opening for hydraulic clamping modules or hydraulic clamping stations.

Note:

The use of purified, lubricated compressed air is recommended for operation of the pump.

CAD

No. 6370ZD

Pressure intensifier

Max. operating pressure 100 bar.

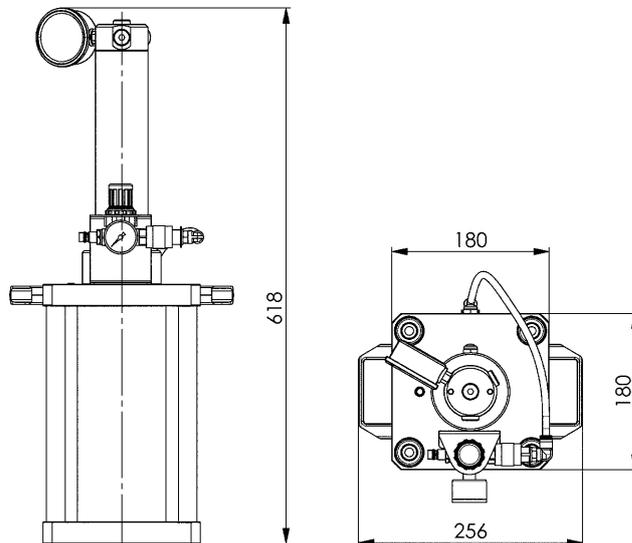

Order no.	Oil capacity [cm ³]	Flow rate [cm ³ /min]	Ratio	max. no. of clamping cylinders	Weight [Kg]
554493	400	400	1 : 10	22 (Typ 20), 9 (Typ 40)	17,4

Design:

Compact, air-pressure-operated pressure intensifier for single-acting hydraulic circuits. With pneumatic control unit for the hydraulic output pressure, pressure gauge and fill level indicator.

Application:

The pressure intensifier is used for opening for hydraulic clamping modules or hydraulic clamping stations.

Subject to technical alterations.

No. 6370ZS-06-2000

Hose set, hydraulic

Max. operating pressure 100 bar.

Order no.	Length	Weight
	[m]	[g]
430082	2	730

Design:

The connection set includes:
 1x hydraulic connecting tube, length 2 m
 2x straight screw pipe connections
 2x straight screwed sockets
 1x T-screw connection
 1x manometer 0-100 bar
 1x straight female stud coupling
 2x quick fitting coupling sleeves
 2x quick fitting coupling plugs
 2x Cu sealing washers for G1/4

Application:

This set is used for the hydraulic connection of extension clamping modules or clamping stations for pressure generators such as pressure intensifiers or air-hydraulic pumps.

Subject to technical alterations.

No. 6370ZR

Pipe fittings, brass

for pipes external Ø 8 mm, internal Ø 4 mm.
Max. operating pressure 100 bar.

Application:

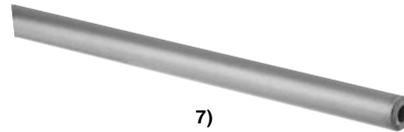

Fittings for piping of surface-mounted clamping modules and flange versions.

Note:

* Article 429936:

Seamless hydraulic pipe, phosphate-coated and lubricated, Ø 8x2 mm, length 2.0 m, made of steel (fully killed cast steel) in accordance with DIN 2391 C normalised, bright-annealed (NBK) cold-drawn.

Order no.	Fig. No.	Connection	Weight [g]

429936	7	*	475

No. 6370ZRA

Adapter with external thread

Max. operating pressure 350 bar.

Order no.	dia. D	G	G1	L	L1	L2	SW	Weight [g]
558045	4	G1/8	G1/8	25	10	10	14	14
558050	4	G1/8	G1/4	28	10	11	19	22

Design:

Adapter with external thread in inches, made of steel, galvanised.

Application:

For adaptation of hydraulic connection components for zero-point clamping systems.

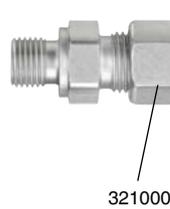

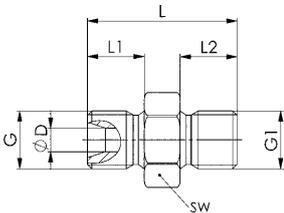

Note:

The Cu sealing rings are not supplied as standard and must be ordered separately.

Form A sealing ring Cu (copper):

G1/8: order no. 69815

G1/4: order no. 69823

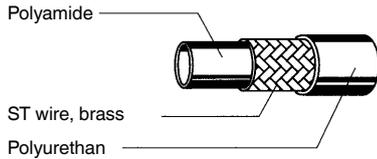

Subject to technical alterations.

No. 6985R

High Pressure Hose

Max. operating pressure dyn. at +50°C 375 bar.

Order no.	Test pressure [bar]	Bending radius min. [mm]	dia. D [mm]	dia. D1 [mm]	dia. D2 [mm]	L [mm]	Weight [g]
63198	750	30	9,8	4,8	8	300	65
63206	750	30	9,8	4,8	8	500	90
63214	750	30	9,8	4,8	8	800	120
63222	750	30	9,8	4,8	8	1250	180
63230	750	30	9,8	4,8	8	2000	265
63248	750	30	9,8	4,8	8	3000	380

Design:

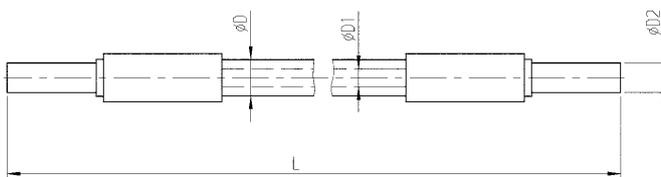

Steel fitting, galvanized and passivated. Hose of synthetic material with high tensile brassed steel-wire braid.

Application:

Insert hose and tighten with 1/4 turn maximum.

Note:

We recommend only using the 3-metre long high pressure hose for double-acting elements. These high pressure hoses can be used directly in pipe connections. The period of use of a hydraulic hose, including any storage period, should not exceed six years. The serviceability must be assessed according to fixed inspection criteria. See DIN 20066, Section 5 for further details.

No. 6370ZS-08

Hydraulic tube

Max. operating pressure dyn. at +50°C 375 bar.

Order no.	Test pressure [bar]	Bending radius min. [mm]	dia. D	dia. D1	G	G1	L	SW	SW1	Weight [g]
558008	1200	20	5	2	G1/8	G1/4	1000	14	19	20

Design:

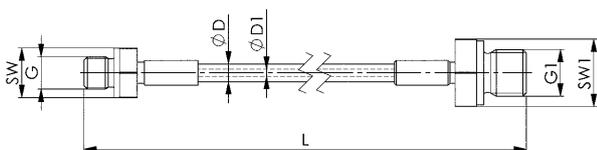

Steel fitting, galvanized and passivated. Hose of synthetic material with high tensile brassed steel-wire braid.

Application:

Connection and installation of hydraulic zero-point clamping systems under reduced space conditions or small bending radius.

Note:

The period of use of a hydraulic hose, including any storage period, should not exceed six years. The serviceability must be assessed according to established inspection criteria. See DIN 20066, section 5 for further details.

No. 6370ZSK

Quick coupling „flat-face“ G1/8

Max. operating pressure 420 bar.

Order no.	Nominal bore [NW]	Nominal flow [l/min]	SW [mm]	Weight [g]
558043	4	3	17	38
558044	4	3	19	72

Application:

Since the clamping modules after blow-off of the opening pressure are mechanically locked, the hose is then uncoupled by means of the quick couplings. The advantage of this is that there are no interfering lines.

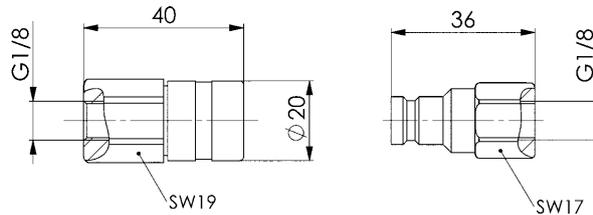

Note:

Flat-sealing quick coupling with internal thread G1/8.

Adapters from internal to external thread are not supplied as standard and must be ordered separately.

G1/8 to G1/8: order no. 558045

G1/8 to G1/4: order no. 558050

558044 Sleeve

558043 Connector

No. 6370ZSK

Quick coupling „flat-face“ G1/4

Zinc-plated.

Max. operating pressure 300 bar.

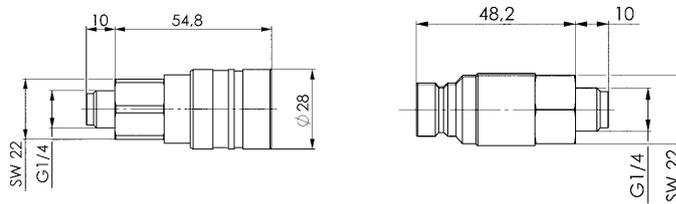

Order no.	Nominal bore [NW]	Nominal flow [l/min]	SW [mm]	Weight [g]
427856	6	12	22	100
427872	6	12	22	170

Application:

Since the clamping modules after blow-off of the opening pressure are mechanically locked, the hose is then uncoupled by means of the quick couplings. The advantage of this is that there are no interfering lines.

Note:

Flat-sealing quick coupling with G1/4 internal thread. For G1/4 external thread a threaded stud is enclosed.

Pneumatic pressure booster

Order no.	Input pressure [bar]	Output pressure [bar]	Connection	Weight [Kg]
427088	2,5-8	4,5-10	G1/4	1,5

Design:

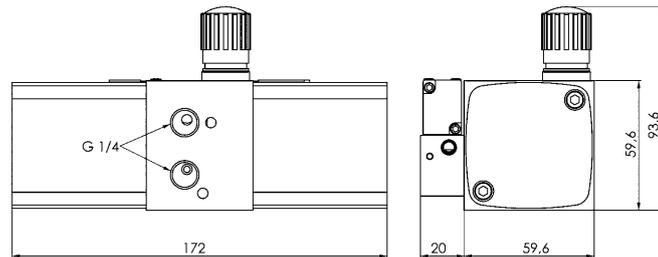

Pressure intensifier with possibility to adjust the pneumatic output pressure, incl. manometer construction kit, sound absorbers and flange mounting.

Application:

For strengthening the operating pressure with pneumatic clamping modules and compensation for pressure fluctuations in the supply line.

Note:

The pressure intensifier can be mounted in every installation position. For operation, filtered (40µm), unlubricated compressed air as per ISO 8573-1 is required. The pressure intensifier is suitable for ambient temperatures of +5 – +60 °C.

No. 6370ZVL-004

Pneumatic pressure booster set

Order no.	Input pressure [bar]	Output pressure [bar]	Connection	Weight [Kg]
421396	2,5-8	4,5-10	G1/4	2,5

Design:

Pressure intensifier group with possibility to adjust the pneumatic output pressure, incl. manometer construction kit, sound absorbers, flange mounting, pressure control valve, manual direction valve, coupling plug, connections and plastic tube.

Application:

For strengthening the operating pressure with pneumatic clamping modules and compensation for pressure fluctuations in the supply line.

Note:

The pressure intensifier can be mounted in every installation position. For operation, filtered (40µm), unlubricated compressed air as per ISO 8573-1 is required. The pressure intensifier sub-assembly is suitable for ambient temperatures of +5 – +60 °C.

No. 6370ZSK

Quick fitting coupling, pneumatic

Max. operating pressure 12 bar.

Order no.	Nominal bore [NW]	Nominal flow [l/min]	SW [mm]	Weight [g]
430041	4,2	563	14	23
430066	5,0	563	14	27

Application:

This pneumatic quick-release coupling is particularly suitable for use in the AMF zero-point clamping technology of the zero-point system.

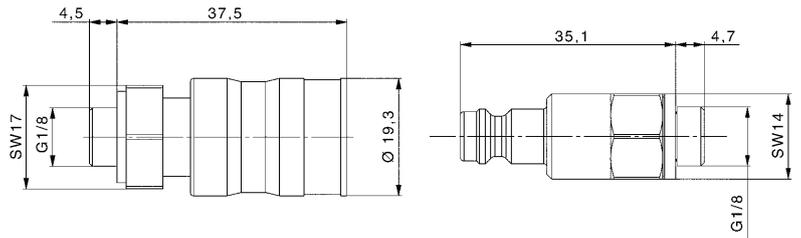

Note:

Sleeve with Order No. 430066:

Coupling valve with venting function and check valve. External thread G1/8.

Connector with Order No. 430041:

Dirt and shaving-repellent coupling connector with borehole for forced venting of the clamping station, fixture or zero-point clamping module. External thread G1/8.

430066 Sleeve

430041 Connector

No. 6370ZS-07

Hose, pneumatic

Polyurethane, outside calibrated.
Max. operating pressure 10 bar.

Order no.	Hose dia. [mm]	Length [m]	Weight [g]
430140	8	3	100

Application:

Hoses are used for the pneumatic connection of extension clamping modules or clamping stations.

No. 6370ZR-02

Push-in fittings, pneumatic

Max. operating pressure 12 bar.
For hose diameter 8 mm.

Order no.	Fig. No.	Connection	Weight [g]
421479	1	G1/8	14
421453	1	G1/4	16
430108	2	G1/8	19
430124	2	G1/4	27

Application:

Screwed connections are used for the pneumatic connection of extension clamping modules or clamping stations.

No. 6370ZVL-007

Footrest valve, pneumatic

Max. operating pressure 10 bar.

Order no.	Air connection	Weight [g]
477570	G1/4	610

Application:

For controlling pneumatic clamping modules.

Note:

manual Footrest valve
valve function: 3/2 closed, monostable, latching

No. 6370ZSK-08

Air gun valve, pneumatic

Max. operating pressure 10 bar.

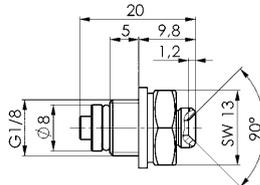

Order no.	Nominal bore [NW]	Nominal flow [l/min]	SW	Weight [g]
533075	2,5	240	13	10

Design:

Pneumatic air gun with integrated non-return valve.

Application:

For simple and quick opening of the pneumatic zero point clamping plates. When the air gun is positioned on the valve, the air pressure is released and then held by the non-return valve. Venting is effected by briefly and manually pushing the valve, which then resets under spring force.

CAD

No. 6370ZF

Special grease for zero-point clamping modules

Order no.	Suitable for ambient temperature (°C)	Weight [g]
426494	0-80	250

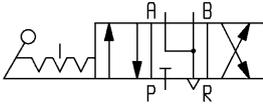

Application:

Special grease for maintenance work on zero-point clamping modules.

No. 6370ZVL

Manual directional valve

Max. operating pressure 12 bar.

Order no.	Type	Air connection	Weight [g]
305383	4/3	G1/4	250

Application:

For controlling pneumatic clamping modules.

Note:

4/3 manual directional valve opened in the centre position. G1/4 connections laterally.

No. 6916-11

Shut-off valve

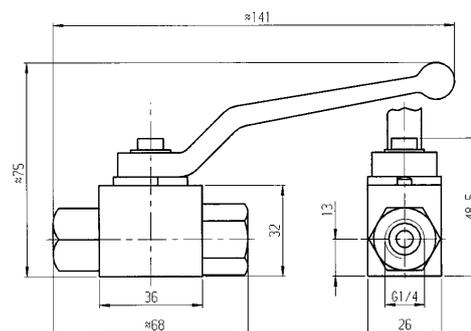

max. operating pressure 500 bar.

Order no.	Article no.	Oilflow bore DN (dia.)	Ambient temp. [°C]	Weight [g]
65326	6916-11	Ø 6	-20 - +100	350

Design:

Housing and functioning components made of steel. Seal of shaft made of NBR.

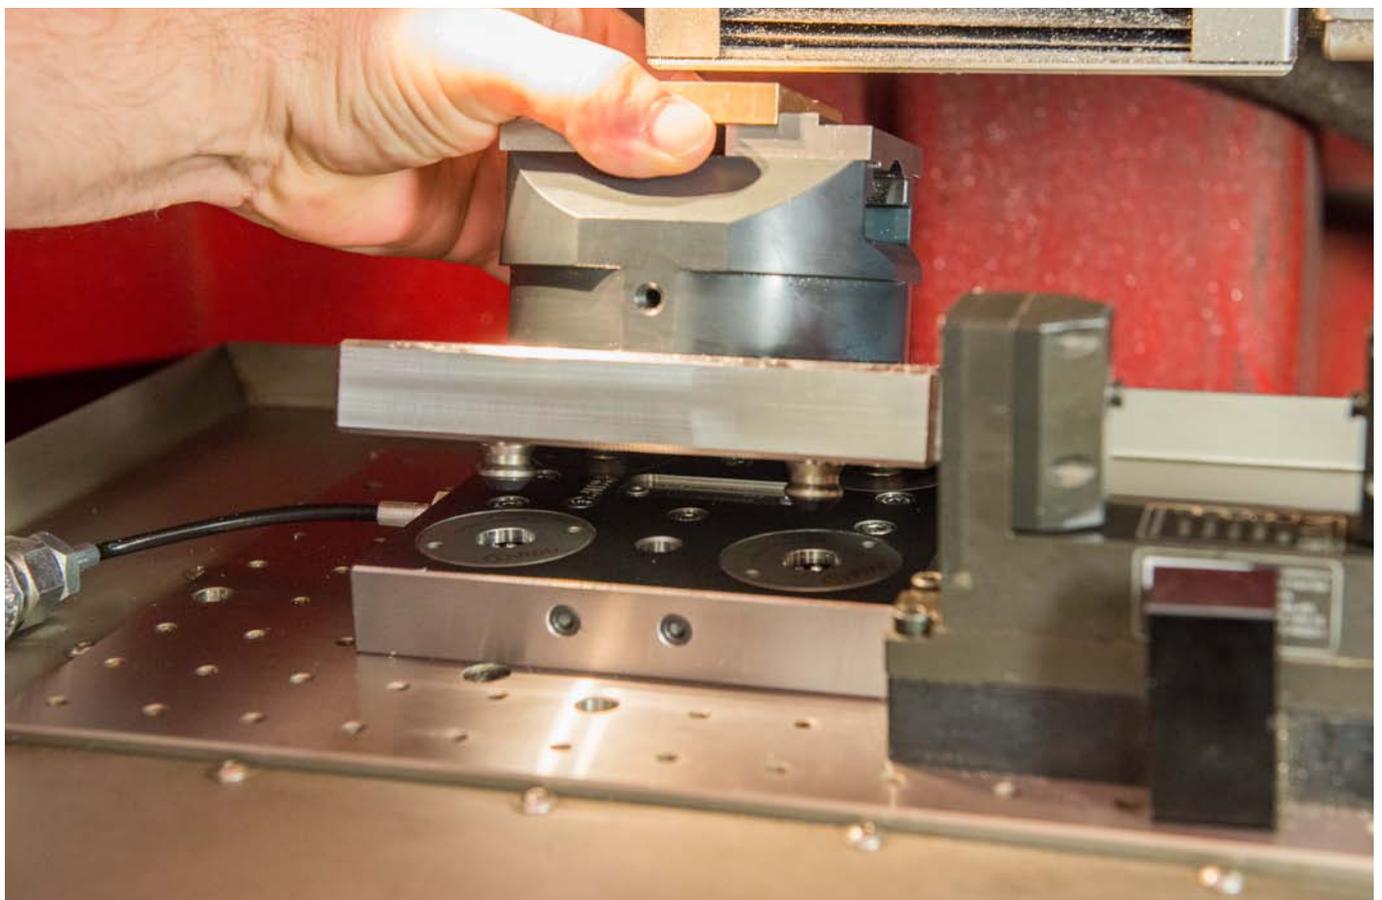

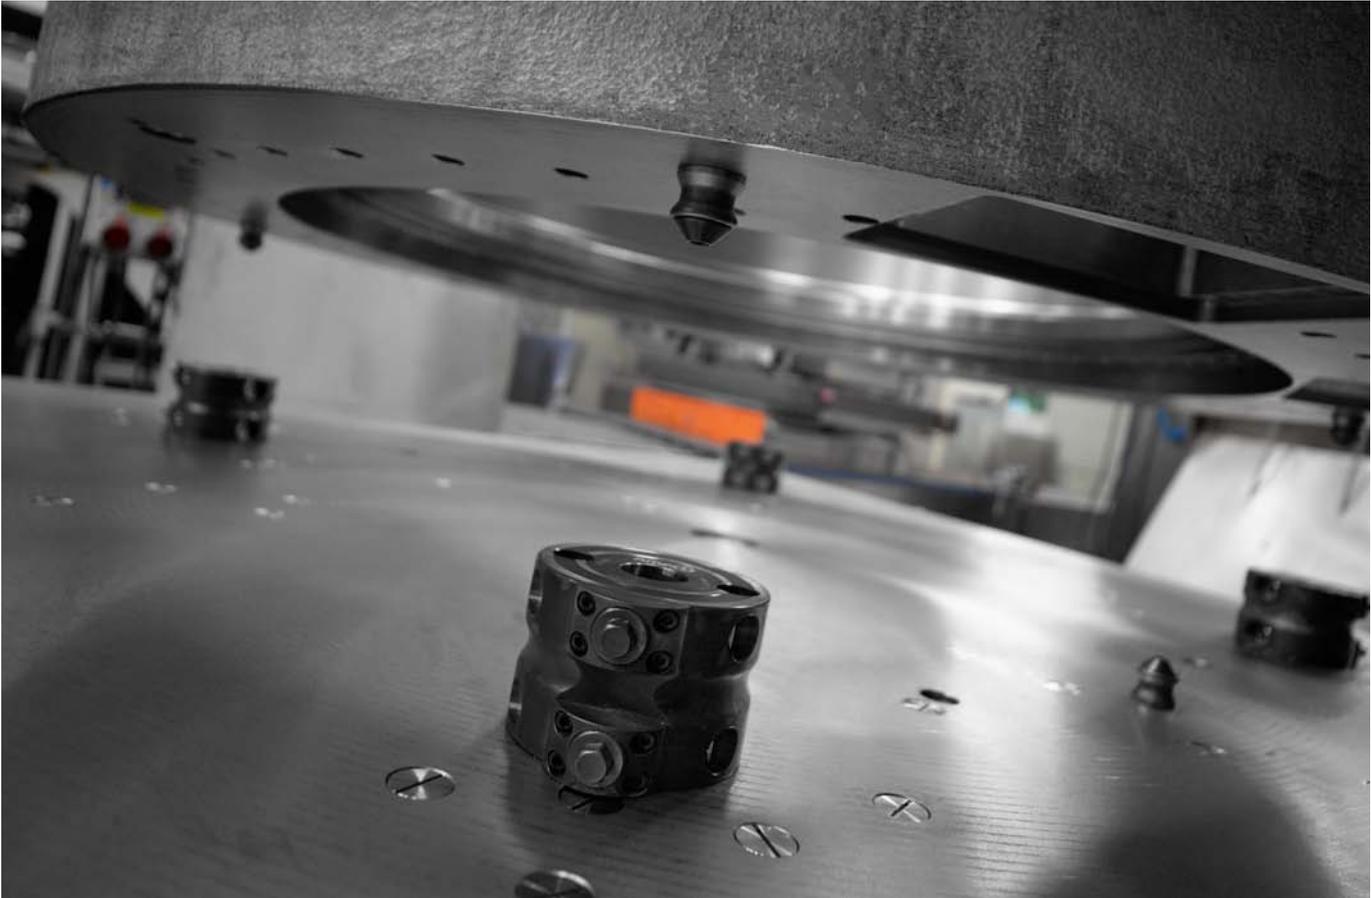

Use of various sizes of standard clamping modules in one application.

The AMF zero-point system is the standard interface here between various machines. This means that the workpiece can be clamped on the different machine tables in such a way that optimises set-up time regardless of the size.

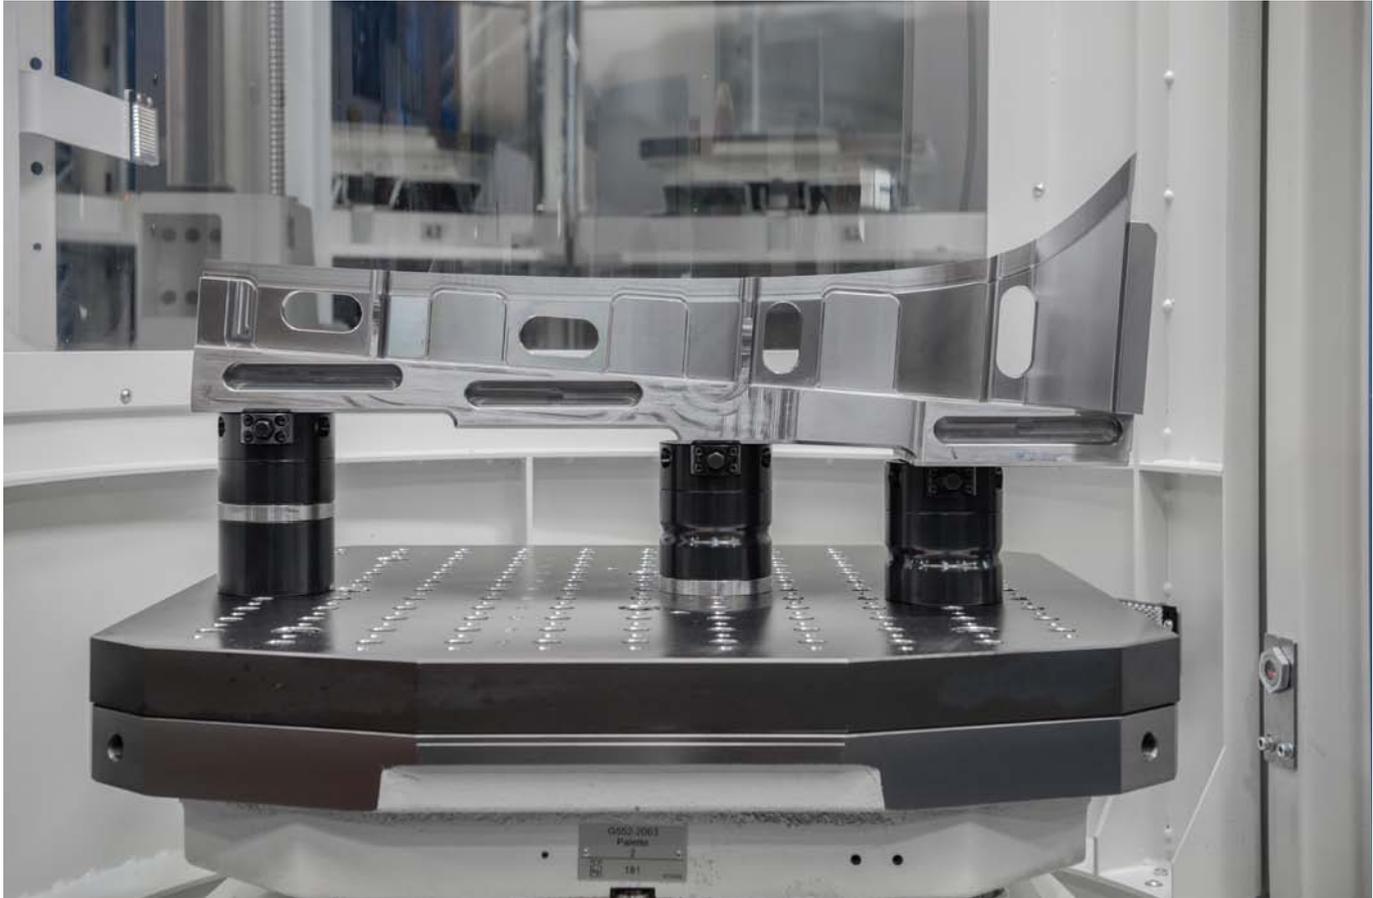

Direct clamping of component by means of mechanical, double clamping modules.

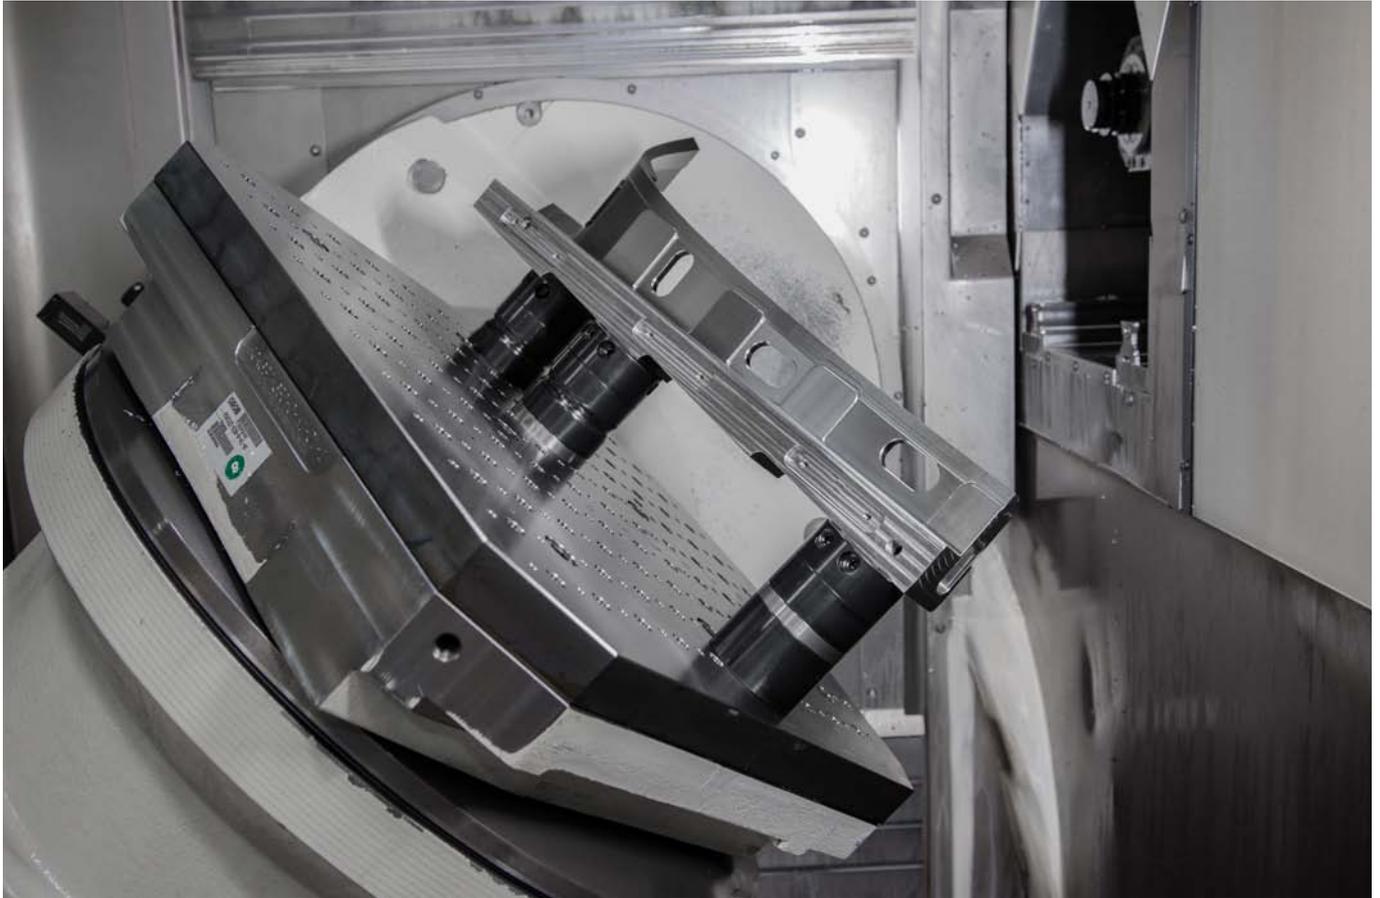

Optimisation of set-up times in small-series production by means of variable, direct clamping of the component.
The double clamping modules can be adapted quickly to the different components simply by repositioning.

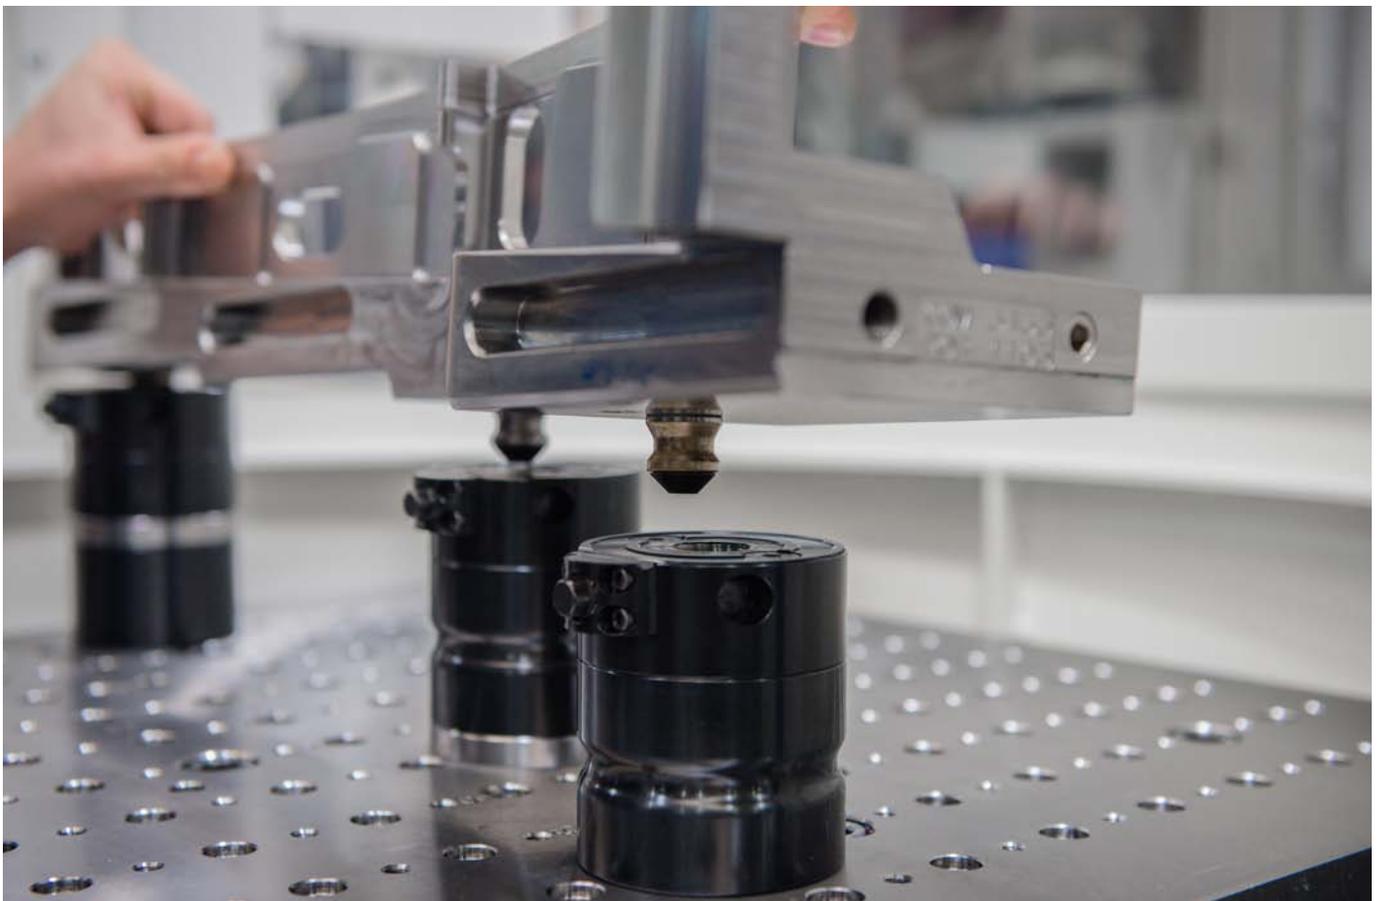

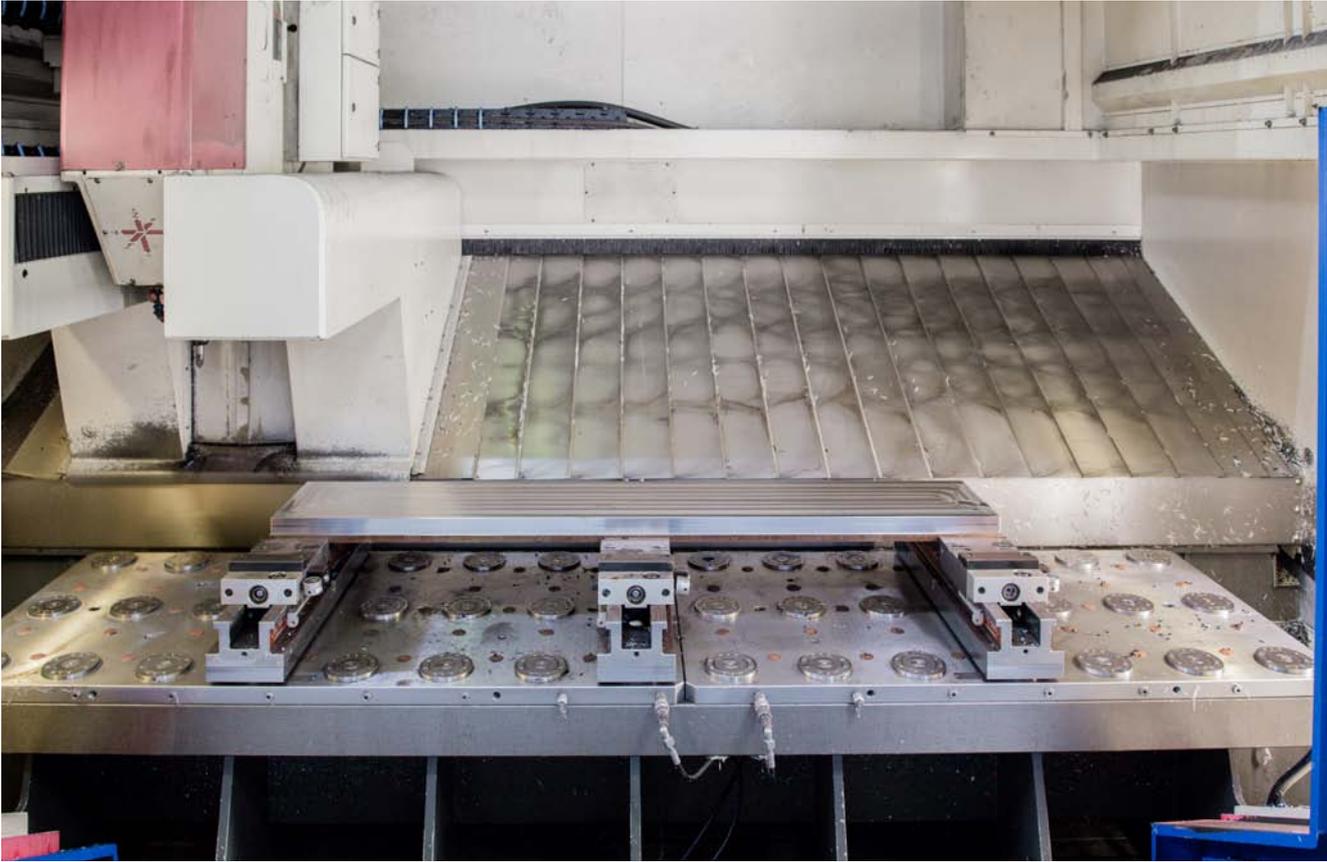

Modular mechanical zero-point clamping system in tool and mould making.
The different clamping heights required can be easily adjusted using the standardized construction kit system.

Simple 5-sided machining of workpieces with a complex outer contour. The clamping pillars can be built up with repeatable accuracy by positioning on the perforated grid plate. This enables fast planning and creation of the NC programs.

Easy alignment of multiple vices when machining long workpieces.

AMF multiple clamping system in conjunction with the AMF zero-point system.

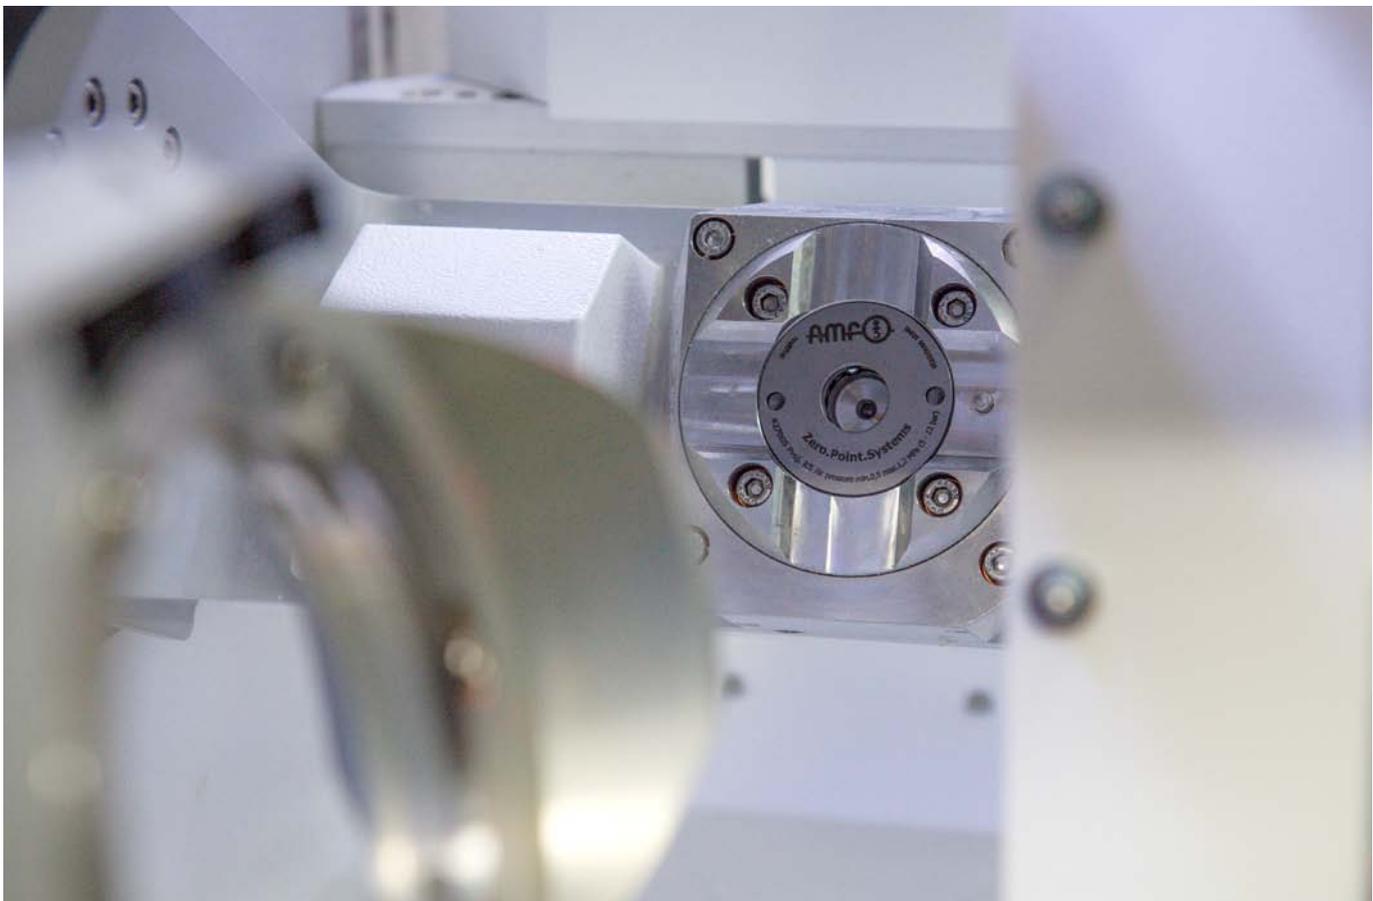

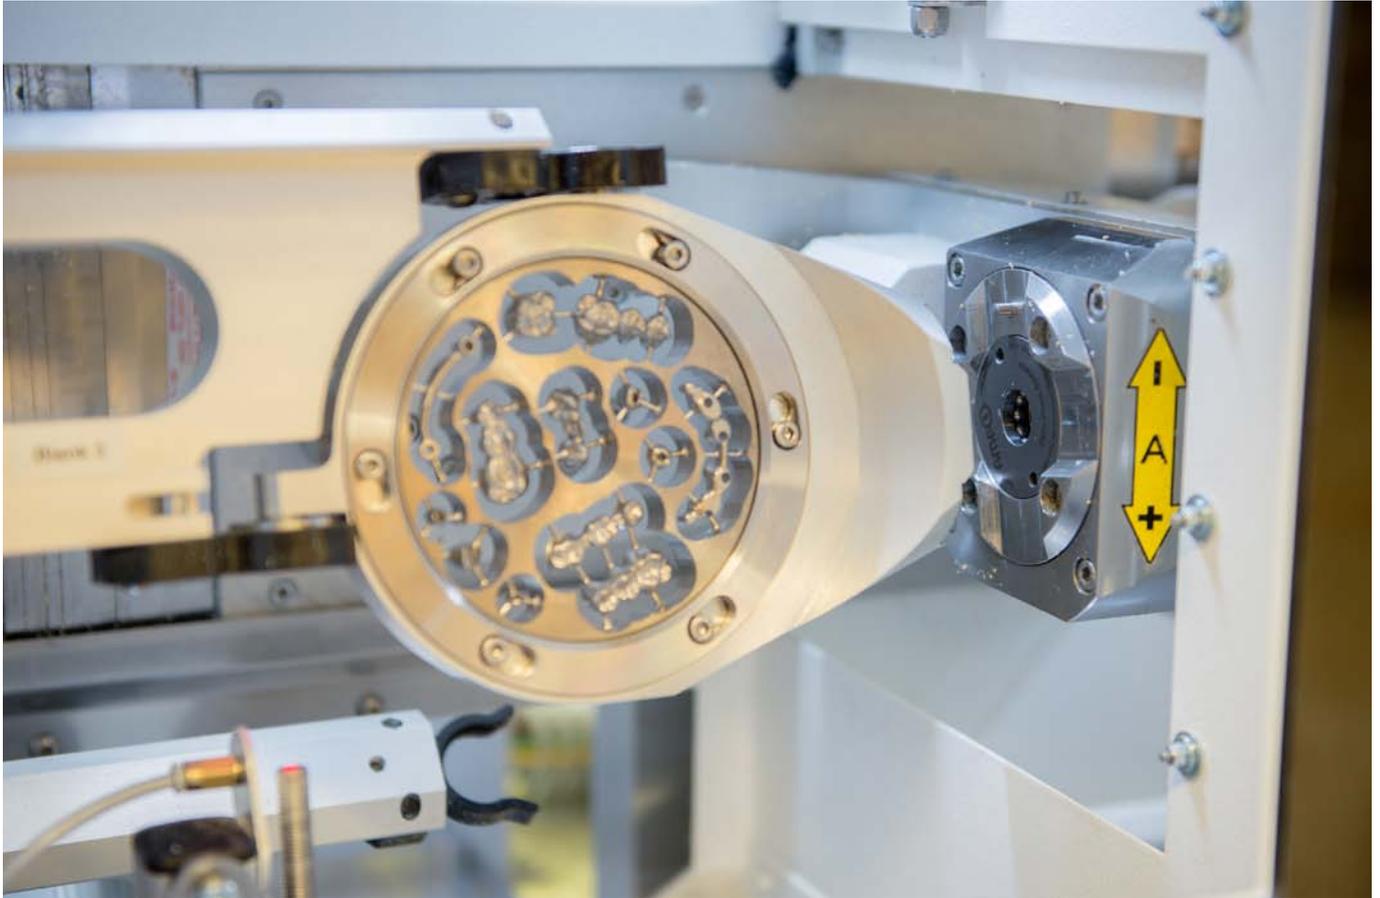

8-point clamping station for mounting different standard clamping equipment or direct clamping of the workpiece.

Fully automatic loading and clamping of circular blanks during the production of dental implants.

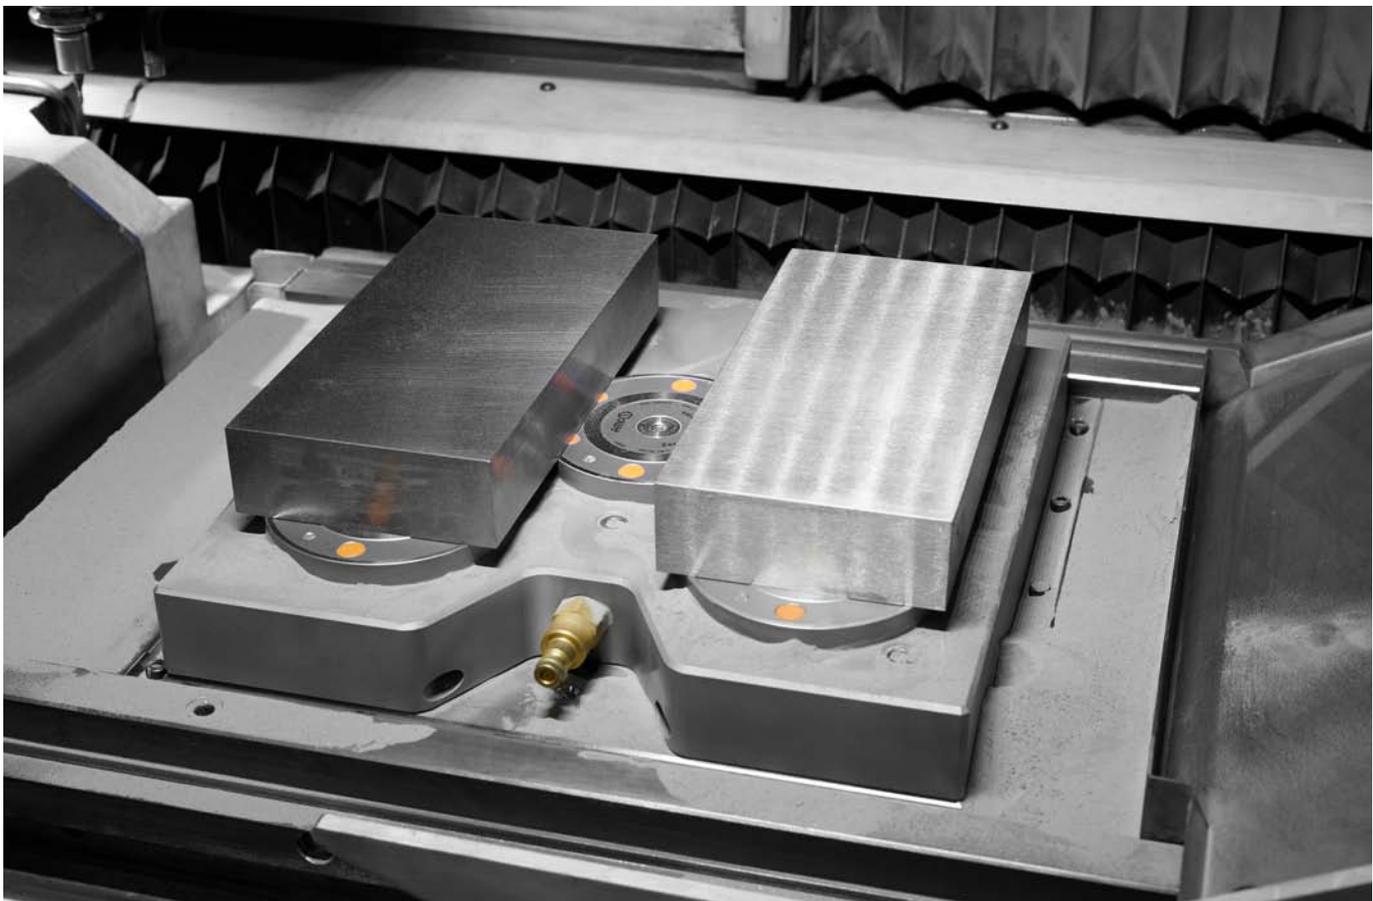

Our zero-point system is the factory standard interface here between the machine table and blank carrier.

AMF-Zero-Point-Systems in additive manufacturing.
The 5-point clamping station enables the substrate plate to be changed quickly on the hybrid machine (SLS / HSM).

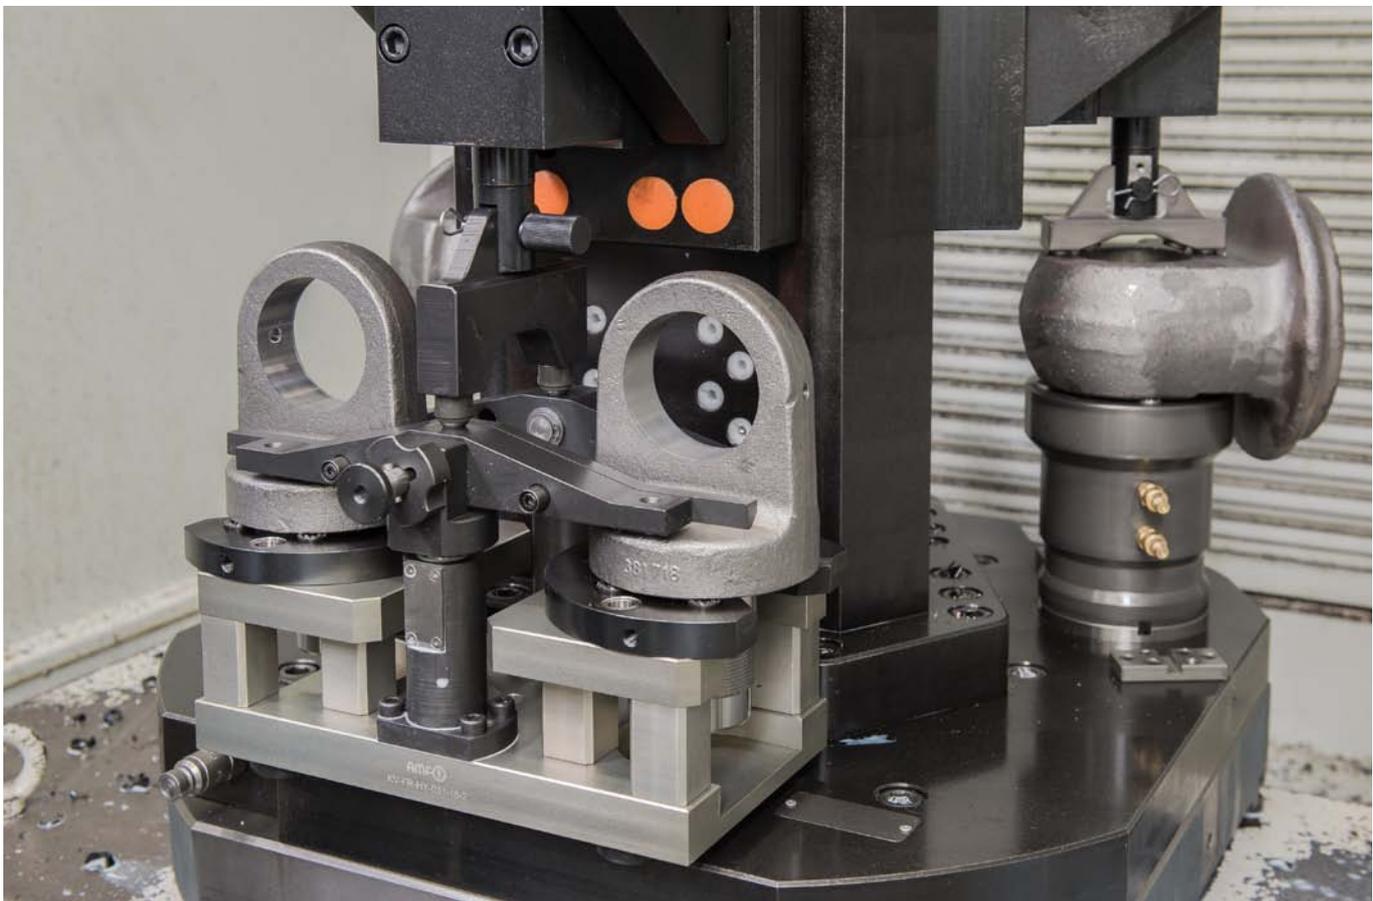

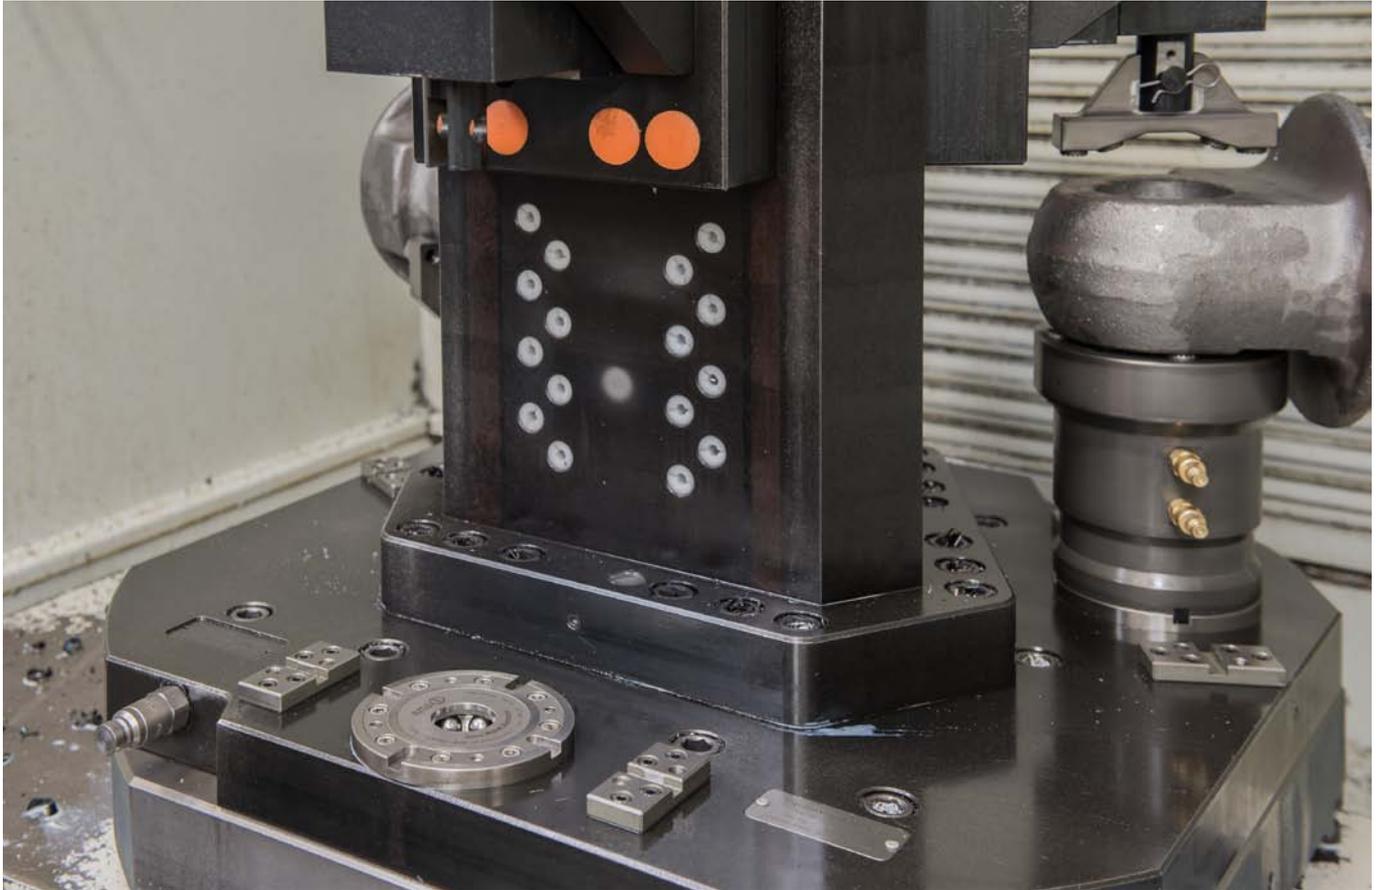

The AMF zero-point clamping modules are specially designed for use in additive manufacturing and the associated high temperature influences. They are completely sealed and therefore insensitive to the influences of the metal powder.

This complete clamping solution combines multiple clamp types in one clamping fixture. (modular clamping system, hydraulic clamping system as well as zero-point clamping technology).

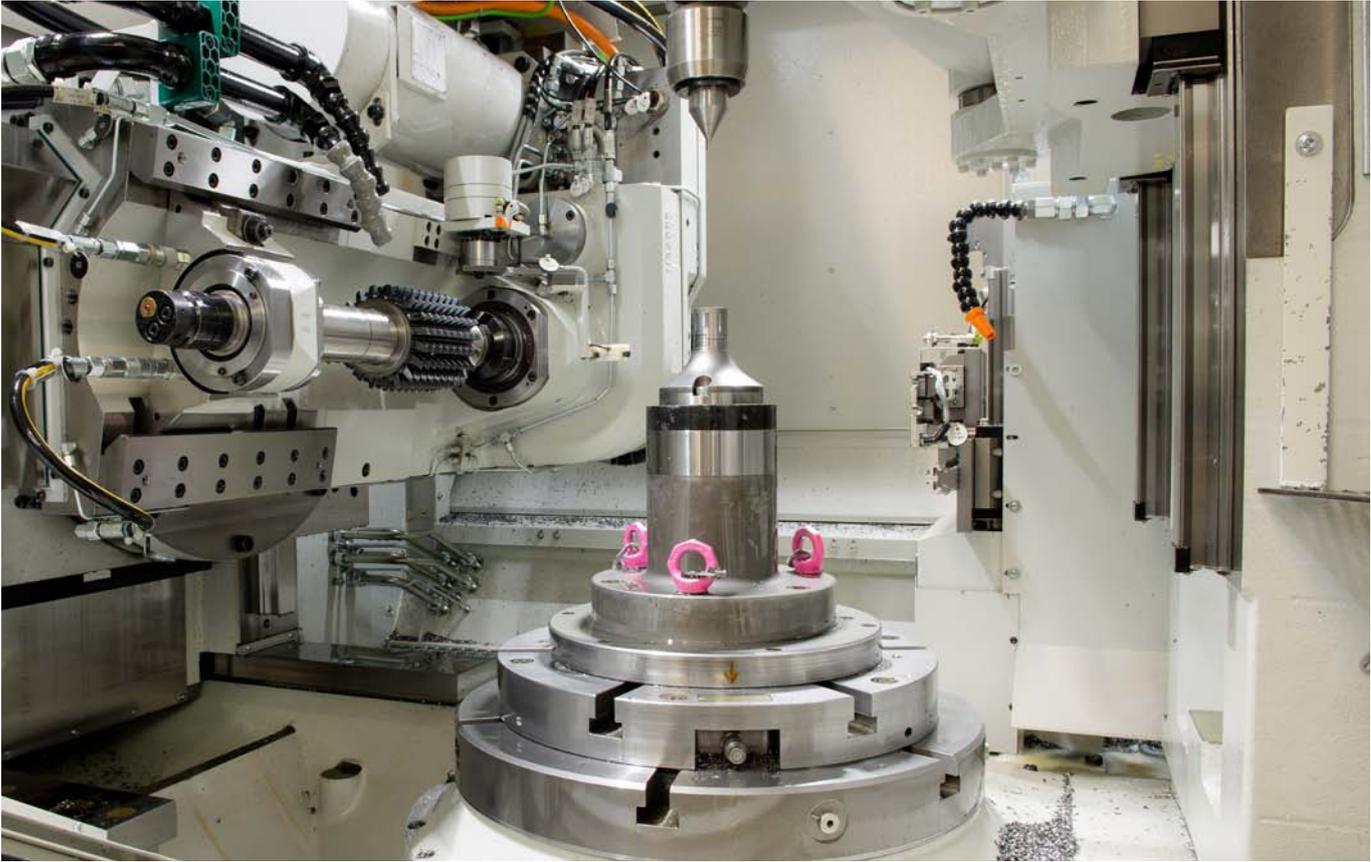

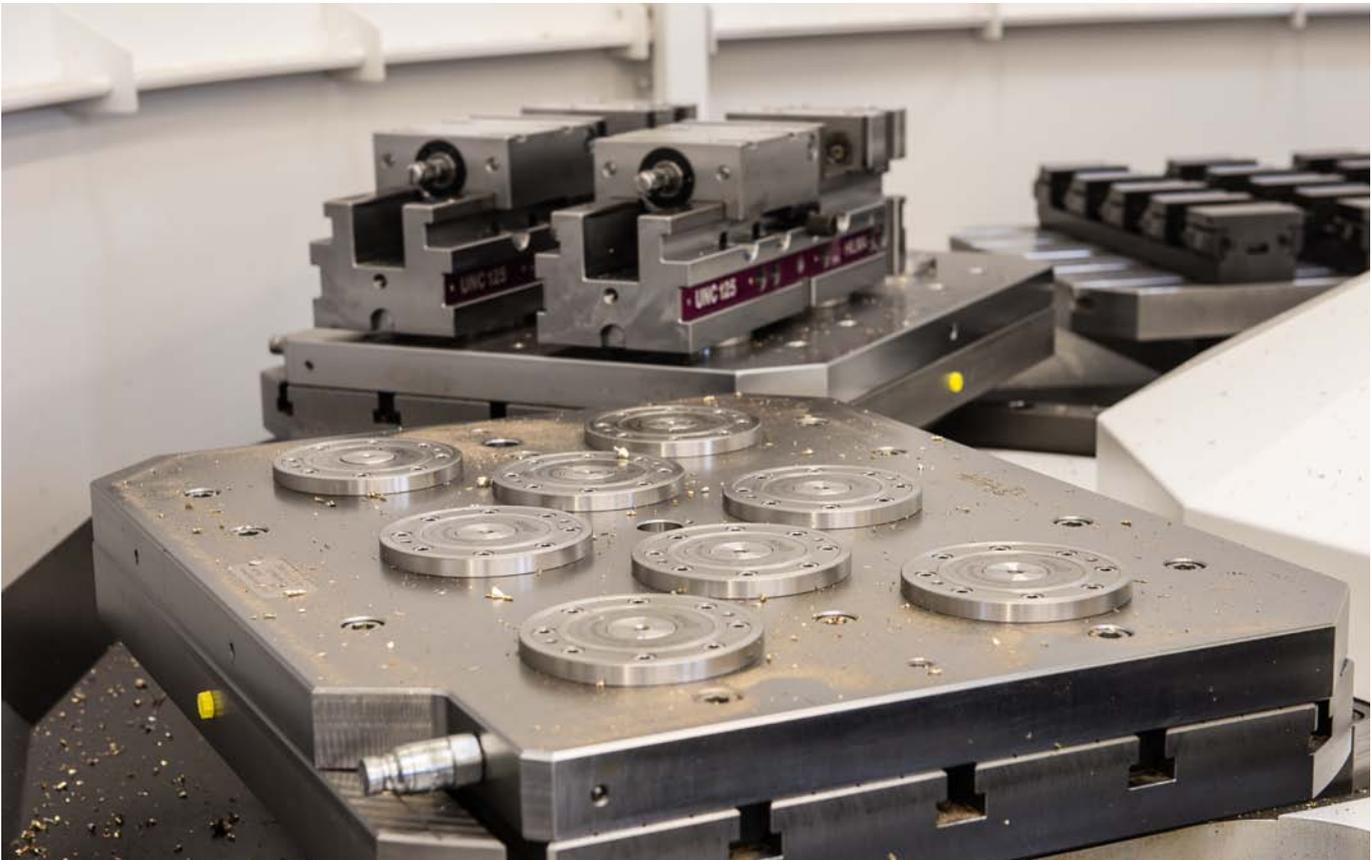

This combination enables the customer to clamp different components within a fixture concept and to further expand them for new parts.

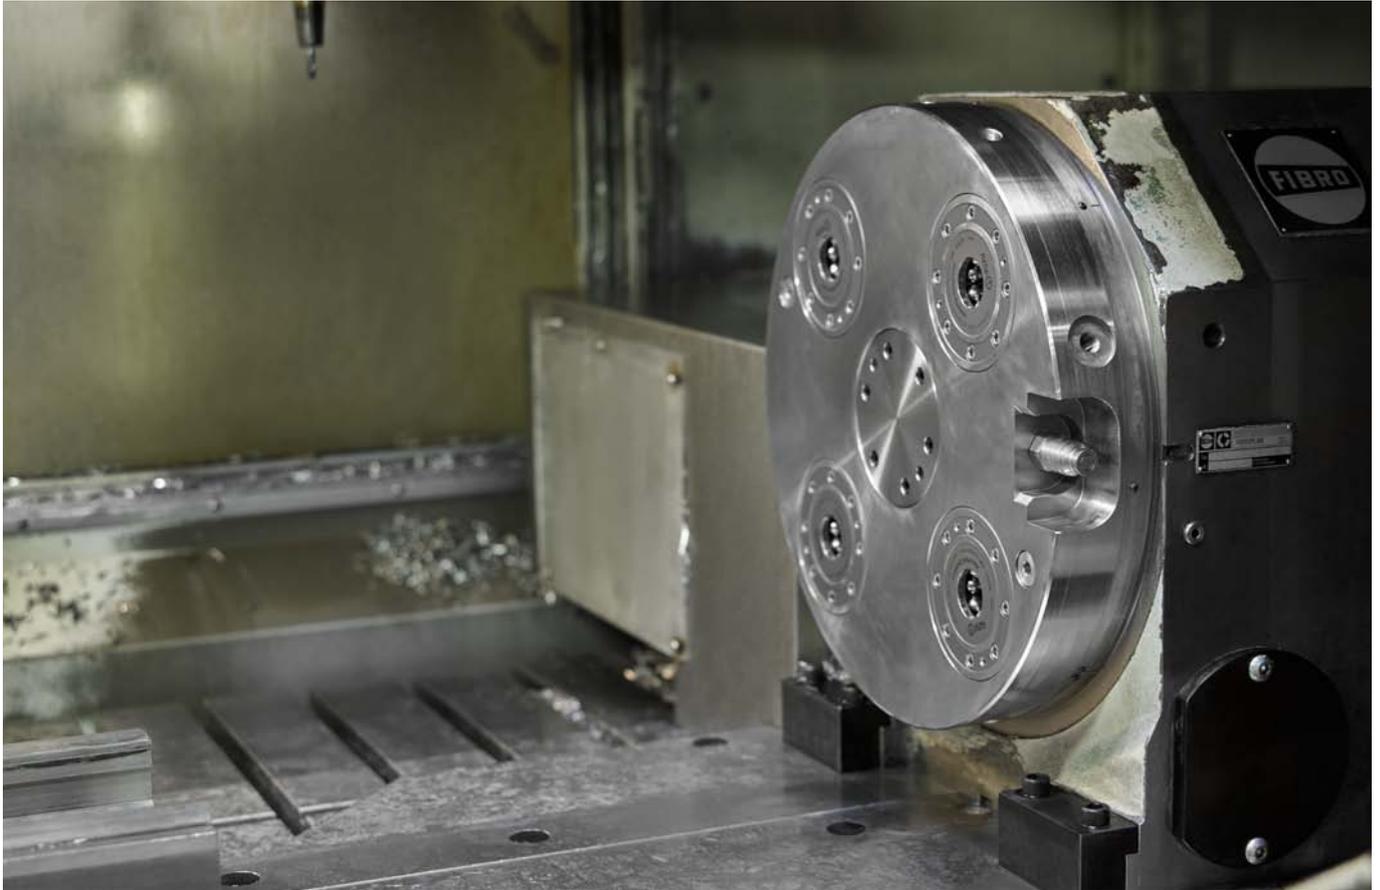

Subject to technical alterations.

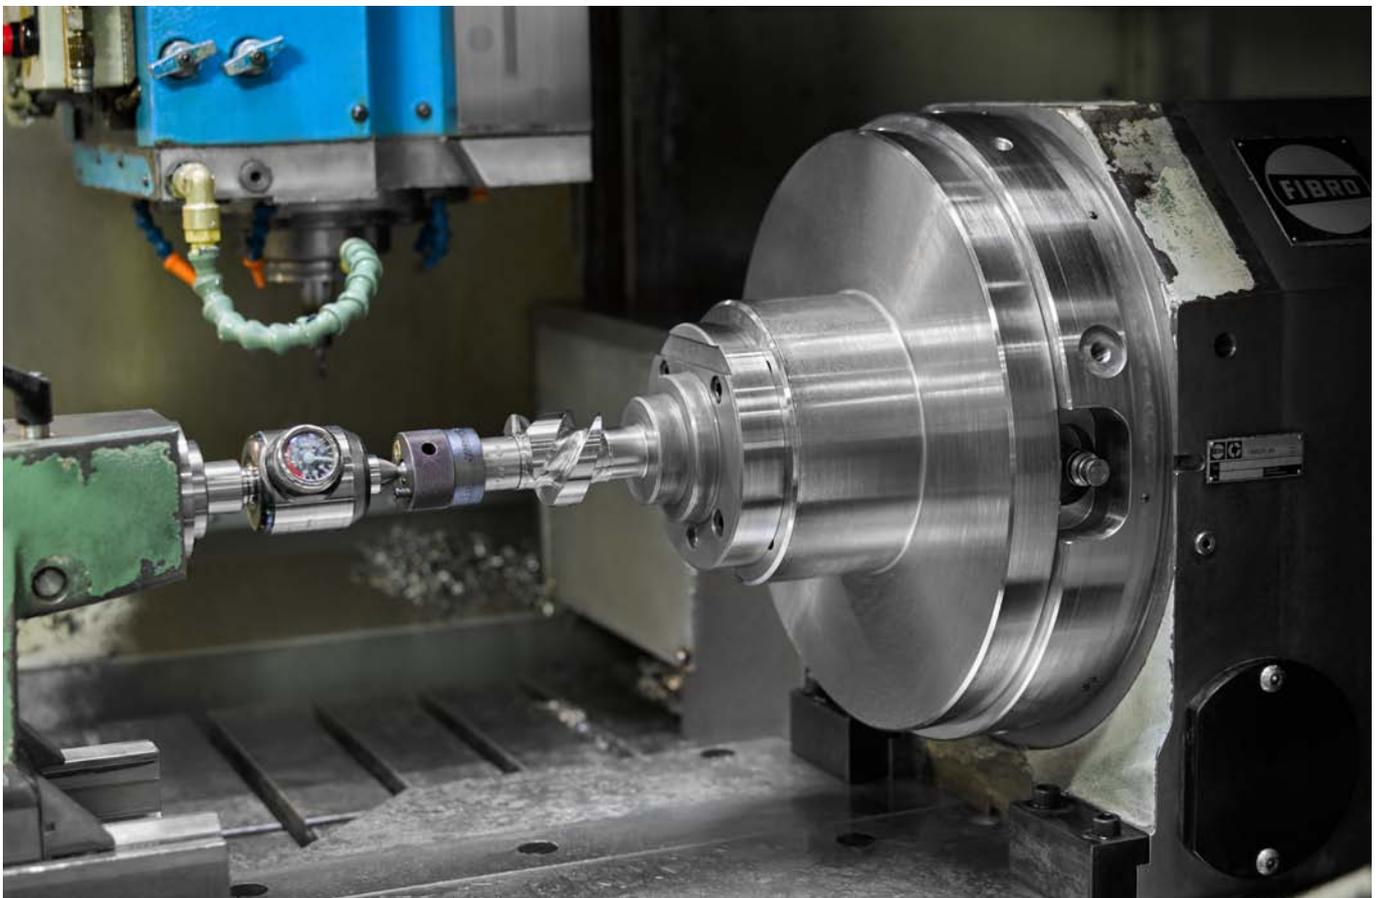

Zero-point clamping technology in use on an interlocking milling machine.
Reliable fit in the case of high lateral forces and long lever ratios.

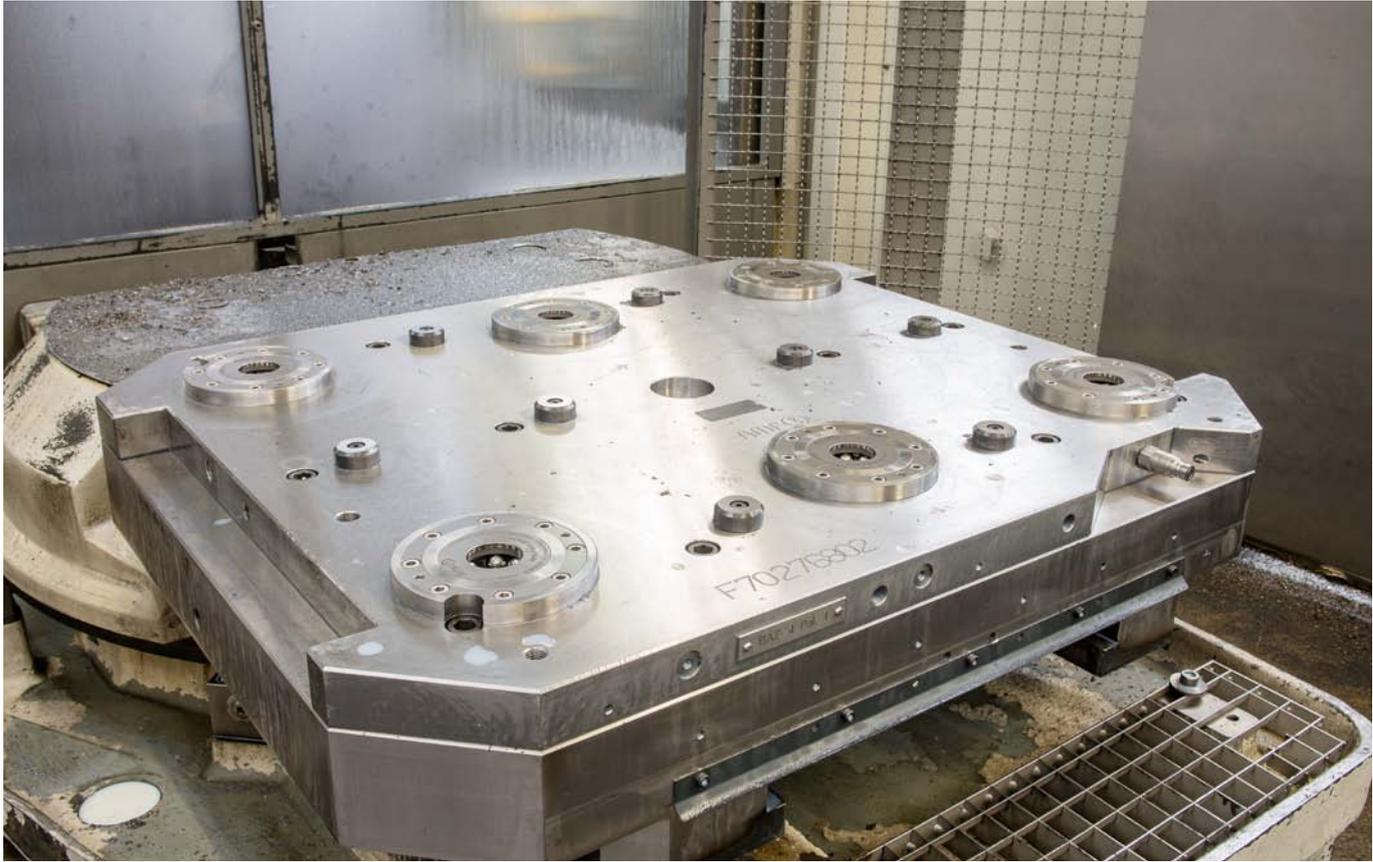

More flexibility in the pallet storage unit thanks to the zero-point-system.
The capacity of the pallet storage unit is expanded by simple and fast conversion of the different pallets.

AMF zero point clamping system in use on a grinding/milling machine.
It is well worth using, particularly in the case of existing machines with long and frequent set-up procedures.

Zero-point clamping technology used in large engine production.
Efficiency by setting up mechanical clamping fixtures in parallel during production time.

The two-section clamping pin system with a large intake catchment and the ball retainer-free module design makes it possible to change the clamping device ergonomically without tilting.

Whether at a standard module distance of 200 x 200 mm or in any other pitch spacings and arrangements of the clamping modules, the AMF zero-point system can be adapted to any practical requirement.

Thanks to the low installation height of our clamping modules, the assembly of the clamping device can be adapted flexibly to the respective machining height and workpiece.

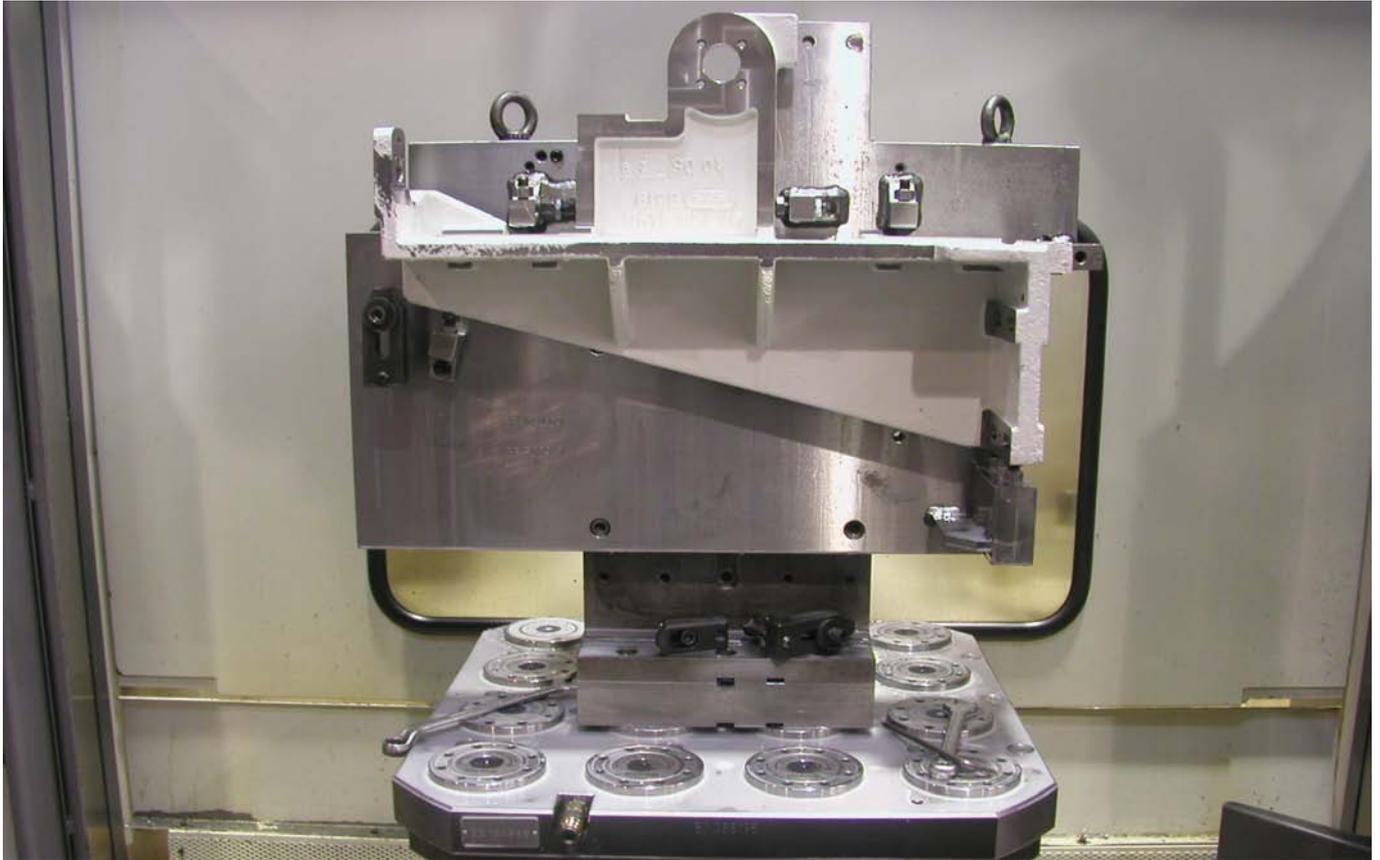

Simple changing of a 3-jaw chuck by means of the AMF zero-point system.

Direct clamping of the workpiece on a horizontal machining centre.

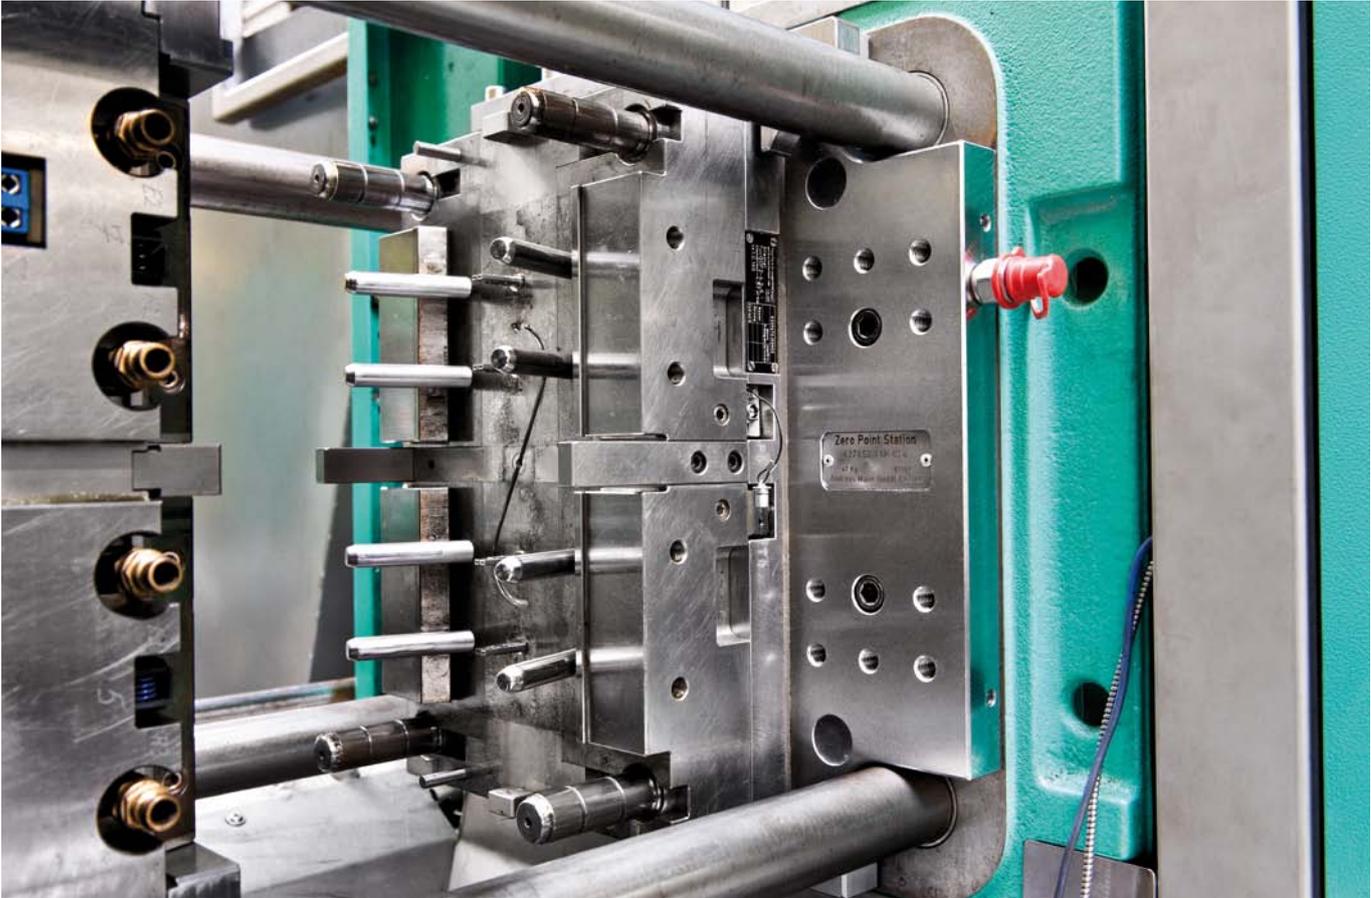

Two of the four zero-point clamping consoles can be adjusted in height. This enables workpiece tolerances to be compensated.

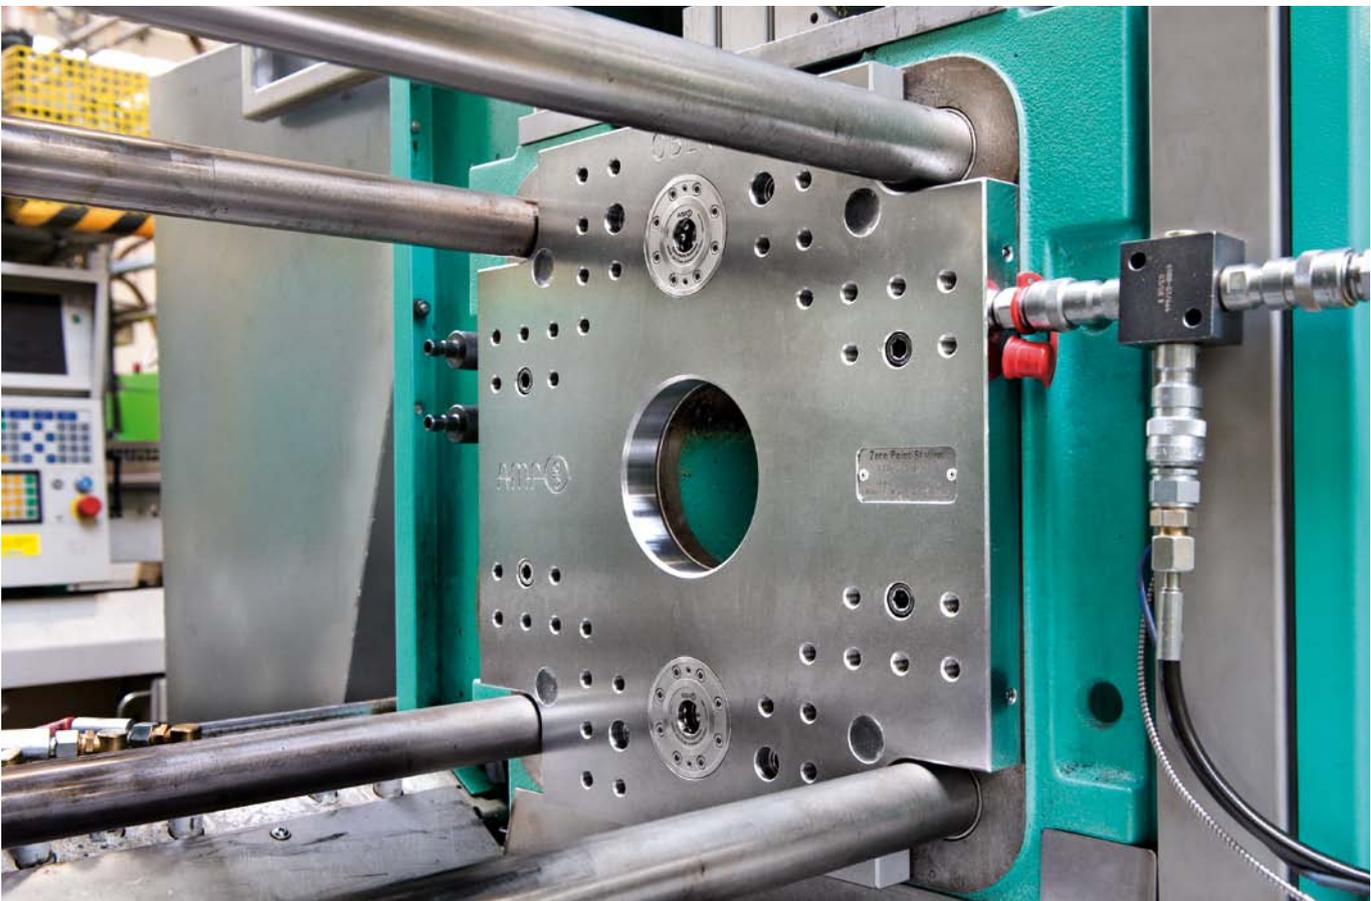

The AMF zero-point system offers a secure fit during drilling operations under unfavourable lever ratios. Thus, even complex workpieces with high cutting parameters can be machined reliably.

Clamping profile with three pneumatic 4-point clamping stations. Thanks to the high pull-in forces of the zero-point system, changing the clamping device becomes simple and user friendly even in the case of horizontal applications.

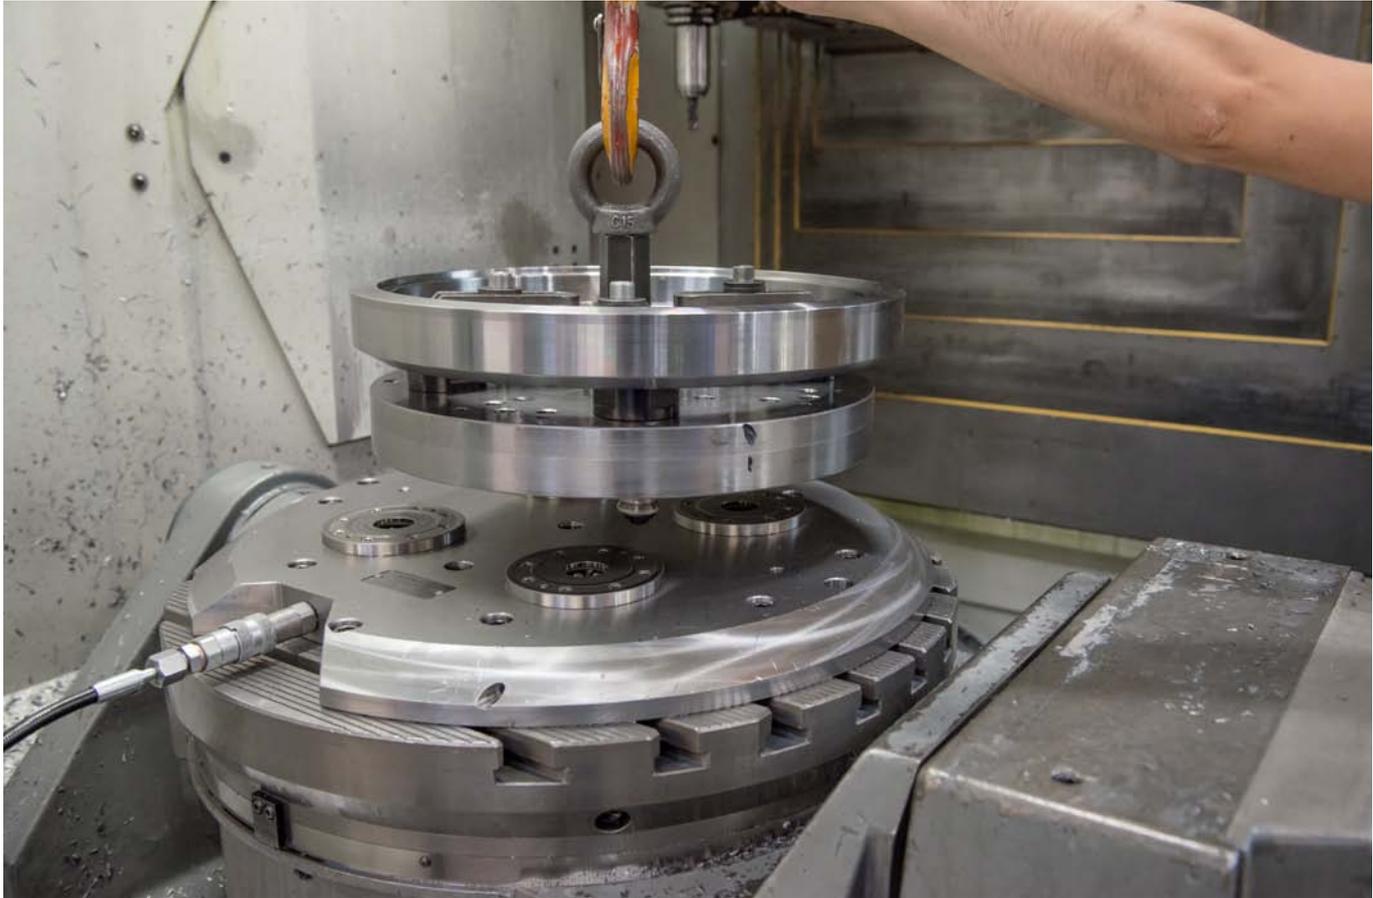

In injection moulding, the tools are successfully changed in a way that optimises set-up time through the use of the AMF zero-point system.
With friendly recommendation of Robert Bosch GmbH, Waiblingen

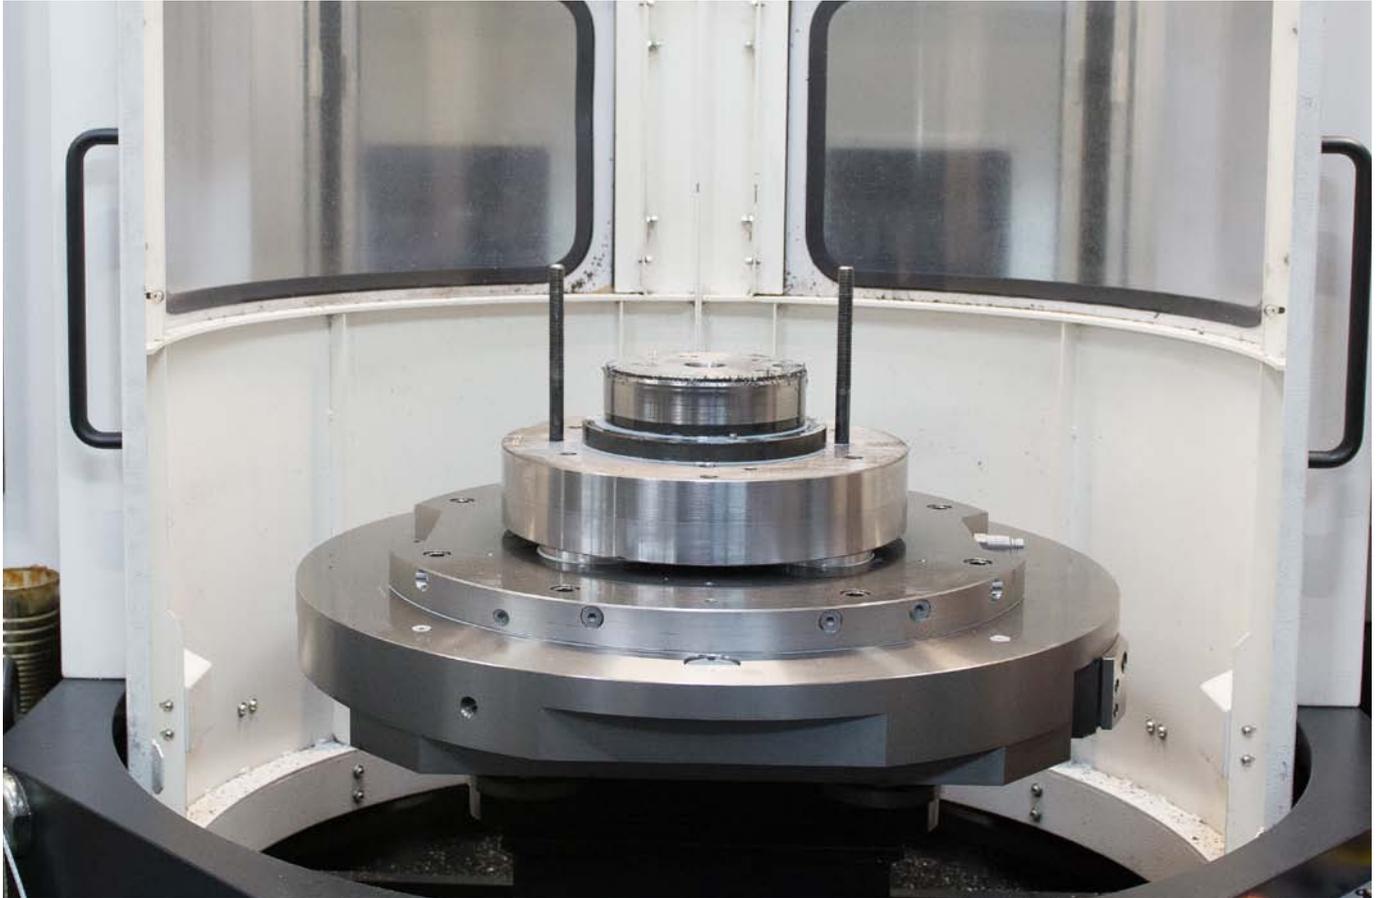

The cylindrical design of the pull-studs and the adapter in the clamping module guarantee a balance of height and length tolerances even at long distances.

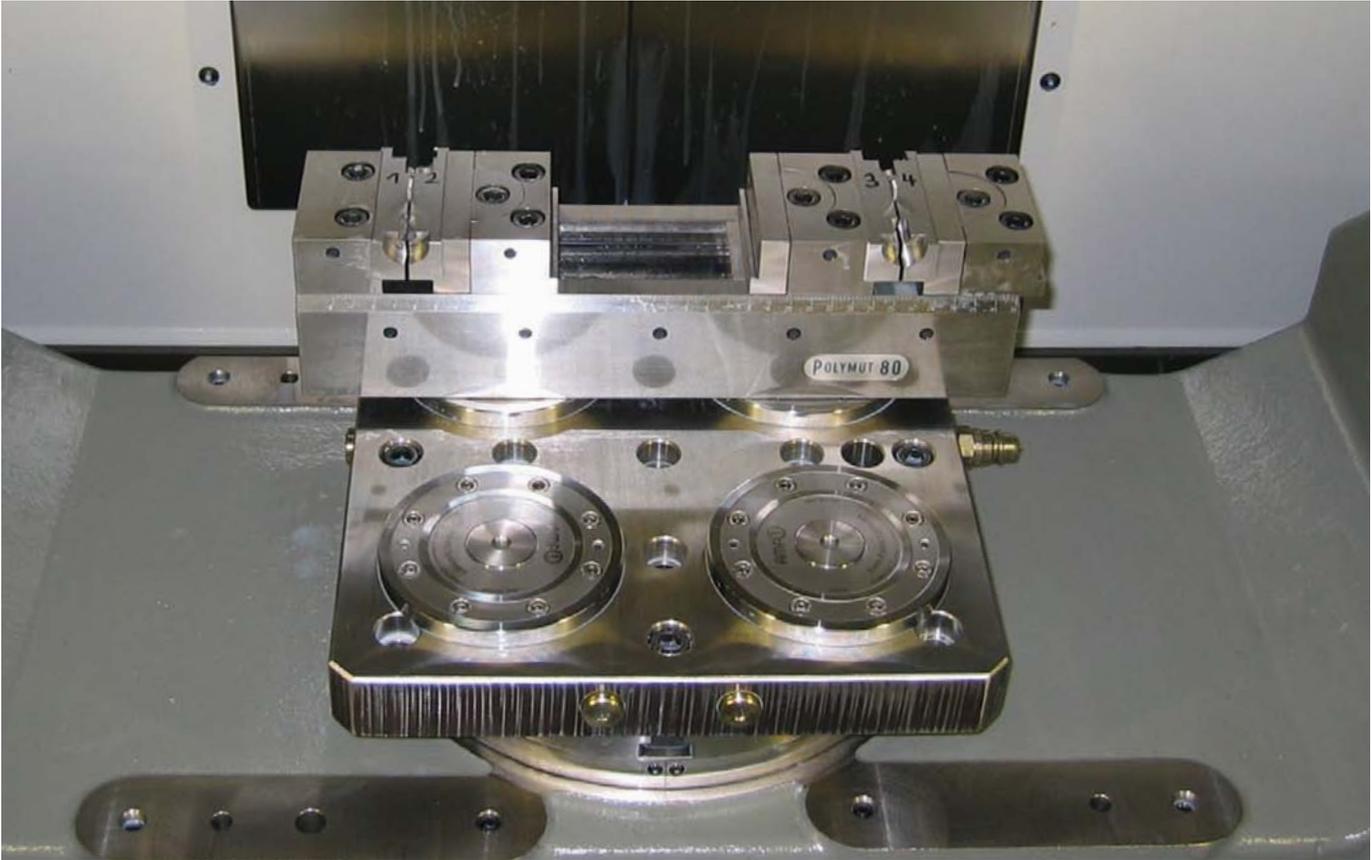

5-axis-machining of machine building components. 4-point clamping station with individual outer contour for maximum accessibility.

AMF zero-point clamping system in use on a milling-grinding centre with pallet.
The zero-point system is the standard interface here on all machine pallets.

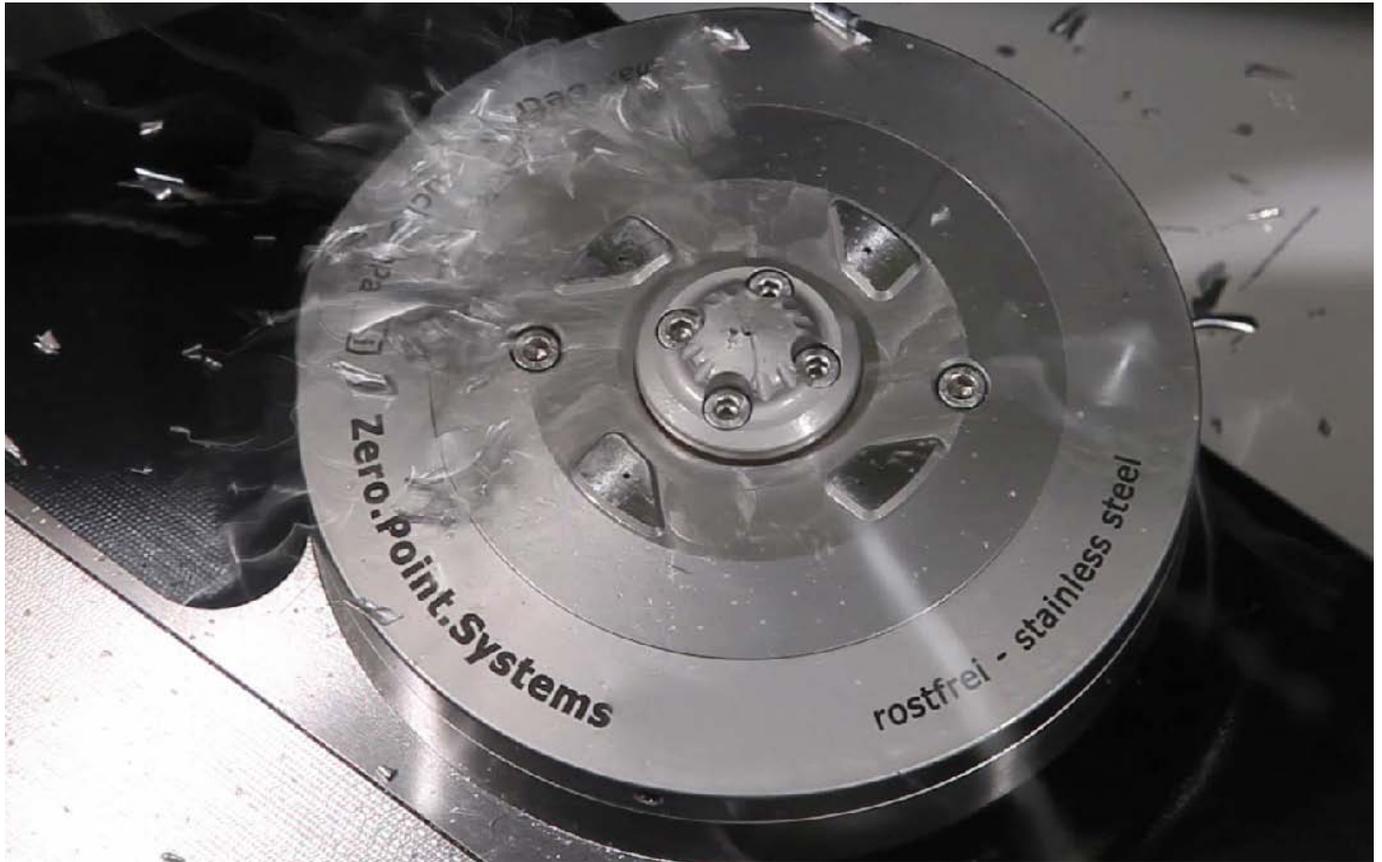

The 4-point clamping station replaces the machine table. This guarantees maximum utilisation of the machine's stroke.

The interior of the clamping module is completely sealed. This means that the system is optimally protected against liquids and dirt.

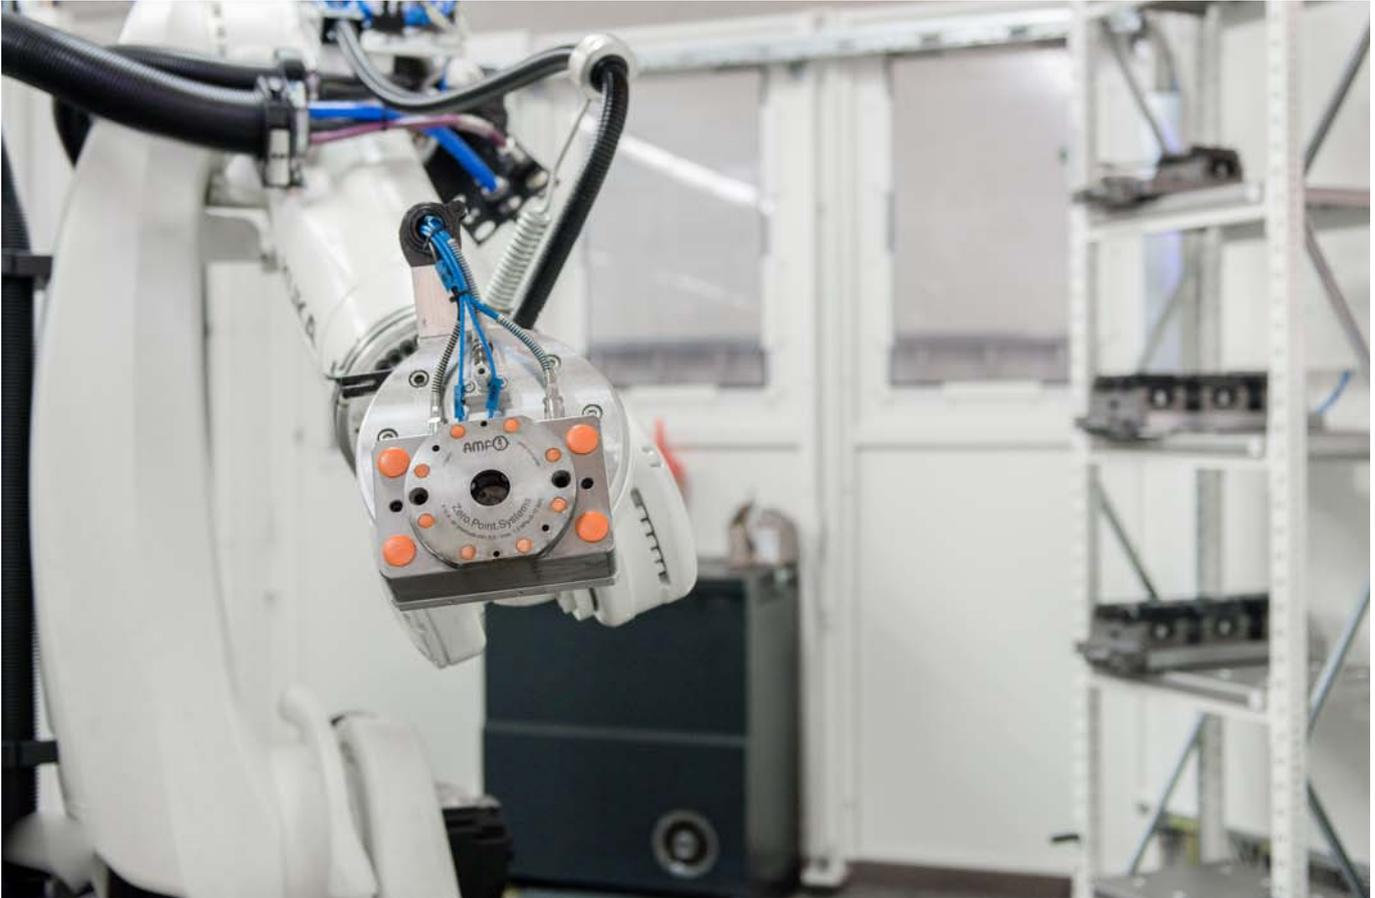

Use in the food industry

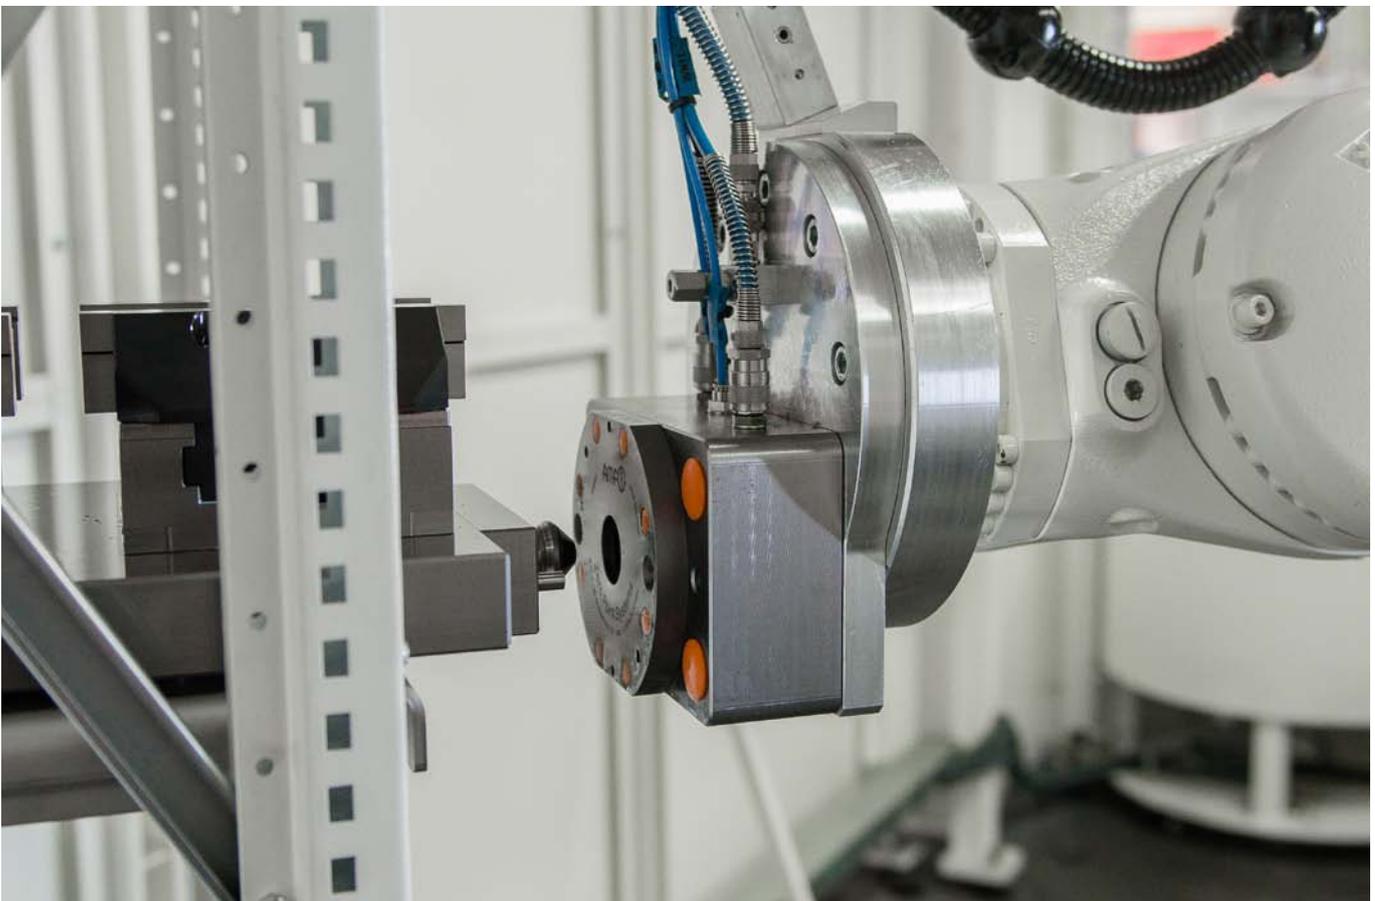

The integrated cleaning turbine blows off shavings and dirt reliably from contact surfaces.

„Turbine“ high-end clamping module used in a fully automated production process with robotic loading.

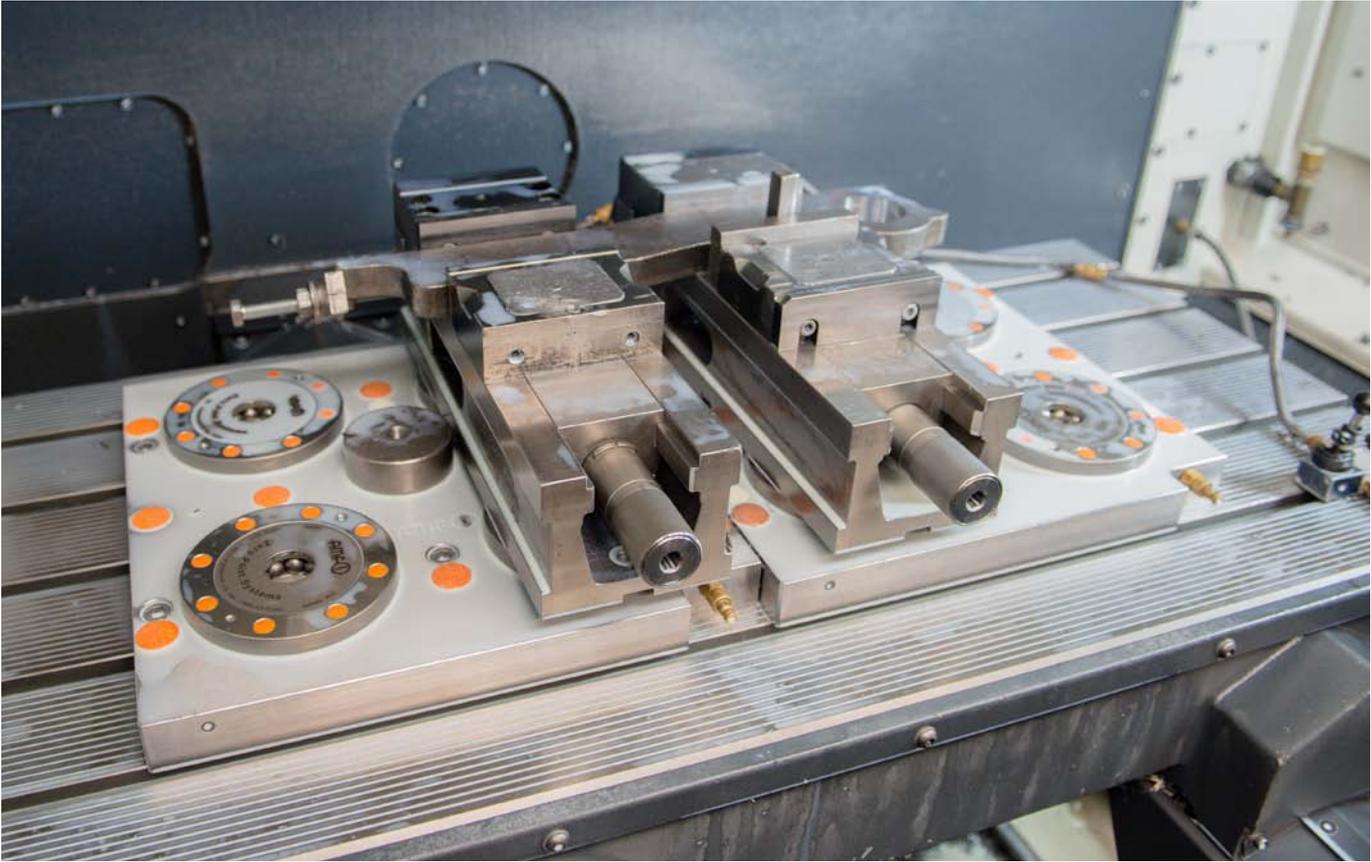

Automation solution with AMF zero-point system as standard interface for robotic loading.

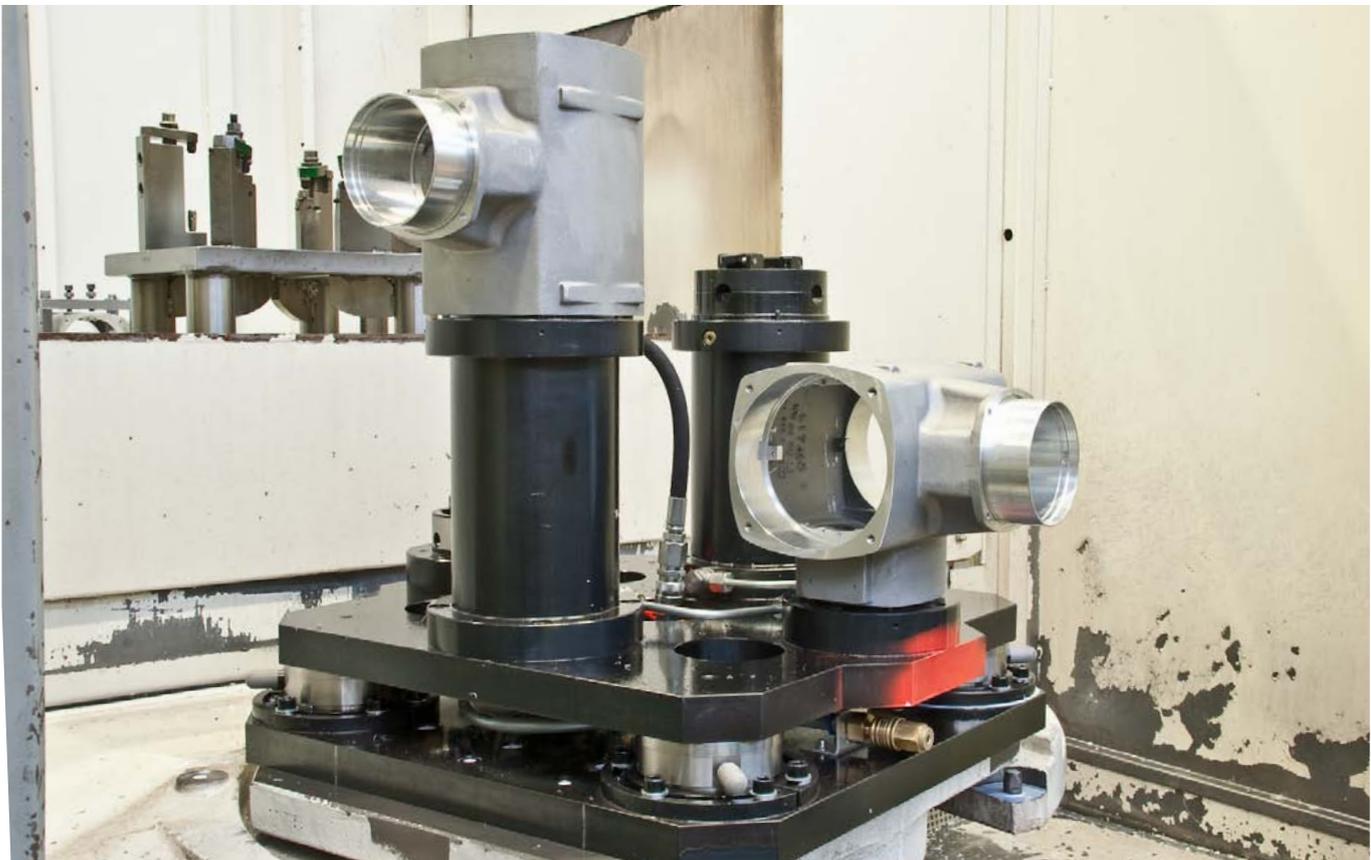

Numerous sensor options and reliable fit with high handling weights guarantee smooth integration into automated robotic loading as well as subsequent machining.

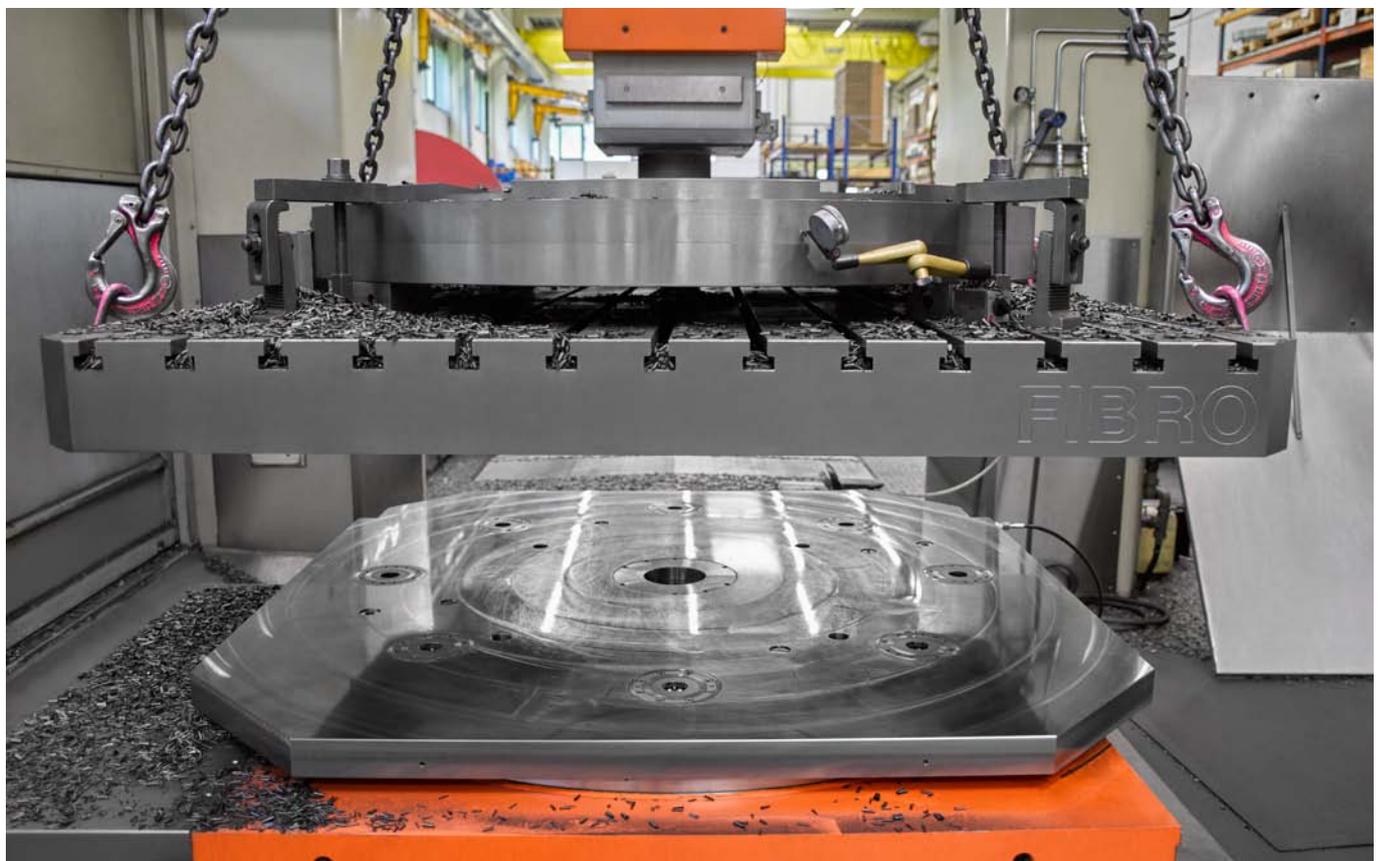

Two pneumatic standard clamping stations retrofitted on a 3-axis milling machine.
The easy entry point into zero-point clamping technology, available from stock.

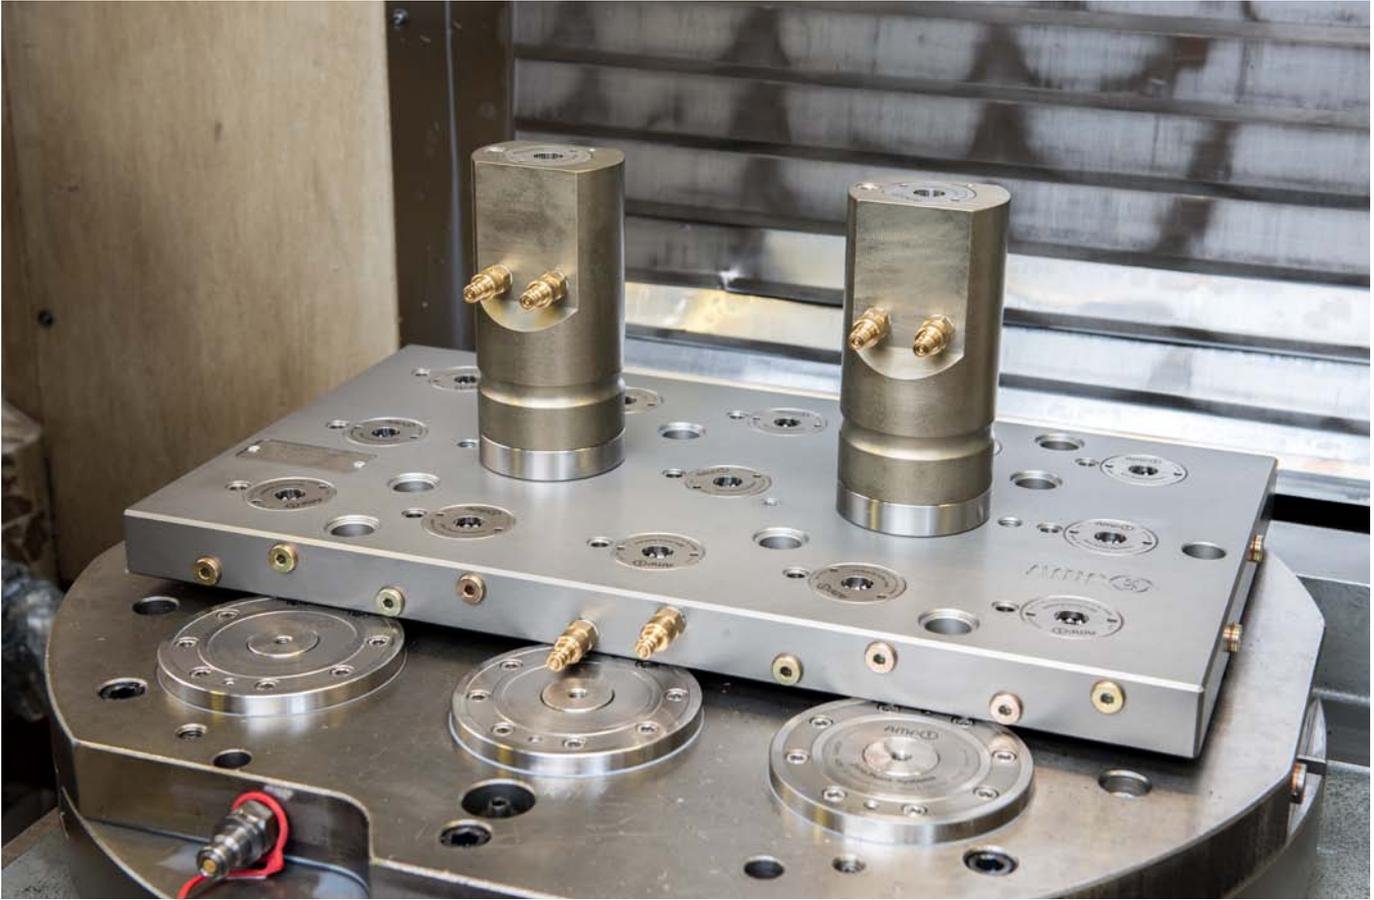

Surface-mounted clamping modules in combination with AMF hydraulic clamping systems on a machining centre.

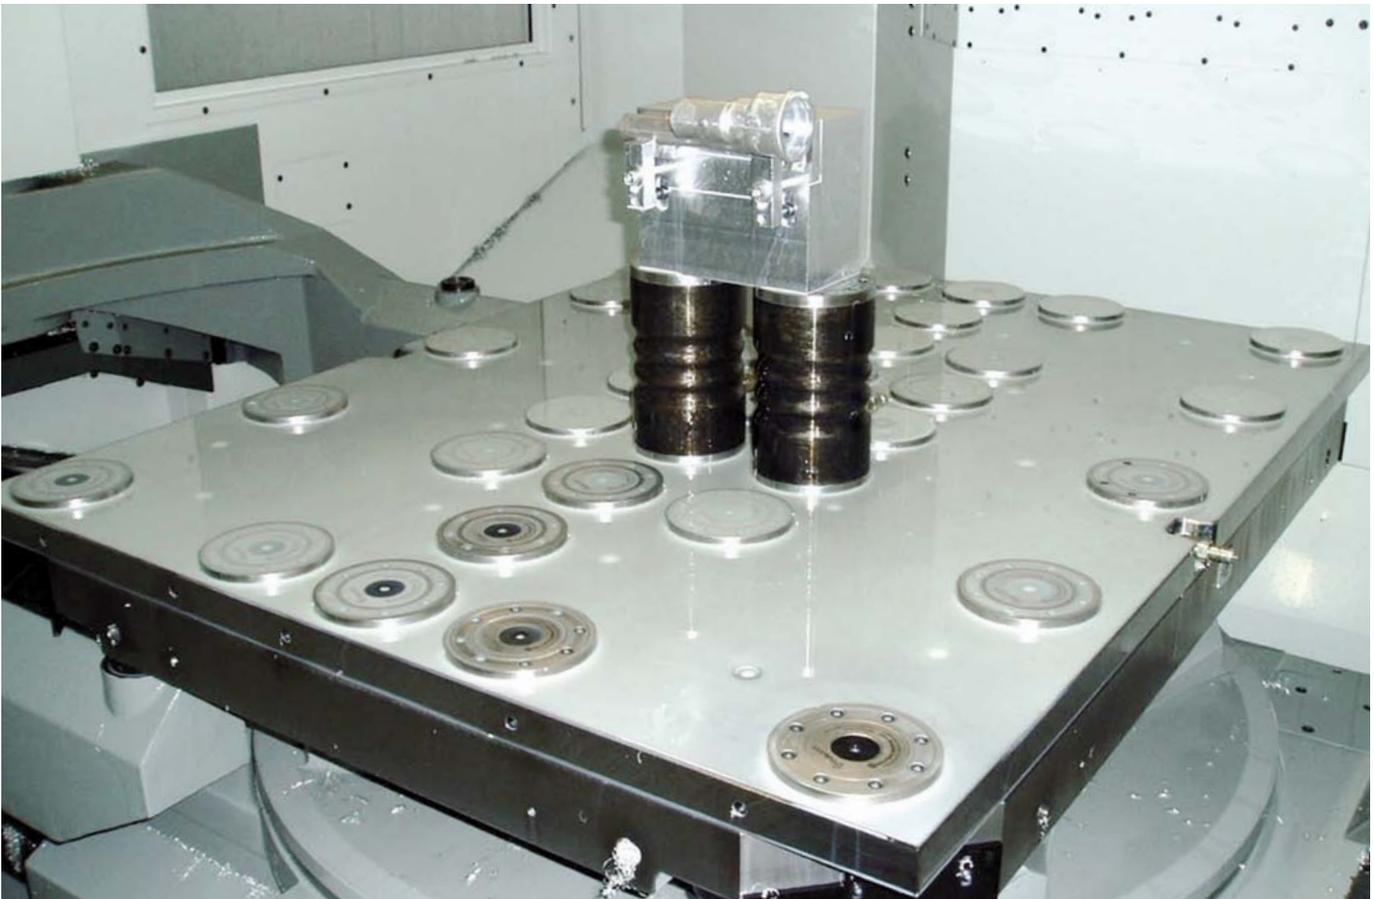

AMF-Clean-Stick in use: automated cleaning of clamping fixture and machine table.

Top and bottom-sided integrated clamping module in a rotary indexing table. The set-up times have been reduced from several hours to a few minutes and the flexibility of the entire machine has been increased to a maximum.

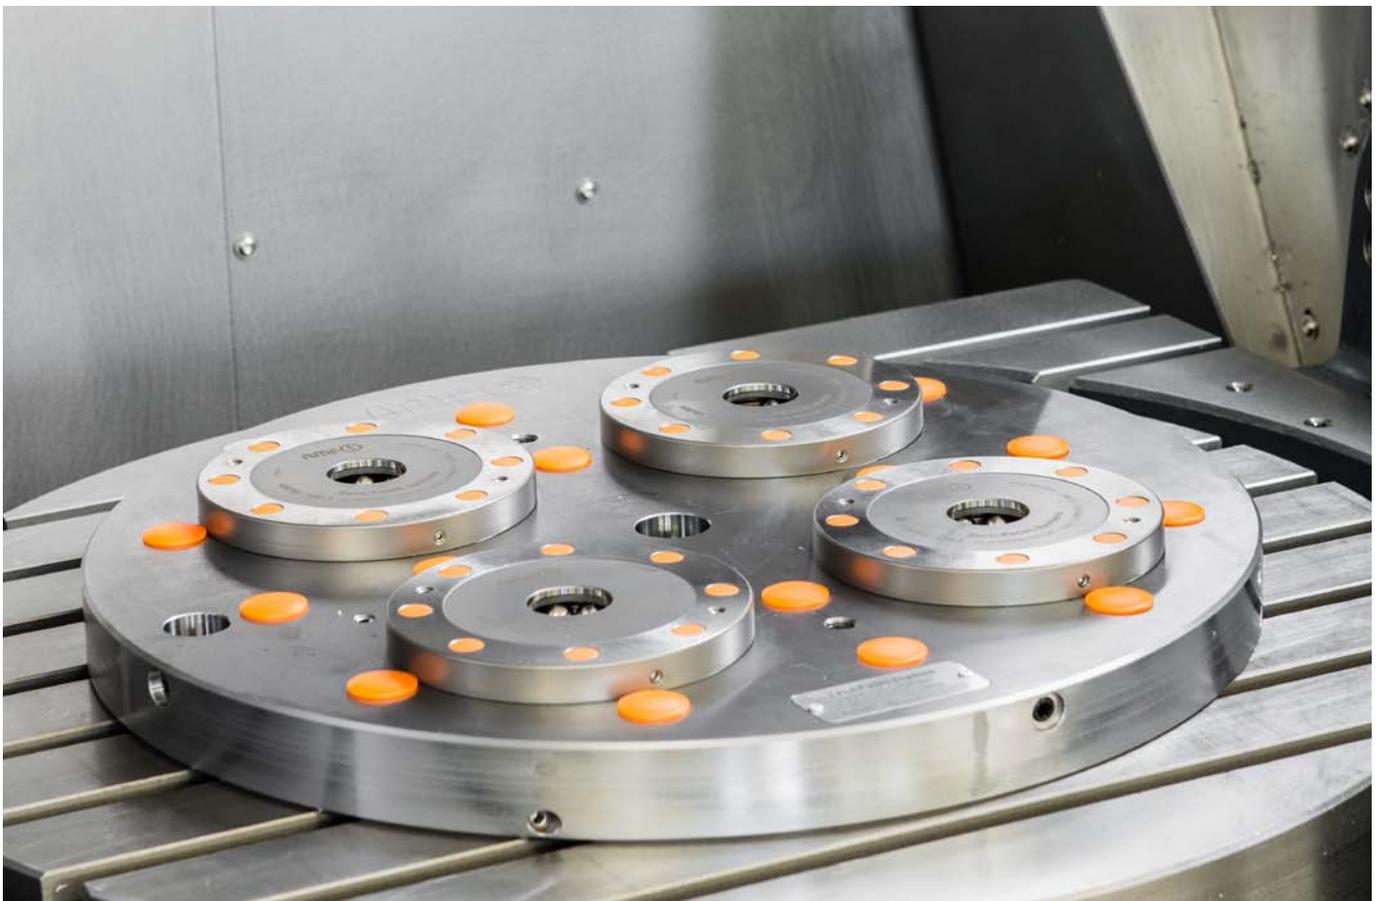

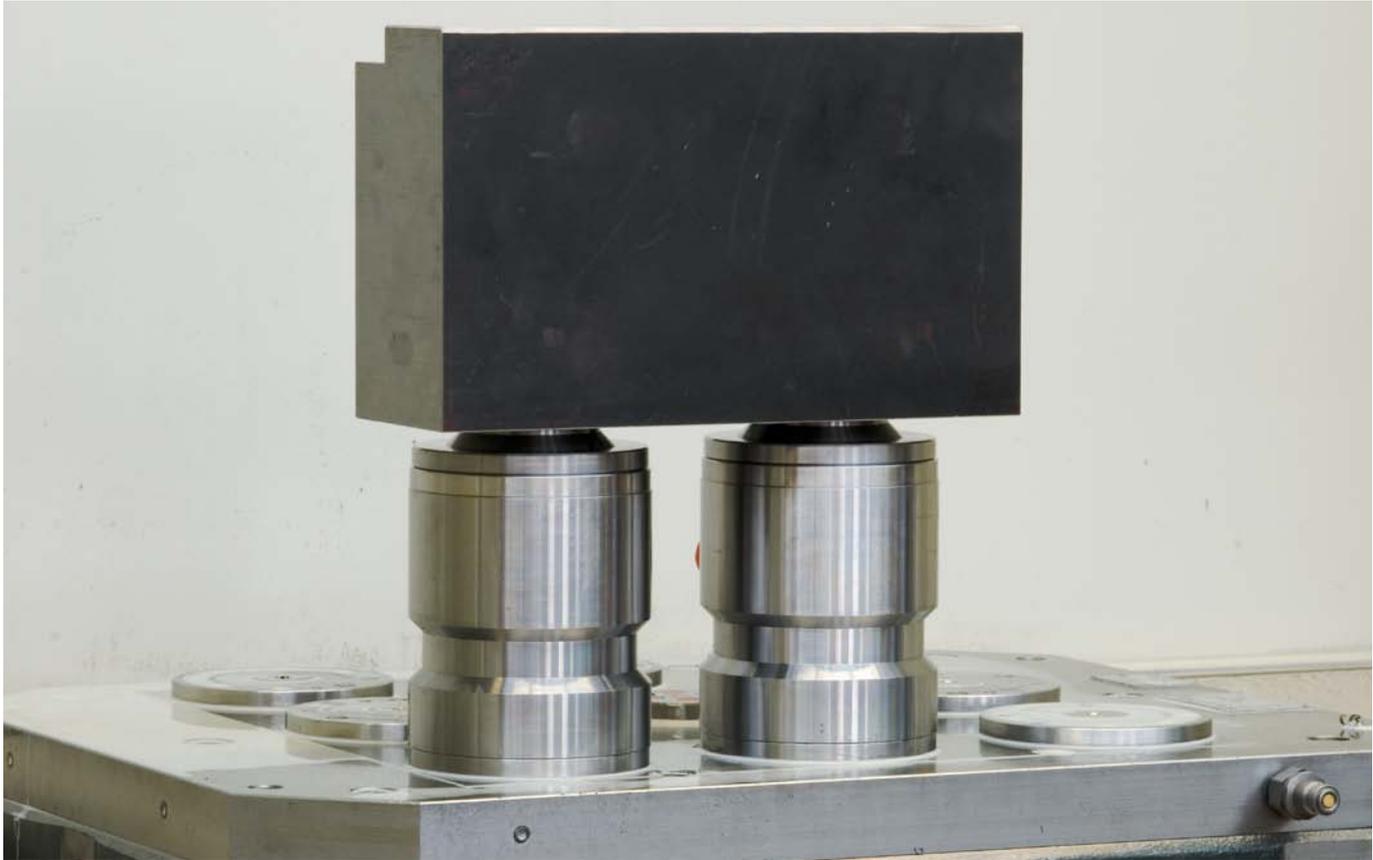

5-side machining by means of clamping brackets for direct clamping of the component.

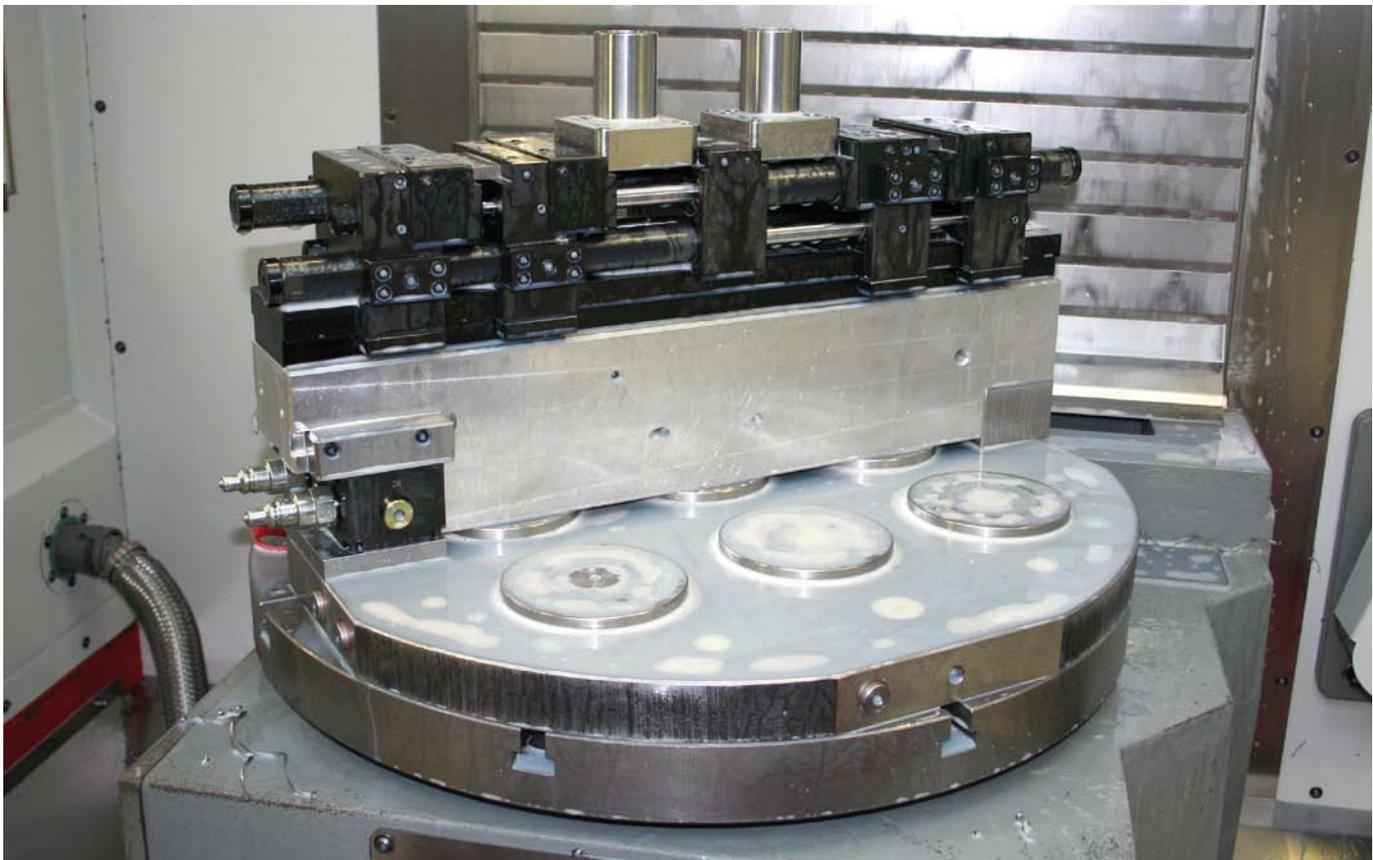

4-point clamping station with integrated bearings and direct locking control system for use on milling-grinding machines up to a maximum speed of 2200 rpm.

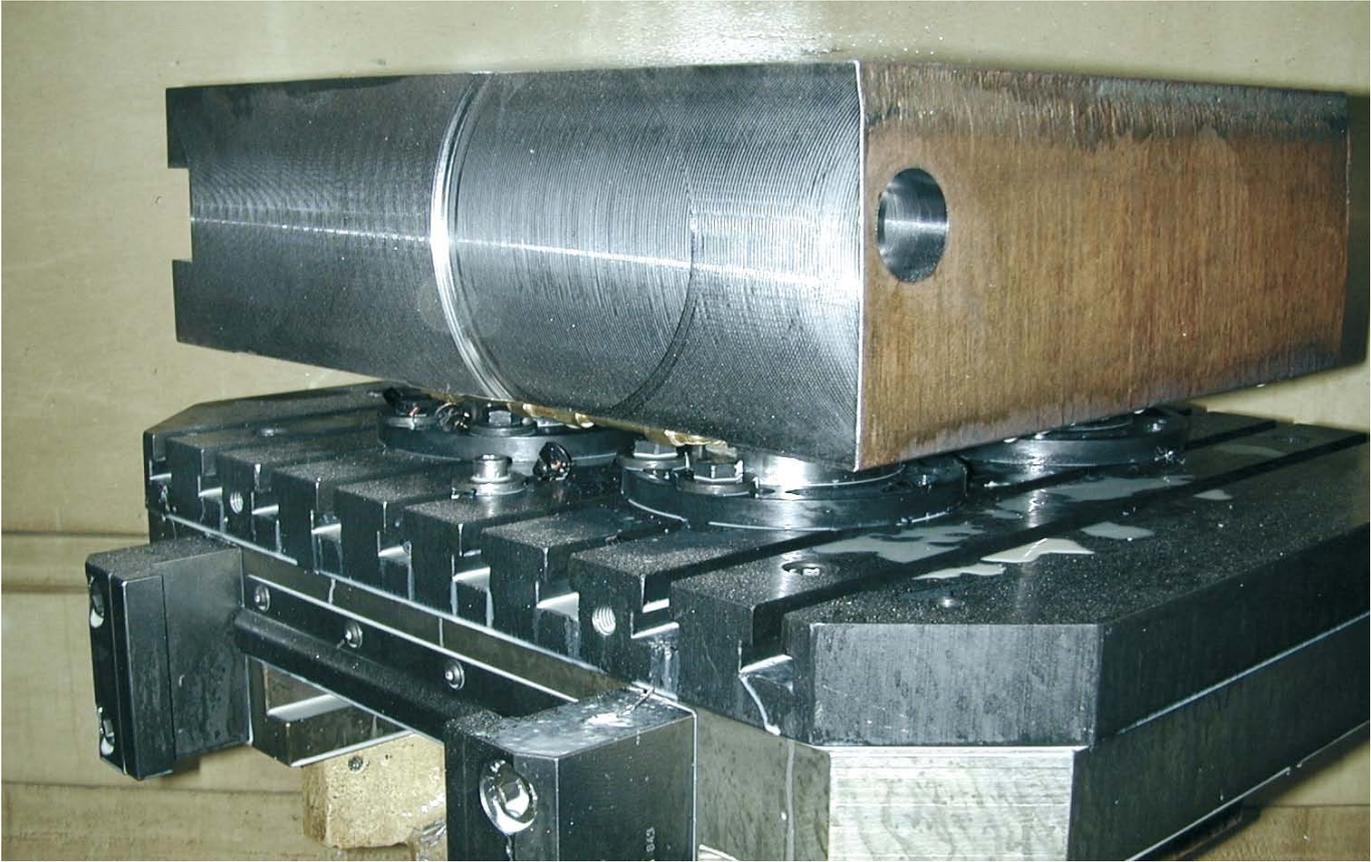

AMF protective shields as useful accessory for direct clamping of the component. It ensures complete machining of the workpiece axially to the clamping bracket.

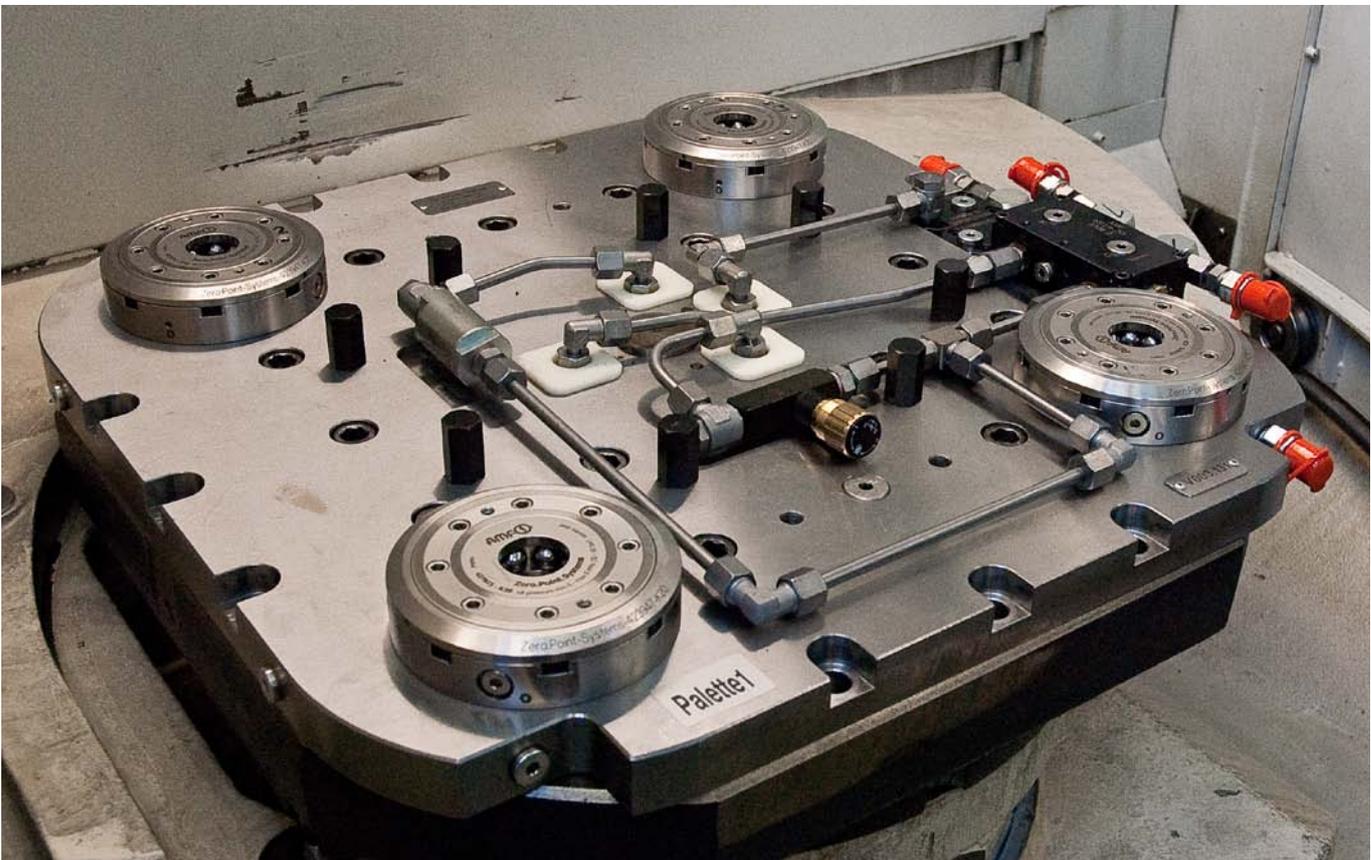

Hydraulic vice for machining multiple or various workpieces in one clamping process clamped on the zero-point system.

Zero point clamping bracket used in heavy duty machining.

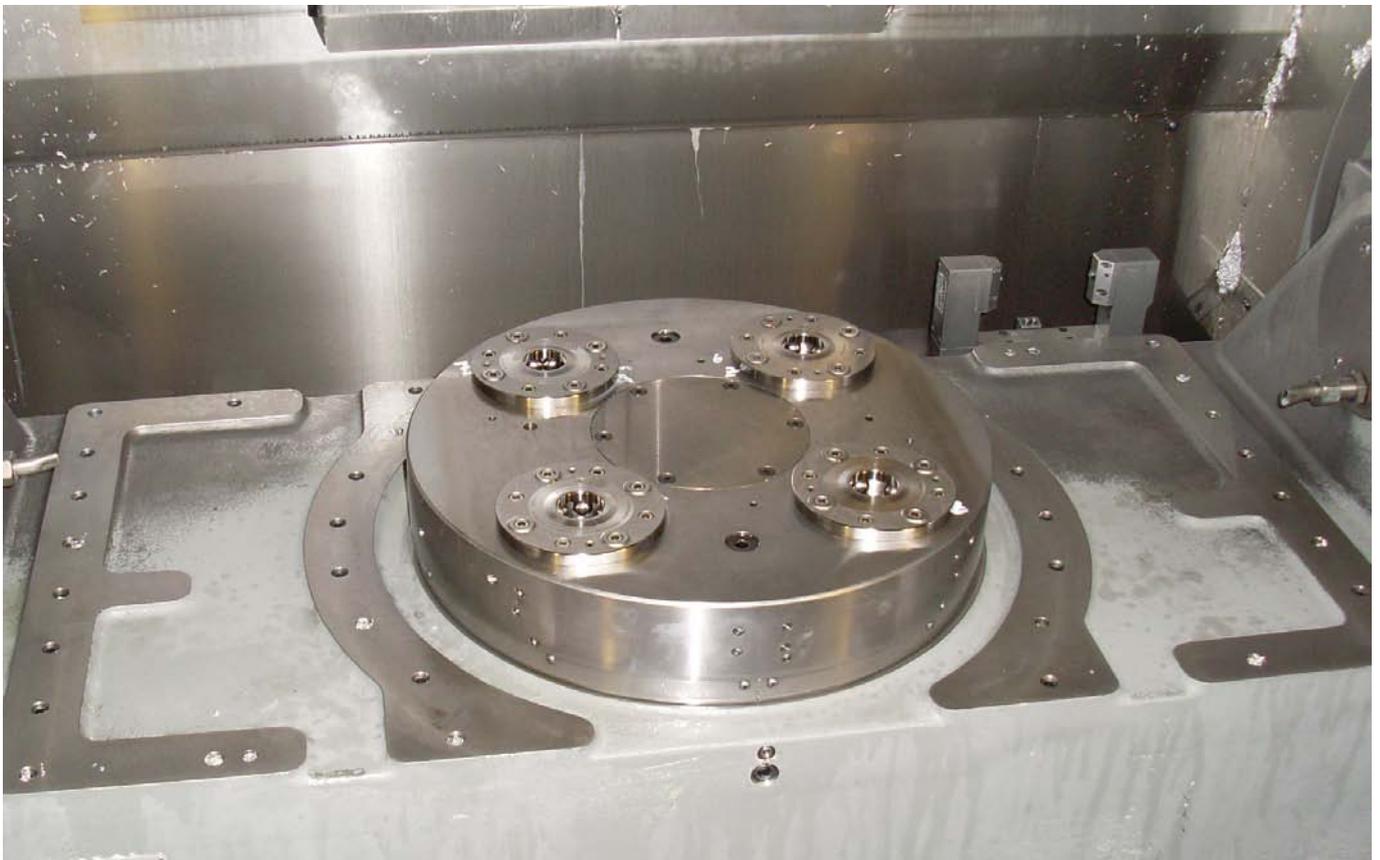

Surface-mounted clamping modules with clamping flanges for easy and flexible positioning of the T-slot tables.

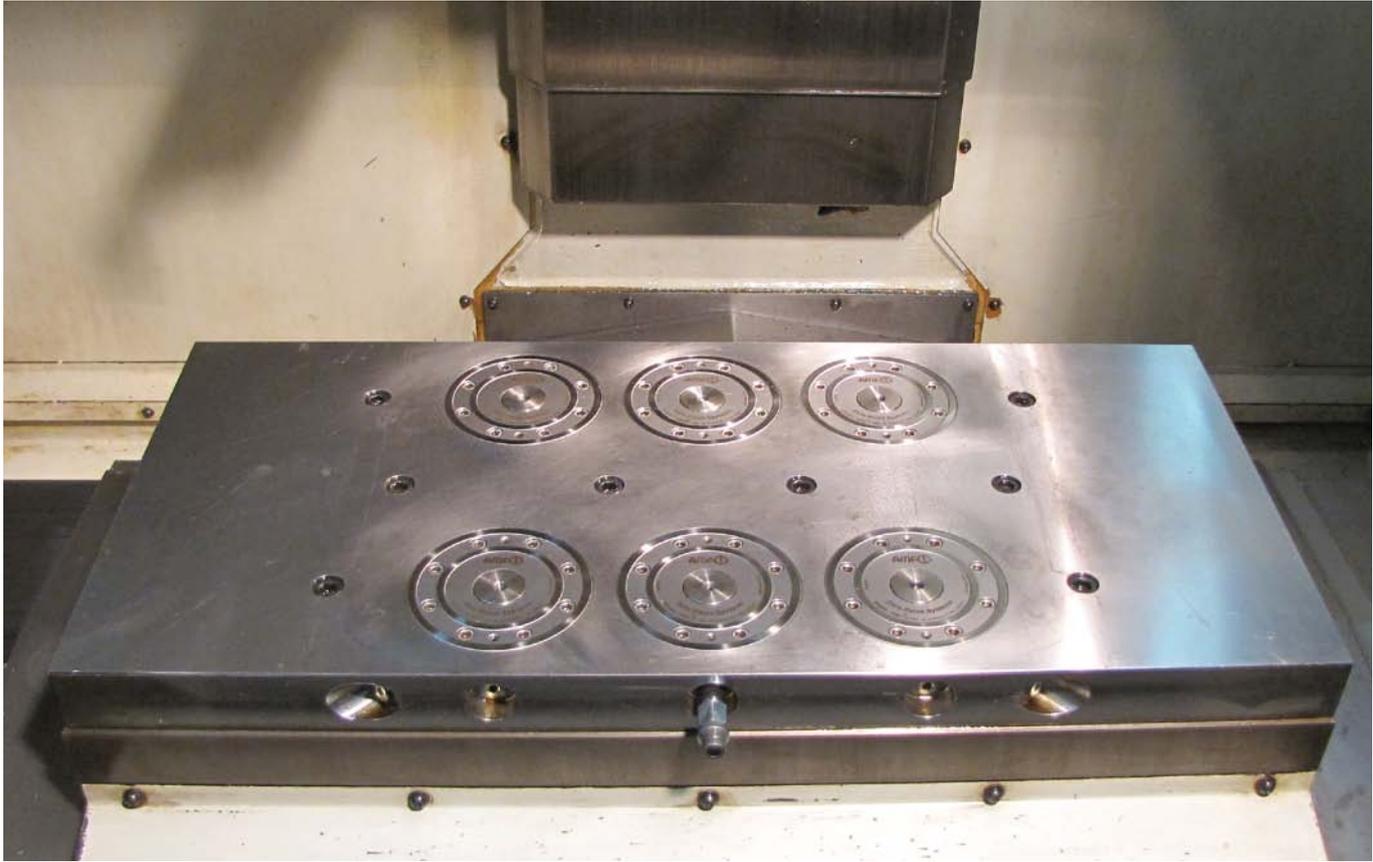

Combined application between zero-point clamping technology and hydraulic media transfer.
This enables the supply of media for existing hydraulic clamping fixtures.

Integration clamping module as flange version for installation on clamping profiles.

Automation solution with lock and support control as well as pull-stud sensor used in a fully automated production process with robotic loading.

The cylindrical mating receptacle makes recessed installation of the clamping modules easily possible without any loss of precision.

Zero-point clamping technology as standard interface on a coordinate measuring machine. Automation even in post-processing.

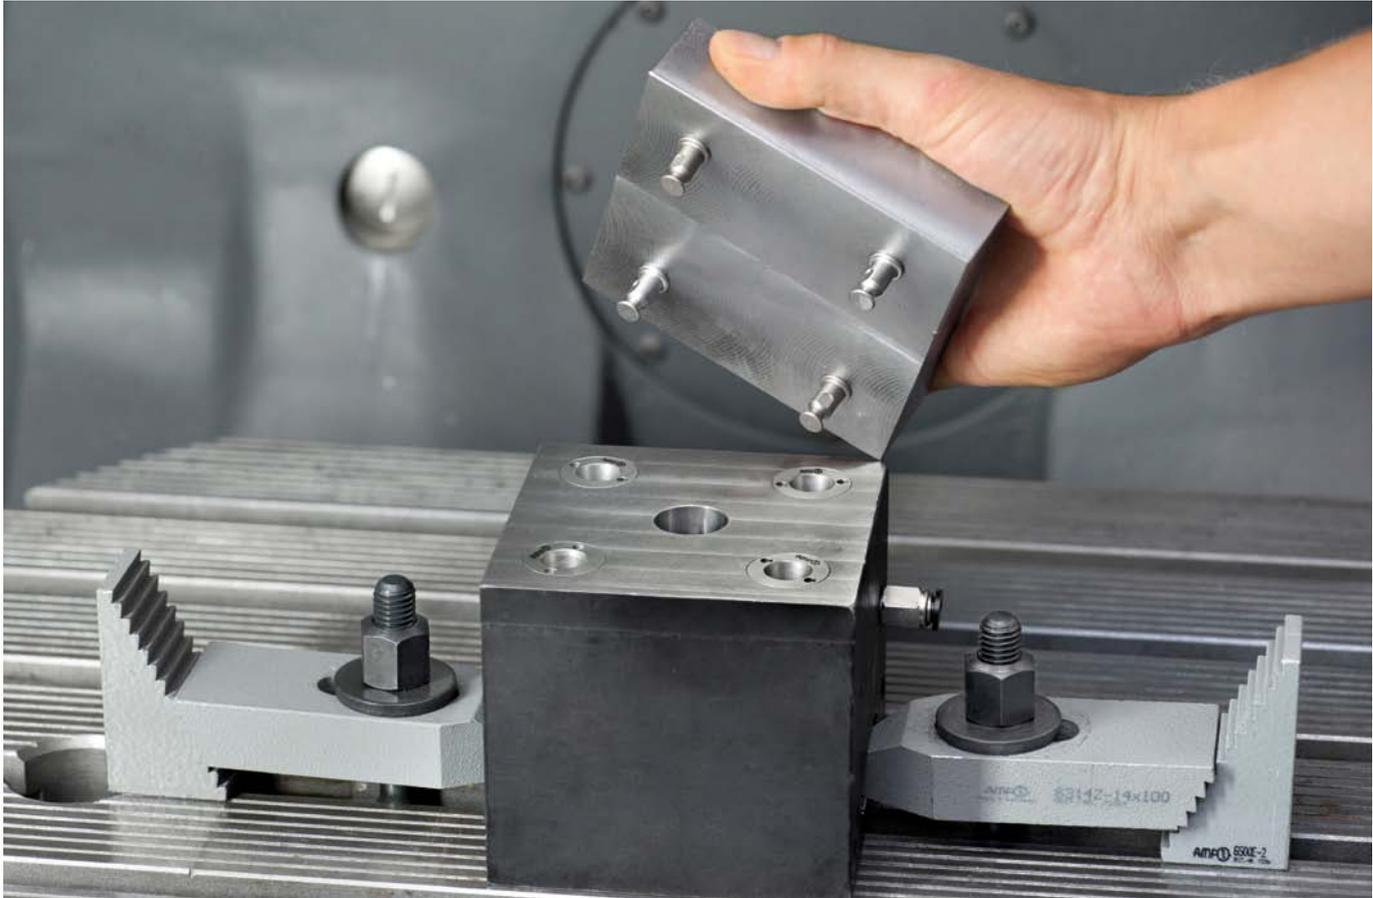

The high precision of the AMF zero-point system permits use in grinding technology.

Combined application of vacuum and zero-point clamping technology.
The vacuum clamping plate is equipped with pull-stud mountings at the factory.

The mechanical collet is clamped directly using zero-point clamping technology.
Ideal for clamping thin-walled or sensitive workpieces with complex outer contours.

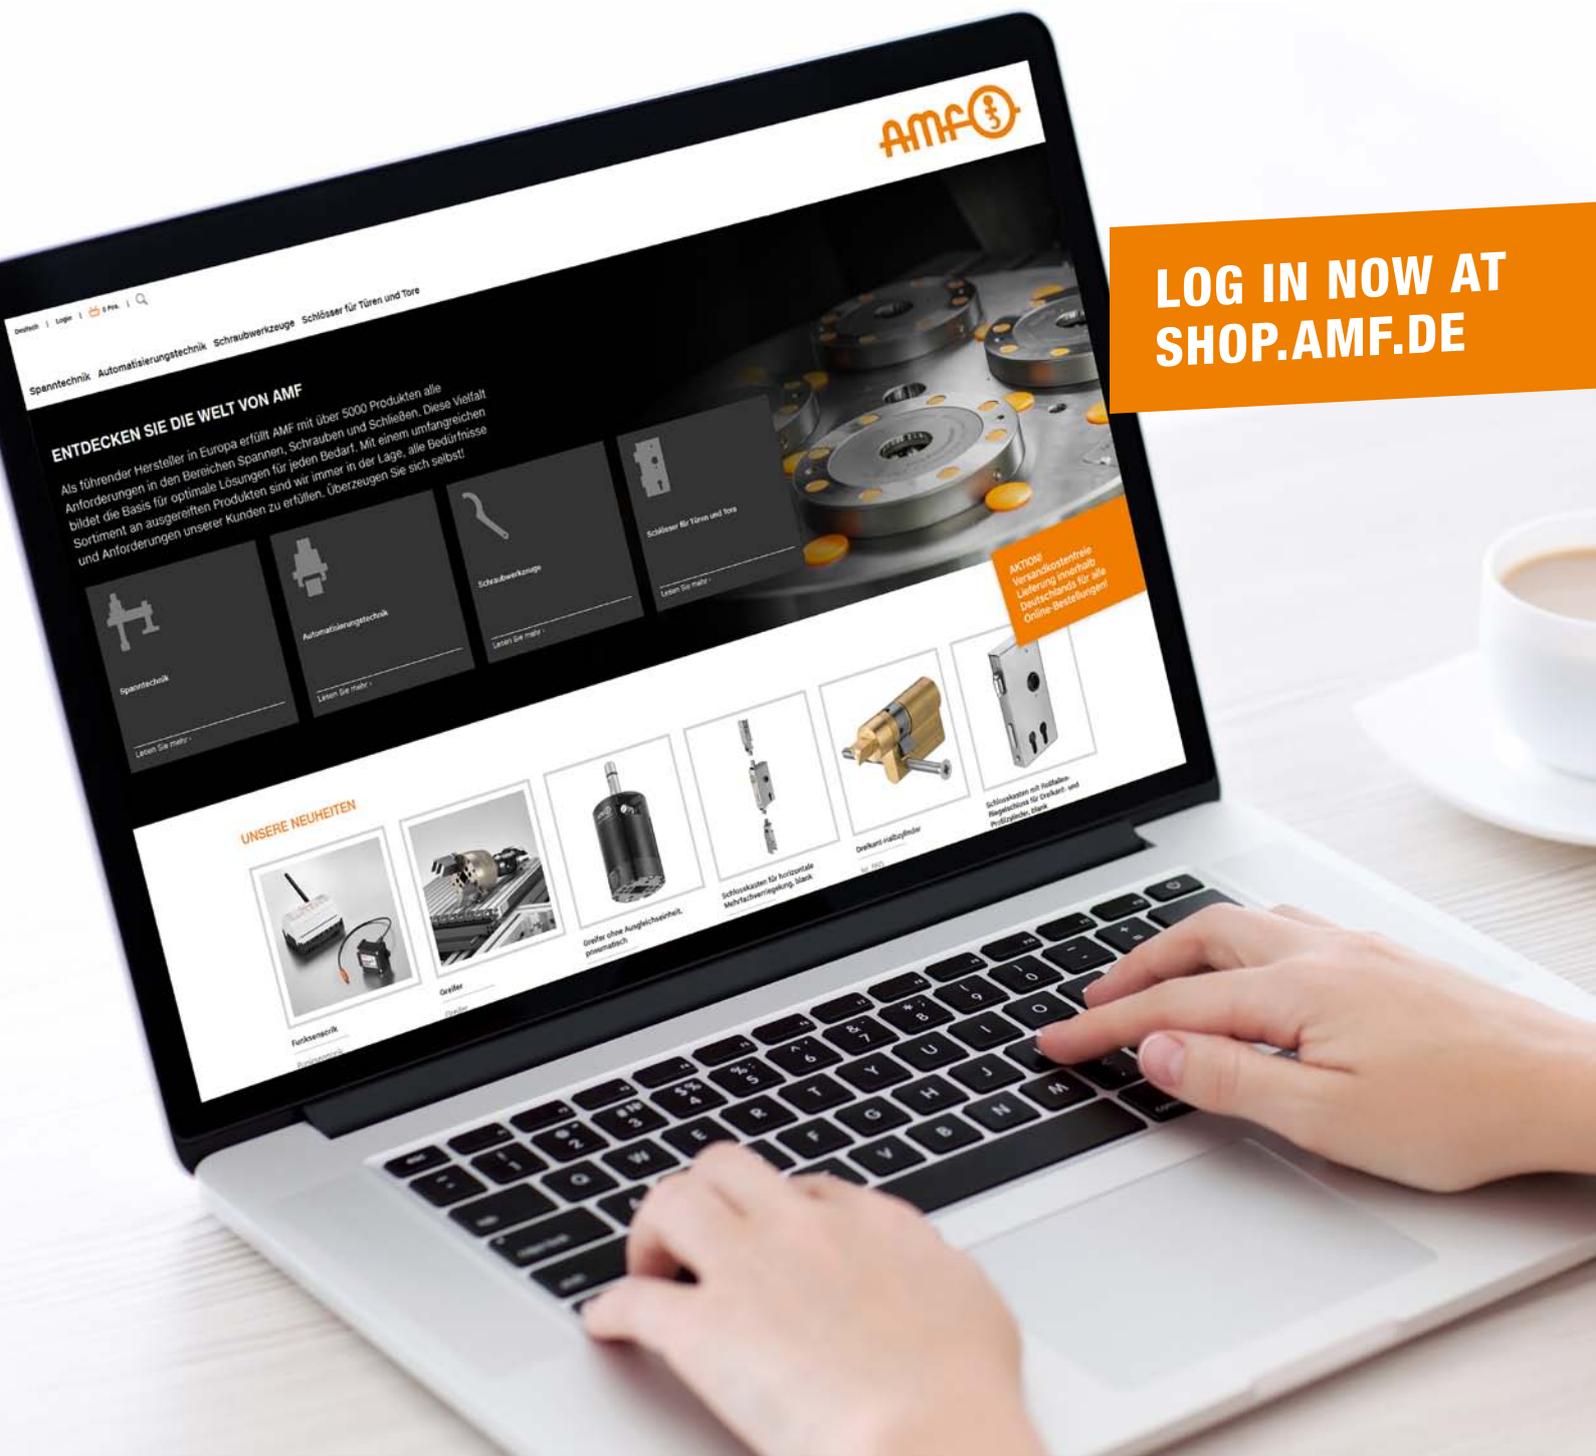

4-point clamping station K02 with interchangeable pallet.

YOU ALREADY HAVE A CLAMPING SYSTEM?! YOU CAN STILL TAKE ADVANTAGE OF OUR BENEFITS ...

With our „Gonzales“ and „Unitool“ clamping modules, we offer you flexibility in retrofitting and expanding your existing zero-point clamping technology. As a result, a complete replacement of the system you currently use is no longer absolutely necessary. You keep your investment as low as possible and still take advantage of the benefits of the AMF Zero-Point System.

„GONZALES“ CLAMPING MODULE (FIG. LEFT)

Your existing Speedy 1000/2000 or DockLock 1000 modules can be exchanged for our corresponding „Gonzales“ modules if you meet the following requirements:

- > Unlike Speedy 1000/2000 and DockLock 1000, „Gonzales“ requires a hydraulic unclamping pressure of min. 50 bar / max. 60 bar.
- > With countersunk installation, replacement is only possible if there is enough space for the larger covers of the „Gonzales“ modules (cover dia. 112 mm or 140 mm).
- > Modules with media ducts cannot be exchanged
- > Use „Gonzales“ modules exclusively with „Gonzales“ modules in one clamping.

With the „Gonzales“ modules, the corresponding pull-studs of the systems Speedy 1000/2000 and DockLock 1000 can be clamped. „Gonzales“ pull-studs can be clamped with the corresponding Speedy 1000/2000 and DockLock 1000 modules.

„UNITOOL“ CLAMPING MODULE (FIG. RIGHT)

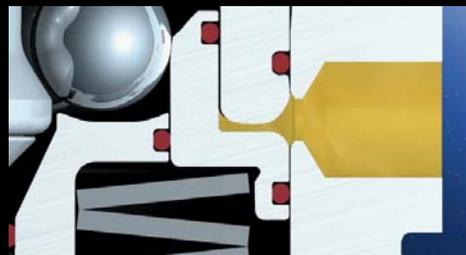

Our „Unitool“ clamping module fits the pull-stud of the Unilock system (dia. 40 mm). The Unitool pull-stud also fits the Unilock system module (NSE-138).

STAINLESS STEEL

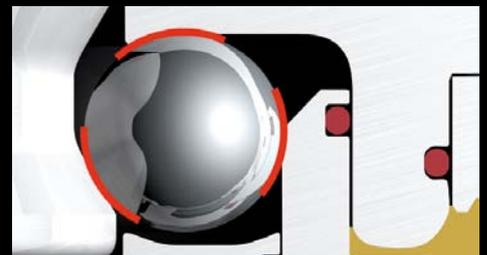

High-alloy, hardened tool steel - and so no corrosion.

SAFETY SYSTEM

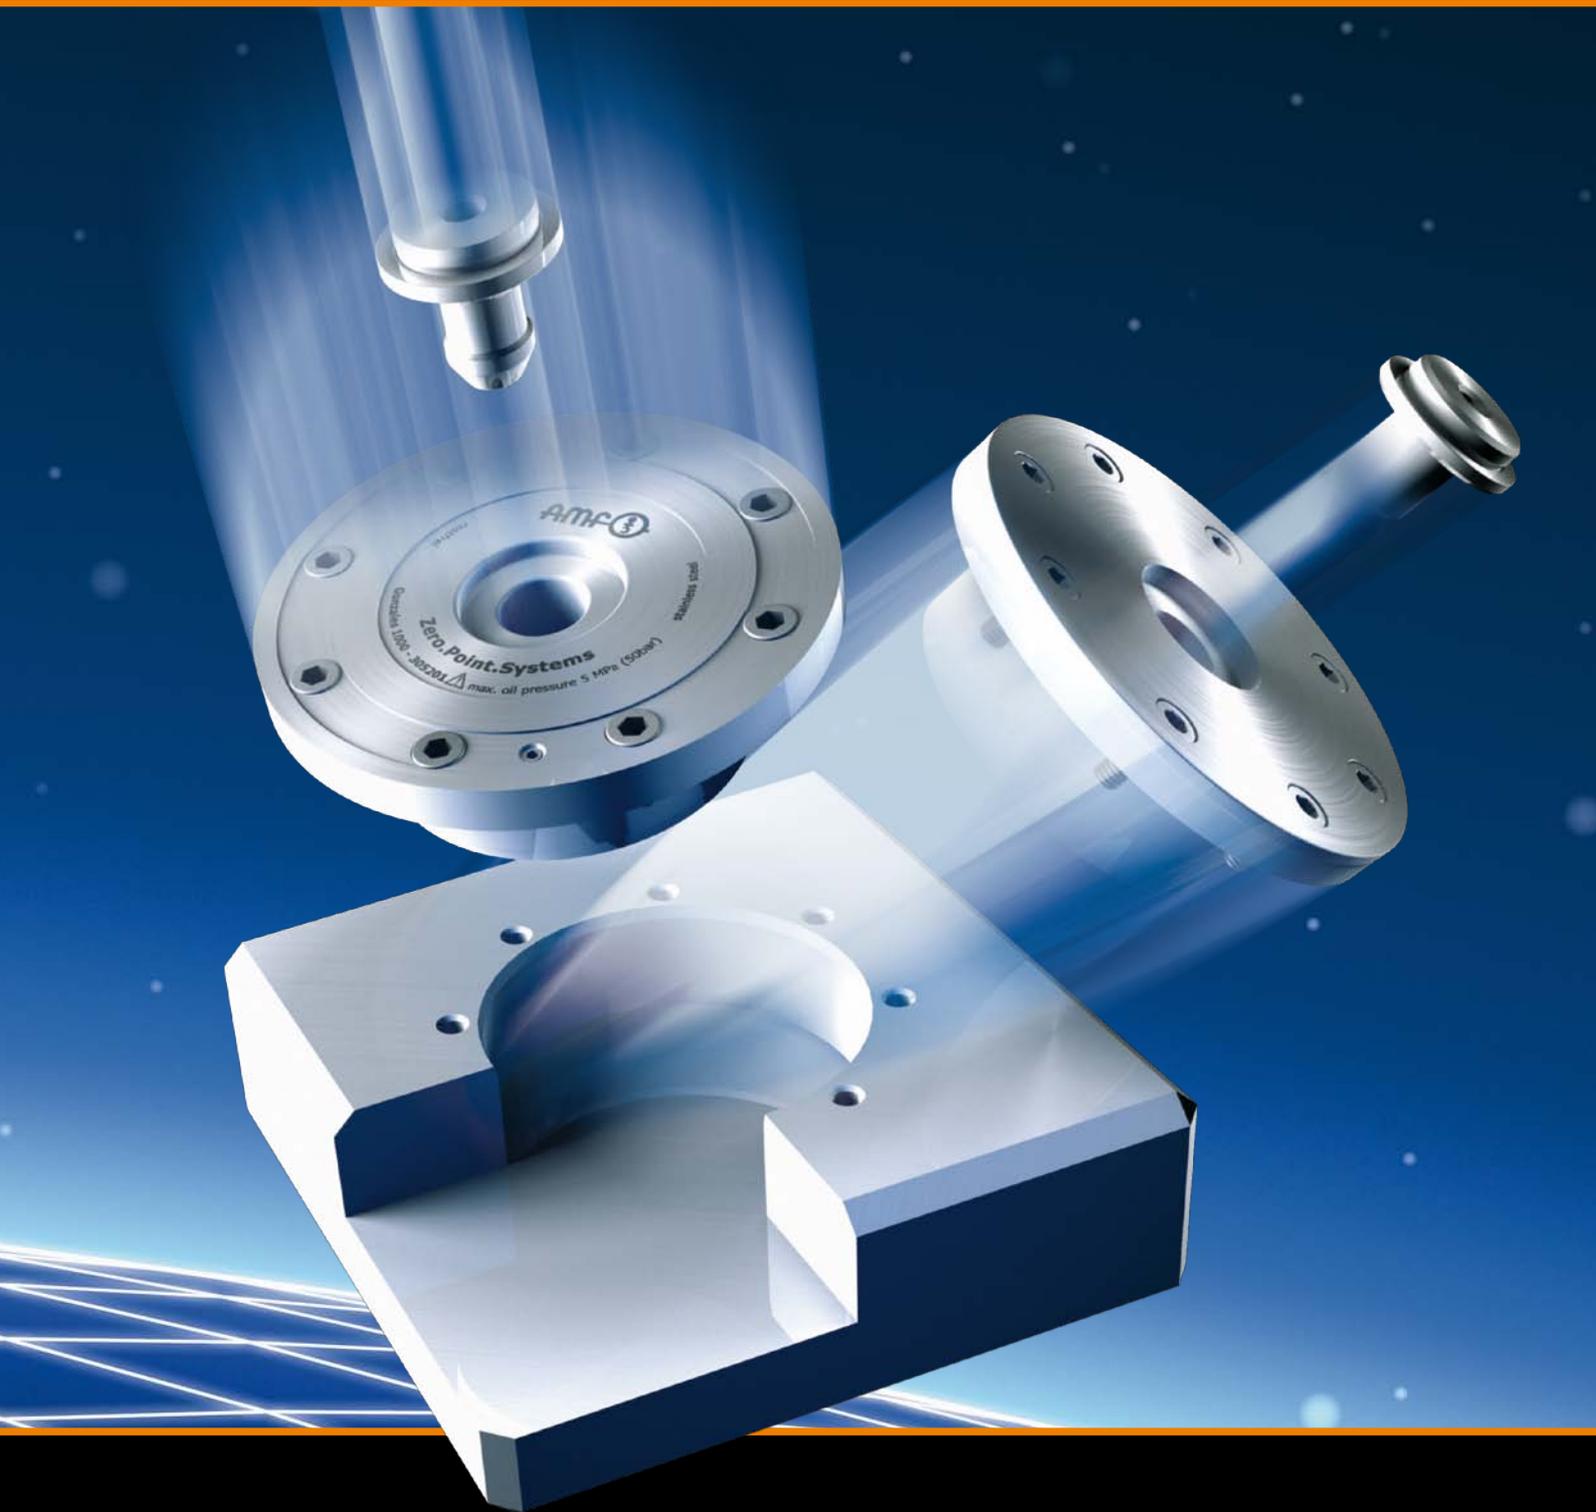

Process reliability - Clamping module always opens. A piston blockade is thus impossible (only Gonzales modules).

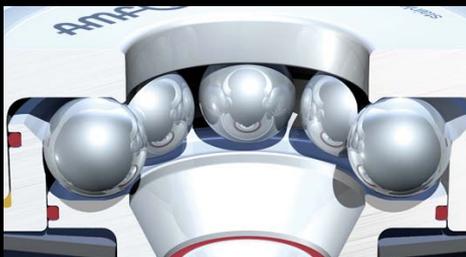

FORM FIT

The balls are optimally encapsulated on 3 sides. As a result, the pull-stud always remains firmly clamped in the module.

NO BALL CAGE

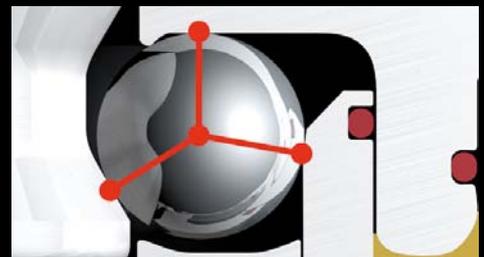

The balls lie freely in the ball canal. This freedom of movement enables the balls to continuously re-position themselves.

SWING-FREE

Swing-free run-in and run-out through the optimal contour of the pull-stud (only Gonzales modules).

THREE-POINT PRINCIPLE

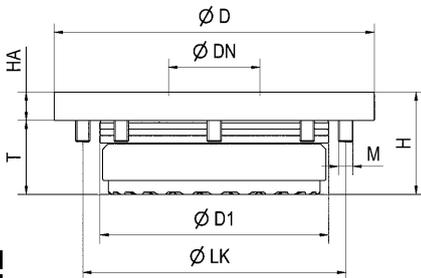

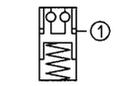

Power transmission by means of the three-point principle! This optimised force distribution prevents shearing load on the balls.

No. 6370EGRH

Installation clamping module “Gonzales”

Hydraulic opening.
Opening operating pressure: min. 50 bar - max. 60 bar.
Cover and piston hardened.
Repeatability < 0.005 mm.

Order no.	Size	Pull-in/locking force up to [kN]	Holding force* [kN]	Speedy	DockLock	Weight [Kg]
305201	1000	15	25	●	-	2,3
306043	1000	15	25	-	●	2,3
305219	2000	25	55	●	-	3,5

Application:

Zero-point clamping system for set-up-time-optimised clamping during cutting and non-cutting machining.

Note:

Use „Gonzales“ modules exclusively with „Gonzales“ modules in one clamping. When changing systems, observe the following: Unlike Speedy 1000/2000 and DockLock 1000, „Gonzales“ modules require an unclamping pressure of min. 50 bar / max. 60 bar. With recessed installation, observe the cover diameter D 112 mm / 140 mm. The installation clamping module is opened hydraulically (1) and mechanically locked through spring force. Subsequent uncoupling of the pressure lines is possible at all times (module is tensioned pressure-free).

The clamping module has one connection: 1x hydr. opening (1).

* Please observe the installation instructions.

On request:

No. 6370AGRH

Surface-mounted clamping module “Gonzales”

Hydraulic opening.
Opening operating pressure: min. 50 bar - max. 60 bar.
Cover and piston hardened.
Repeatability < 0.005 mm.

Order no.	Size	Pull-in/locking force up to [kN]	Holding force* [kN]	Weight [Kg]
303362	1000	15	25	2,3
303388	2000	25	55	3,5

Application:

Zero-point clamping system in combination with hook clamping flange 63707BG for set-up-time-optimised clamping during cutting and non-cutting machining.

Note:

Use „Gonzales“ modules exclusively with „Gonzales“ modules in one clamping. When changing systems, observe the following: Unlike Speedy 1000/2000 and DockLock 1000, „Gonzales“ modules require an unclamping pressure of min. 50 bar / max. 60 bar. The surface-mounted clamping module is opened hydraulically (1) and mechanically locked through spring force. Subsequent uncoupling of the pressure lines is possible at all times (module is tensioned pressure-free).

The clamping module has one connection: 1x hydr. opening (1).

* Please observe the installation instructions.

No. 6370EURL

Installation clamping module „Unitool“

Pneumatic opening.
 Opening operating pressure: min. 8 bar - max. 12 bar.
 Retensioning operating pressure (turbo): min. 5 bar - max. 6 bar.
 Cover and piston hardened.
 Repeatability < 0.005 mm.

Order no.	Pull-in/locking force up to	Holding force*	Weight [Kg]
	[kN]	[kN]	
303560	30	55	3,2

Application:

Zero-point clamping system for set-up-time-optimised clamping during cutting and non-cutting machining.

Note:

The installation clamping module has high holding, pull-in and locking forces. This is opened pneumatically (1) and mechanically locked through spring force. To achieve the specified pull-in and locking forces, it must be briefly retensioned pneumatically (turbo) (2). Subsequent uncoupling of the pressure lines is possible at all times (module is tensioned pressure-free). Use of the pneumatic pressure booster 6370ZVL-005 is recommended.

The clamping module has two connections:
 1x pneum. opening (1) / 1x pneum. retensioning (turbo) (2).
 Use „Unitool“ modules exclusively with „Unitool“ modules in one clamping.
 * Please observe the installation instructions.

WE DEVELOP THE RIGHT SOLUTION – POTENTIAL SAVINGS BY REDUCING SET-UP TIMES

As a system provider with its own production facility, not only do we have the right product for every need. With many years of experience from all fields of clamping technology we develop the perfect solution for different industries, special projects and for very individual requirements.

With full concentration on a single project, an entire team supports you at AMF, which unites all facets for a successful result.

In close cooperation and with short communication channels, our experienced experts from sales, proposal preparation and purchasing work together with our engineers and designers from the development and production departments.

Thus, we can always ensure that all criteria for a cost-effective production process are met – our specialists look forward to exciting new challenges. **Just talk to us!**

We will be happy to advise you
during your current project.

These Terms of Payment apply for companies, legal entities governed by public law and public law special funds. Our goods and services are supplied exclusively on the basis of the following conditions. Any deviating purchasing conditions of the customer not expressly recognised by us will not become part of the contract through acceptance of the order. By placing the order and accepting the goods we deliver, the customer confirms its consent to our terms and conditions.

1. Offer and contractual conclusion

All our offers are always subject to change without notice unless otherwise explicitly agreed. Our delivery contracts are based on the latest version of our catalogue. Dimension and weight values, as well as illustrations, drawings and data, are non-binding and can be changed by us at any time. Therefore, deviations cannot be ruled out and do not justify any compensation claims against us.

Orders are considered accepted only when confirmed by us in writing. If, for organisational reasons, the customer does not receive a separate confirmation upon the delivery of goods, the invoice shall also be deemed the order confirmation.

2. Prices

The prices are in EURO, ex-works, excluding VAT, packing, freight, postage and insurance. Unless otherwise agreed, our list prices valid on the day of delivery shall apply. For orders below 50 EUR goods net, we must make a minimum quantity surcharge of a 10 EURO for cost reasons.

3. Tool costs

Unless any other agreements have been reached, the tools fabricated for the purpose of executing the order shall remain our property in all cases, even if we have invoiced a tool cost component separately.

4. Payment

Unless otherwise stated on the invoice, the purchase price falls due for net payment within 30 days of the invoice date (without deduction of discount). Invoice amounts of below 50 EURO are due for payment immediately.

In case of payment default, we shall be entitled to charge default interest. The amount corresponds to our interest rate for current account credits at our main bank; the minimum however being 8 percentage points above the relevant base interest rate applied by the European Central Bank. Moreover, in case of default following written notice to the customer, we shall be entitled to cease to fulfil our obligations until payments are received.

5. No set-off

The customer can set-off only with legally confirmed or undisputed counterclaims.

6. Right of withdrawal in case of delayed acceptance or payment and insolvency

If the customer fails to accept the goods in due time, we shall be entitled to set a reasonable period of grace, after which we can dispose of the goods elsewhere and supply the customer on a reasonably longer term. Our rights to withdraw from the contract under the provisions of Section 326 BGB and demand damages for non-performance shall not be affected. If the customer fails to pay for the goods once payment is due, we shall be entitled, at the end of a reasonable period of grace we have set, to withdraw from the contract and demand the return of any goods already supplied. Section 323 BGB remains unaffected in all other cases.

If the customer applies for the opening of insolvency proceedings, we shall be entitled, prior to the ordering of security measures by the insolvency court, to withdraw from the contract and demand the immediate return of the goods.

7. Customer-specific fabrications/project fabrications (custom fabrications)

Customer-specific fabrications require binding information on design, quantity etc. in written form at the time of ordering. For manufacturing reasons, we reserve the right to supply up to 10% above or below the order quantity. Technical modifications or cancellations are subject to any costs incurred. The return of customer-specific fabrications is impossible.

8. Delivery and packaging, transfer of risk

The delivery date is non-binding; although stated to the best of our knowledge. It is subject to us receiving correct, defect-free and complete deliveries. The stated delivery dates relate to completion in the factory, starting on the day the order is accepted by us. Delivery is EXW (ex-works) in accordance with Incoterms 2010. Therefore, the costs are borne by the customer. The risk is transferred to the customer when the goods are passed to the person, company or facility nominated to execute the shipment. This applies also for partial deliveries, or if we have assumed responsibility for delivery and installation. The risk shall be transferred to the customer even in the case of delayed acceptance.

In the absence of specific shipping instructions, we shall proceed as we deem fit and without any obligation to the cheapest or most expedient method. The customer agrees that the order can also be delivered in parts, insofar as this is reasonable for the customer. We shall charge a 5 EURO processing free for shipping to third parties that we supply on behalf of the customer.

The packaging complies with the packaging ordinance. Disposable packaging shall be charged at cost price. The packaging cannot be taken back.

9. Performance impediment and/or impossibility

If we are hindered in the fulfilment of our obligation due to the onset of unforeseeable circumstances, which we are unable to avoid despite reasonable effort in relation to the nature of the circumstances (e.g. operational interruption, delay in the delivery of important raw materials, defects in the delivery), the delivery time shall be extended by a reasonable period, insofar as the supply of goods or services is not rendered unreasonably difficult or impossible.

If we have to accept that these circumstances are not only temporary, we shall be entitled to withdraw from the contract either in whole or in part.

If the supply of goods or services becomes impossible, the customer shall not be obliged to furnish its own contractual service. Section 275 BGB applies mutatis mutandis. If, however, the customer is solely or predominantly responsible for the

circumstances that led to impossibility, it shall remain under an obligation to render the return service. The same applies if this circumstance occurs at a time when the customer is behind schedule with acceptance.

10. Samples/returns

Samples shall be provided only against payment. If samples or models are provided, a credit note shall be issued with the subsequent order if the order value is 125 EURO net or more. Goods can be returned only by agreement, although custom fabrications are excluded from such return.

In the case of returns for which we are not responsible (e.g. incorrect order), we shall charge a processing fee of 10%, the minimum value, however, being 7.50 EURO.

11. Retention of title

The goods shall remain our property unless full payment of all claims and/or until the cheques provided for this purpose are honoured. The itemisation of claims in an ongoing invoice, as well as balancing the account and the recognition thereof does not affect the retention of title. The customer is entitled to sell on the retained goods during the ordinary course of business. However, the customer is not permitted to pledge the goods or transfer them by way of security. It shall assign its claim ensuing from the selling on of the retained goods to us in advance. The customer shall be entitled to collect the claim to the extent that it has fulfilled its obligations towards us. At our request, the customer shall be obliged to state third-party debtors and we shall be entitled to report this and the assignment.

12. Property rights

We reserve property rights and copyrights to all contractual documents such as drafts, drawings, calculations and cost estimates. Such documents must not be reproduced or disclosed to third parties without our consent. Any rights to patents, utility models etc. reside solely with us, insofar as such patents have not yet been filed. Our products are allowed to be replicated only with our written consent.

If objects are fabricated according to drawings or samples, the customer shall warrant that any third party property rights are not infringed by manufacture or delivery. If a third party forbids manufacture and delivery on account of property rights, we shall be entitled to stop manufacture and delivery immediately. The customer shall be obliged to reimburse us with all costs incurred and indemnify us from third party compensation claims. Compensation claims by the customer are impossible.

13. Warranty

If the customer agrees with us a particular quality of the goods, we shall base this agreement on our technical delivery specifications. If we have to deliver according to customer drawings, specifications, samples etc., the customer shall assume the risk for suitability for the intended purpose. If, after the contract is concluded, the scope of goods or services is changed at the customer's request and this impairs the quality or suitability of the goods, claims for defects on the part of the customer shall be ruled out, insofar as such impairments are caused by the customer's requests for change. The time at which the risk is transferred is decisive for the contractual state of the goods. Wear and tear of wearing parts caused by ordinary use does not constitute a defect. Claims for defects are ruled out in the following cases in particular: Unsuitable or improper use, incorrect installation and/or commissioning by the customer or third party, normal wear and tear, incorrect or negligent handling - in particular excessive use -, unsuitable equipment, replacement materials, chemical, electrochemical or electrical influences, unless such defects are caused by ourselves.

If the goods contain a defects, we shall provide, following a reasonable period of grace set by the customer, either a replacement or a repair as we deem fit. If such subsequent performance fails, the customer shall be entitled to either reduce the purchase price or withdraw from the contract. Any further warranty claims are ruled out. In case of negligible deviations from the agreed quality, no claims for defects shall be recognised.

The discovery of defects must be communicated to us immediately in writing. In the case of recognisable defects, however, within 10 days of acceptance, in the case of non-recognisable defects immediately after they become evident. The warranty is 12 months, starting with delivery of the goods ex-works.

14. Liability

With the exception of harm to life, body or health on account of a breach of duty by ourselves, our liability shall be limited to intent or gross negligence.

15. Place of fulfilment, place or jurisdiction and governing law

The place of fulfilment for all obligations ensuing from this contractual relationship is D-70734 Fellbach.

The place of jurisdiction for all legal disputes ensuing from the contractual relationship is the court responsible for the headquarters of Andreas Maier GmbH & Co. KG.

All disputes ensuing from the contract or regarding the validity thereof shall be finally decided by a court of arbitration in accordance with the Court of Arbitration Ordinance of the German Committee for Arbitration Court Procedures or the Conciliation and Arbitration Arrangement of the International Chamber of Commerce, recourse to ordinary courts of law being excluded. The legal dunning process, however, remains permissible.

German law shall govern (BGB and HGB). The applicability of the UN Convention on Contracts for the International Sale of Goods (CISG) is ruled out.

16. Severability clause

If individual provisions become legally invalid, the remaining provisions shall not be affected. The legally invalid provision shall be replaced by regulations that most closely reflect the economic purpose of the contract with reasonable consideration for the mutual interests. The publication of these Terms of Sale, Delivery and Payment renders all previous versions invalid. This does not apply for any contracts concluded prior to announcement.
